Dr. W. M. Cochran visits Ag. Eco. classes

Yemen, a tiny nation on the southwest border of Saudi Arabia, has skyscrapers although the buildings are only a few stories high. But, each building is atop mountain ridges about two miles high.

Minnesota Prof Here Next Week

Dr. Willard W. Cochran, professor at the University of Minnesota and president-elect of the American Farm Economics Assn., will be "visiting professor" in the Department of Agricultural Economics and Sociology, Sunday through Thursday.

In addition to holding seminars in the Department of Agricultural Economics and Sociology, Cochran will lecture on "A Balanced Farm Program for Agriculture" Tuesday at 8 p.m. in Room 231, new wing of the Chemistry Building. The lecture is sponsored by the Graduate School and will be open to the general public.

Cochrane, a native of California, received his B.S. degree from the University of California, M.S. degree from Montana State College, and Ph.D. from Harvard University in agricultural economics. Af-

ter service in the Navy, he worked in various capacities for the United States Department of Agriculture, War Food Administration and the Food and Agricultural Organization. He was professor of agricultural economics at Pennsylvania State College from 1948 to 1951 and has been at the University of Minnesota since 1952. Cochran is currently on leave from Minnesota, serving as visiting professor at the University of Chicago.

Although he has worked on a wide range of problems, Cochran is best known for his teaching and research work in agricultural policy, consumer and food economics and agricultural prices. He is author of several books in the agricultural policy field and of numerous research publications and professional journal articles.

A CROW HAZARD
RUIDOSO, N. M. (AP)—Most golf courses have sand traps. Some have water hazards.

Cree Meadows at this mountain resort town has a crow hazard. "You get a beautiful drive down the fairway," says Bill Keyes, "and bingo, here comes a crow; picks up the ball and away he goes."

Ed Amonett of Roswell, N. M., estimates he has lost about \$1,000 worth of balls to the crows in the last year, says Keyes.

What's to be done about it? Not much. The course lies on the edge of the Mescalero Apache Indian reservation and you not only must have a regular hunting license, you have to have one from the Indians to take a shot at the golf ball bandits.

EMERGING FROM CRISIS

THE CHURCH FOR ALL ... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.
