Local Schools Aid Education Majors

Senior education majors of A&M will be better prepared to begin their public school teaching careers next September, thanks to a cooperative program between the college and schools of College Station and Bryan.

Dr. Grady P. Parker, head of the Department of Education and

Commentator Staff Plans for 1959-60

A meeting was held last night by incoming editor of The Commentator, Tucker Sutherland, to lay the groundwork for naming the 1959-60 staff.

Sutherland also discussed some tentative plans for changing the magazine for next year. He said nothing really definite could be established until the new Dean of Arts and Sciences arrives.

He said the staff was also contemplating a general overhaul of the magazine, including a new name.

Sutherland stated the magazine will not be a humor magazine and it will not be strictly a literary magazine as the Commentator was this year. The name which looks like the most favorable is The Aggie Scholar, Sutherland said.

Men who signed as possible members of next years staff are Tom Stafford, Bob Roberts, Jim Coston, Jim Gibson, Joe Jackson, Kenneth Allen, Chuck Kincaid, Dan Louis, Richard Reiser, Jay Collins, Bob Dodson, Pat Mazzeo, John Kiekbusch, Dal Herring, Bill Broussard and Tommy Holbein.

Psychology, said that 15 students from the department are completing their practice teaching this semester at the two school systems.

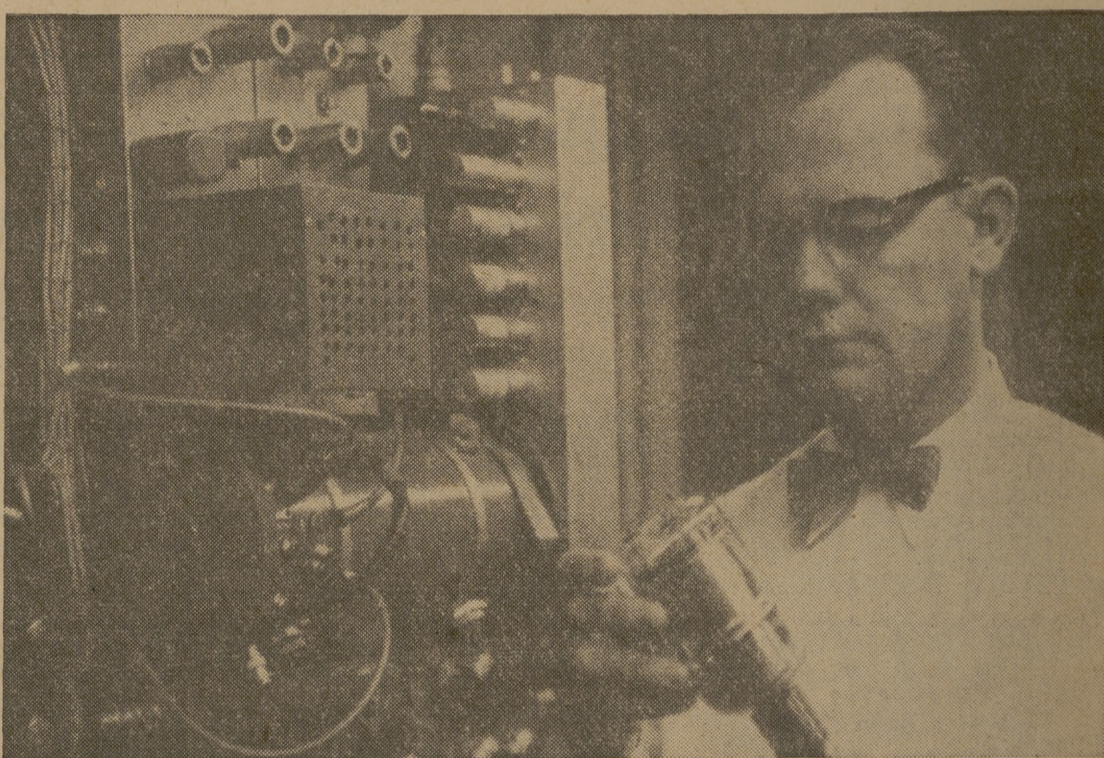

Five student teachers are assigned to A&M Consolidated High School in College Station, four to Stephen F. Austin High School in Bryan and three each to Bryan's junior high schools, Lamar and Jones.

Education majors are required to participate in the student teaching program for one semester during their senior year, spending a minimum of 15 hours in the classroom each week.

These semesters are divided into three definite periods for the student teacher. First, he observes the work and methods of the regular, or cooperating teacher. Next, he assists the teacher with varied duties, and third, he assumes full responsibility of the classroom for at least six weeks.

During the 18 weeks of the student's practice teaching, he engages in most of the activities that a classroom teacher would experience. He attends meetings of the Parent-Teacher Assn., the faculty and student organizations, clubs and homerooms, visits homes of students when accompanied by the cooperating teachers and participates in various school-community functions.

To further his preparation, each practice teacher is required to keep a daily "log" of his classroom experiences, make a written study of each student in his assigned class and select one student for a more complete child study and analysis. They are also required to prepare teaching plans.

