Texas Air Tour Sets Easterwood Layover

Rural Industry Need Stressed By Rep. Hinson

State Rep. George Hinson of Mineola said today in the Memorial Student Center, "Texas must do whatever is necessary to promote rural area industry, coupled with an ever expanding and enlightening agricultural economy."

Hinson delivered the opening address at the first session of the ninth annual Texas Industrial Development Conference being held today and Friday.

President Earl Rudder gave the welcome address. Approximately 200 industrialists from throughout the nation are in attendance. The first session was chaired by Chester Wine, of the Central Power and Light Co. of Laredo.

"We all live to boast of our large and growing cities," Hinson declared, "well staffed with local industrial organizations and industrial promotional gimmicks. But ours is a job of seeing to it that Texas has a well balanced industrial program, reaching into the most remote areas; a program which will guarantee to each industrialist and every industrial concern, domestic as well as interstate that our climate will not be surpassed by any state in this nation."

Hinson spoke on "The Industrial Climate of Texas as Viewed by the State Administration."

Harry Clark, industrial consultant for Texas Power and Light Co. of Dallas, said, "Although the industrial development of Texas has been moving at a rapid pace, it behooves all interested parties to take an inventory of their activities in the future for an unprecedented degree of competition from other areas."

He spoke on "The Industrial Climate of Texas as Viewed by a Consultant."

Said the speaker, "The fact that Texas was not listed as one of the five states 'doing the most to attract new industry' in a recent nationwide survey prompts the attention of all agencies to increase their activities."

"The industrial expansion of America faces a tremendous growth in the 1960's but this does not give an automatic green light to every community. There must be an intelligent all out effort by an informed leadership if many communities of our state are to enjoy industrial growth in the next decade."

11th Annual Flight Due Here Saturday

College Station will be the second of 38 scheduled stops on the 11th annual All Texas Air Tour to be held Oct. 3 Oct. 10.

Approximately 75 planes carrying 125 fliers are expected to land at Easterwood Airport at 1:45 p. m. Saturday as the first stop after their departure from Temple at 1. Fliers from 18 states and Mexico have registered for the 3,000-mile flight, which is sponsored each year by the following organizations:

The Texas State Aviation Association, Texas Private Fliers Assn., Texas Flying Farmers, Texas Ninety-Niners, Texas Wing, Civil Air Patrol, and the Texas Aeronautics Commission, acting as coordinating agency.

The College Station Chamber of Commerce will act as host for the visit, according to Leland S. Paine, president of the Chamber of Commerce. Members of the reception committee for the fliers will be the following:

Mr. and Mrs. Leland S. Paine; Ernest Langford, mayor of College Station; O. B. Donaho, mayor of Bryan; E. L. Angell, vice chancellor of the A&M College System, and Mrs. Angell; Ran Boswell, city manager of College Station; Don Dale, past president of the College Station Chamber of Commerce; Jack Springer, manager of the Bryan Chamber of Commerce; and Mr. and Mrs. H. E. Burgess.

Also Mrs. John Perry; Mrs. R. E. Odom; John Naylor, president of the Bryan Chamber of Commerce; and Mrs. Naylor. The A&M Consolidated Dance Band will furnish entertainment for the visitors and refreshments will be served.

The purpose of the annual tour is to point up the safety of mass movement, the utility of the small aircraft, the improvement of "Good Neighbor Relations" and to publicize the March of Dimes.

Major stops on the tour will include Texarkana, Mineral Wells, Brownfield, Ft. Clark Ranch, Harlingen, Corpus Christi, Lufkin, Sherman, Dumas, Big Spring, Marfa, Eagle Pass and Edinburg. The tour will end in Galveston, Oct. 10.

New features of this year's trip will be a pre-flight reception by the Temple Chamber of Commerce Oct. 2, side trips to the McDonnell Observatory and the location for the filming of the movie "Alamo." There will also be tours through the Mitchell Industries, Snow Aircraft, Inc., and the Army Preliminary Helicopter School. Also featured on the tour will be a night in Old Mexico for all those making the trip.

An open invitation has been issued by Asa Burroughs, tour director, to all interested pilots.

The week of Oct. 3-Oct. 10 has been proclaimed "Aviation and Air Tour Week in Texas" by Governor Price Daniel.

MSC Film Society Offers Cinemascope Production Friday

The Memorial Student Center Film Society will present the Cinemascope production, "The Sun also rises," tomorrow at 7:30 p. m. in the MSC ballroom.

Previously, all Cinemascope productions had been rescheduled due to a hold up in shipping the special lens from the factory, according to Ed Saenz, film society chairman. However, the lens have arrived earlier than expected and Cinemascope production will go into full swing.

"Dead flies cause the ointment of the apothecary to send forth a stinking savour: so doth a little folly him that is in reputation for wisdom and honor."—Ecclesiastes 10:1

Fish Council Slates Meet Friday Night

The second organizational meeting of the Freshman Council will be held tomorrow at 7:00 p. m. in the Anderson Room above the main floor of the YMCA. All freshmen interested in working with a freshman group that will try to aid the freshmen in all ways possible are urged to attend this meeting.

