... Journalism Which Succeeds Best—and Best Deserves Success—Fears God and Honors Man; Is Stoutly Independent, Unmoved by Pride of Opinion or Creed of Power... Walter Williams

To Juniors: A Challenge

With the completion of the second trip around the drill field at Final Review, the Class of '60 will be faced squarely with the largest challenge it has ever yet had to face.

This same challenge will be up to the classes of '61 and '62, but it will be the present juniors who must guide the Corps and accept the responsibilities that go with this leadership.

Next year will be full of more changes—some even more far-reaching than those that have taken place this year.

The Class of '60 must be ready—and willing—to do their part in seeing that these changes are accomplished for the good of the school and of the Corps.

If in the glory of donning boots for the first time or the natural "big" feeling that will come in knowing that after three years they are at the top of the heap, the Class of '60 fails to accept its responsibilities, then the progress made this year will have been in vain.

Thus far, juniors have not had to prove their leadership ability—they've always had a class above them. But in only 16 days more they will be the class that every underclassman in the Corps will look toward for guidance.

The future rests upon shoulders that will soon be also carrying cadet officer rank. Upon how well they shoulder both the responsibility and the rank rests not only on their future but ours and of future Aggies as well.

The Class of '60 must be ready to accept this challenge. Only time will reveal if they are ready—if time doesn't run out on them...

AEC Head Outline Committee Plans

WASHINGTON (AP)—Atomic Energy Commission Chairman John A. McCone said Tuesday a scientific advisory committee soon "will give further reassurance to the people of the world about the very small hazard resulting from fallout" of nuclear bomb tests.

McCone's comment, made during a speech to the National Press Club, came almost simultaneously with testimony by an AEC scientist before the Senate-House joint committee on Atomic Energy saying that:

1. Nuclear tests released more contamination into the atmosphere in the last two years than did tests by the United States and Britain combined.
2. There are some estimates

that radioactivity already produced may cause 3,500 to 7,000 additional bone cancer cases in 70 years.

These were the views of Dr. Charles L. Dunham, director of the AEC's division of biology and medicine.

In answer to a question, McCone said he did not think it possible to say that testing to date has harmed no one. The effect, he added, will not be serious as compared with other common hazards to which people are exposed, including natural radiation.

McCone emphasized the need for agreement to the test control plan proposed by President Eisenhower to Soviet Premier Nikita Khrushchev on April 13.

MSC Art Program Under Mrs. Terry

By JAY COLLINS
 Battalion Staff Writer

Mrs. Emalita Newton Terry is the person responsible for many of the exhibits found in the Memorial Student Center—whether paintings or any other form of creative art on exhibit.

Mrs. Terry, MSC art adviser and instructor, is in charge of

securing instructors and setting up classes in art, sculpture and photography. She also sets up the class schedule which the groups use.

Born in San Angelo in 1918, she lived in different parts of Texas during her first five years. Finally her family settled in Brownwood where she received most of her education in the public schools. Upon graduation from high school she enrolled at Howard Payne College and graduated with a degree in art in 1933.

Alvin Garners 'Grammy' Awards

HOLLYWOOD (AP)—A petulant chipmunk named Alvin helped composer Ross Bagdasarian rake in multiple honors from the newly formed National Academy of Recording Arts and Sciences.

Bagdasarian received three "grammy" awards—miniature, gold-plated gramophones—for his catchy work "The Chipmunk Song" at Monday night's first annual presentation ceremony.

The recording was voted best comedy performance, best children's song and best engineered record of 1958.

The top award went to an Italian, Domenico Modugno, for his "Volare." The Decca record was cited as the all-round best of the year. "Volare" also was named best song.

Perry Como's "Catch a Falling Star" won him the best male vocalist award and Ella Fitzgerald won two Grammys as the best female performer, "Irving Berlin Song Book" and No. 1 jazz artist, "Ella Sings Duke Ellington."

The oldest forest fire lookout station in Maine is still in operation. It was established on Squaw Mountain in 1905.

We Aggies like to read about Wee Aggies. When a wee one arrives, call VI 6-4910 and ask for the Wee Aggie Editor.

A potential date for future military dances, Miss Judith Ann Saust, arrived April 29, in St. Joseph Hospital. Judith Ann is the daughter of Mr. and Mrs. Jerry Saust, '59. Miss Saust weighed in a 7 pounds, 10 ounces.

The Battalion would like to correct its report of the birth of James Edward Taber, born to Mr. and Mrs. Curtis Taber, '62, on April 25, at St. Joseph's Hospital in Bryan. The name is Taber and not Taylor as reported earlier.