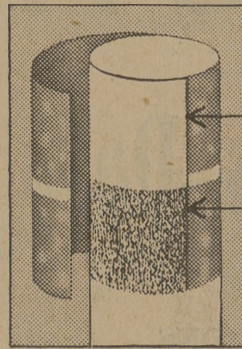

Radio Tube for Storm Tracking

Dr. George Huebner of the Department of Oceanography and Meteorology examines an \$1,100 radio tube before placing it in a set being used for long-range storm-tracking. Huebner is heading research aimed at augmenting radar tracking of tornados and weather fronts. The research is being done for the U. S. Air Force's Cambridge Research Center in Cambridge, Mass.

HOW THAT RING GETS AROUND!

THE TAREYTON RING MARKS THE REAL THING!

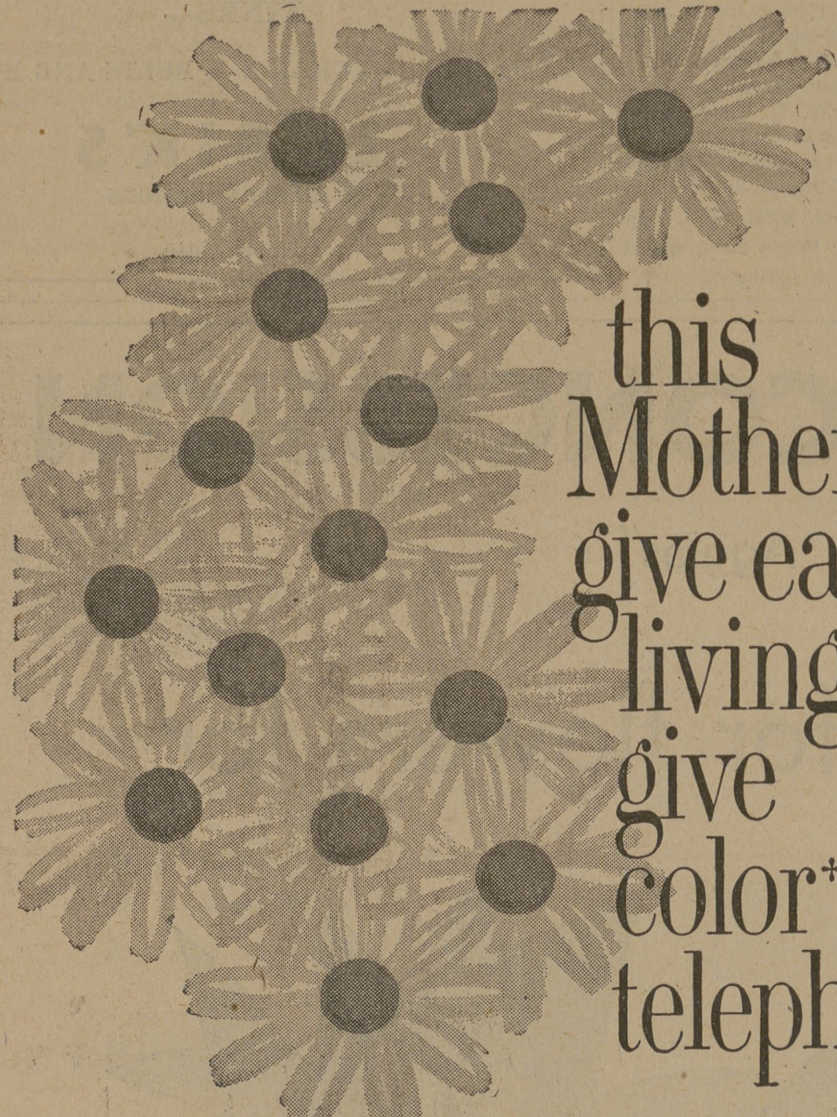

HERE'S HOW TAREYTON'S DUAL FILTER WORKS:

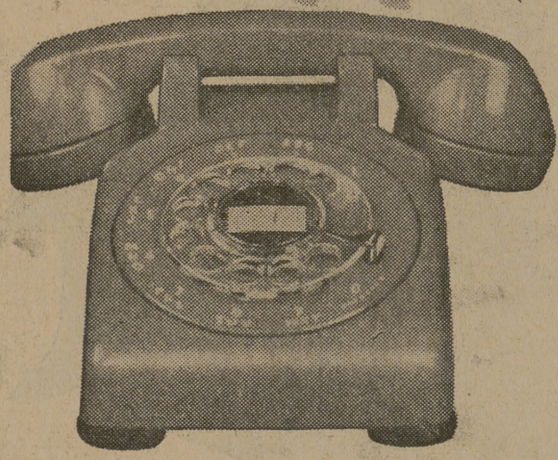

1. It combines an efficient pure white outer filter...
2. with a unique inner filter of ACTIVATED CHARCOAL... which has been definitely proved to make the smoke of a cigarette milder and smoother.

NEW DUAL FILTER Tareyton