Job Calls

Thursdays
 Honolulu Oil Corp. will interview sophomore and junior PetE majors for summer jobs. Students should preferably be from west Texas and the juniors should be able to work all summer and not be subject to military camp.

Honolulu Oil Corp. will interview PetE graduating seniors for positions with the firm.

SAINTLY SENTENCE

SANTA FE, N.M. (AP)—Dist. Judge David Carmody has ordered a Santa Fe woman to attend church with her children every Sunday for two years—or else.

Charged with cashing a \$90 welfare check that didn't belong to her, the woman was sentenced to from 2 to 5 years in prison. The judge suspended the sentence propounding she be a faithful churchgoer for two years.

Japan made only 6,000 cameras in 1937. But, by 1955 its production of cameras reached a total of 750,000.

Social Whirl

Civil Engineering Wives will meet at 8 p.m. in the South Solarium of the YMCA.

Chemical Engineering Wives elected new officers for the fall term. President is Kay Laughter; vice-president is Phyllis Billingsley; and Aggie Wives Council representative is Daisy Pybus.

ADVENTURES IN SOCIAL SCIENCE: NO. 3

Today, ranging again into the fascinating world of social science, let us take up the subject of anthropology—the study of man and his origins.

The origin of man was indeed a puzzle until the Frenchman, Jean-Louis Sigafoos, discovered the skull and shinbone of Pithecanthropus Erectus in Java in 1891. What Sigafoos was doing in Java is, incidentally, quite an odd little story. Sigafoos was a Parisian born and bred. By day one could always find him at a sidewalk cafe, sipping barley water and ogling the girls; each night he went to a fashionable casino where he gambled heavily at roulette and go-fish; in between times he worked on his stamp collection, which was one of the largest in Paris.

She was beautiful—but only by local standards

Well sir, one summer Sigafoos lost his entire fortune gambling at the casino. He was seriously contemplating suicide when, quite unexpectedly, a letter arrived from one Lotus Petal McGinnis, a Javanese girl and an avid stamp collector, with whom Sigafoos had been corresponding from time to time through the international stamp collectors journal. Until now the nature of their correspondence, though friendly, had been strictly philatelic, but in this new letter Lotus Petal declared that although she had never laid eyes on Sigafoos, she loved him and wanted to marry him. She said she was eighteen years old, beautiful and docile, and her father, the richest man in the tribe, had agreed to give half his fortune to the husband of her choice. Sigafoos, penniless and desperate, immediately booked passage for Java.

The first sight of his prospective bride failed to delight Sigafoos. She was, as she said, beautiful—but only by local standards. Sigafoos had serious doubts that her pointed scarlet teeth and the chicken bones hanging from her ears would be considered chic along the Champs Elysees.

But sobering as was the sight of Lotus Petal, Sigafoos had an even greater disappointment coming when he met her father. The old gentleman was, as Lotus Petal claimed, the richest man in the tribe, but, unfortunately, the medium of exchange in his tribe was prune pits.

Sigafoos took one look at the mound of prune pits which was his dowry, gnashed his teeth, and stomped off into the jungle, swearing vilely and kicking at whatever lay in his path. Stomping thus, swearing thus, kicking thus, Sigafoos kicked over a heap of old bones which—what do you know!—turned out to be Pithecanthropus Erectus!

But I disagree. From the brutish Pithecanthropus, man evolved slowly upward in intellect. By the Middle Paleolithic period man had invented the leash, which was a remarkable technical achievement, but frankly not particularly useful until the Mesolithic period when man invented the dog.

In the Neolithic period came the most important discovery in the history of man—the discovery of agriculture. Why is this so important? Because, good friends, without agriculture there would be no tobacco, and without tobacco there would be no Marlboro, and without Marlboro you would be without the finest filter cigarette that money can buy, and I would be without a job.

That's why.

Without tobacco you would also be without Marlboro's sister cigarette, Philip Morris, a non-filter smoke that can't be beat. Philip Morris or Marlboro—pick your pleasure.

PEANUTS

By Charles M. Schulz

JUST THINK, IN ABOUT TWELVE YEARS SOME POOR GIRL WILL BE MARRYING CHARLIE BROWN...

IT'S GOING TO BE HARD FOR US TO SAVE HER WHEN WE DON'T KNOW WHO SHE IS (WHERE SHE LIVES OR ANYTHING..)

WHAT WE NEED IS SOME SORT OF WARNING SYSTEM...

WE COULD CALL IT "EARLY WARNING MARITAL RADAR"!

I CAN'T STAND IT.