Those wishing membership in the YMCA will have an opportunity to sign up in the Cabinet Room on the main floor of the YMCA Building.

Also Friday night, the YMCA will sponsor a panel discussion entitled, "If I were in College Again—What?" The panelists will include P. J. Woods, professor in the Department of History and Government, who will act as moderator for the discussion. Also on the panel is the Rev. Earl P. Martin, and Dr. J. Q. Hayes, professor of English. Austin Keiley of the Basic Division, and James Miller of the Department of Agricultural Economics conclude the list of men representing the fine Aggie faculty on this panel discussion.

Refreshments will be served, and all in attendance will have ample opportunity to speak with the panelists personally.

A&M Consolidated Parent's Club Has Organization Meet

A meeting to organize a parents' club to support the A Capella Choir of A&M Consolidated School was held last Tuesday evening in the library of the Senior High School and officers for the club were elected.

Mrs. W. W. Mills was elected president, Mrs. W. H. Taylor, vice president, and Dr. and Mrs. R. O. Berry, treasurer and secretary, respectively.

Until the officers were elected, Frank Coulter presided over the meeting and explained the need for a parents' club to help support the choir of ninety members. Previous to the election of officers, he outlined prospective functions for the year, emphasizing certain items on the proposed program.

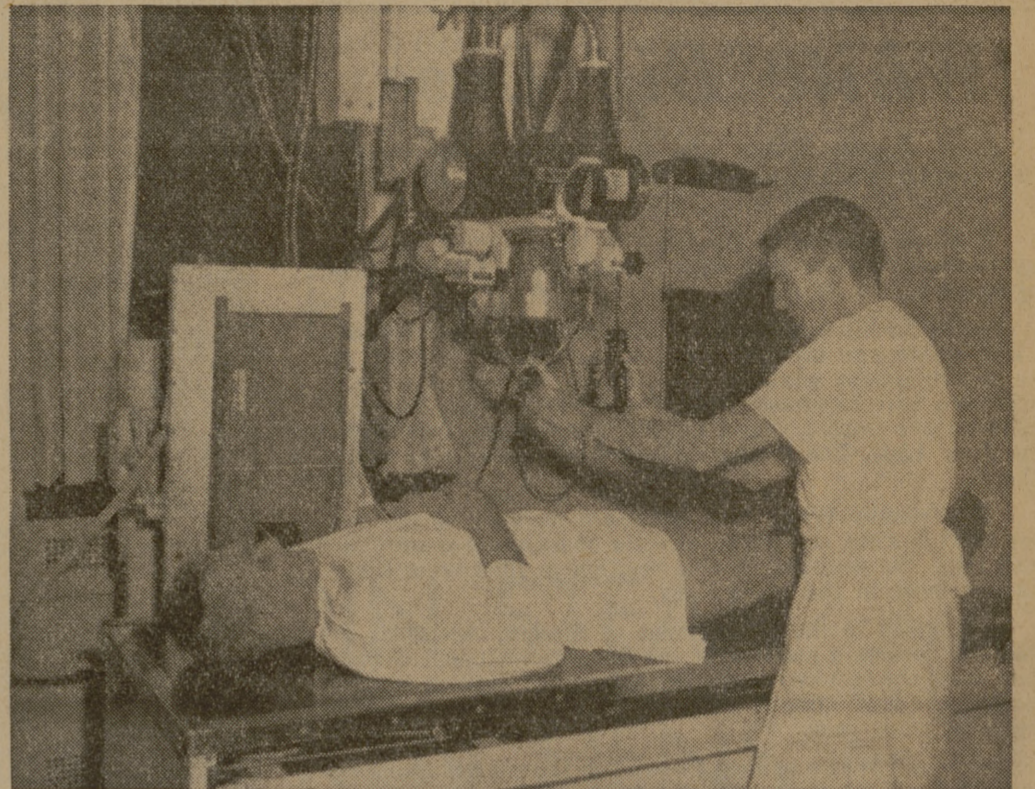

Coulter felt that the activities of the choir might include a Christmas Open House featuring choral music, the production of a musical show in March, participation in Interscholastic League Competition in April, and possibly a short tour sometime during the year. He indicated that parents could help in these activities by arranging for adequate publicity, and promotion of the sale of tickets.

Proceeds of the events would go toward the purchase of additional music and for obtaining new choir robes.

Dues were set at \$1.00 per family per year to provide working capital for the choir until the activities are complete.

Plans were also made to ask the students in the choir to make suggestions for a name for the organization and a prize will be awarded the author of the winning name. Other business included a decision to inform all parents of choir members by letter about the formation of the new club, and to extend them invitations to join.

Four officers of the choir, Mike Gay, president, Anita Mowery, vice president, Ann Elkins, secretary, and Barbara Beasley, treasurer, were present, along with about thirty parents.

X-ray Assistance

Taking advantage of the X-ray equipment only one of the many beneficial services offered at the campus hospital. Thirty-five persons are employed at the hospital. Operating the machine is technician Terry McKee. The X-ray equipment is

Many Additions

College Hospital Changes Increases Effectiveness

(Editor's Note: In an effort to explain what the \$17.35 compulsory student services fee is being used for, The Battalion is beginning a series of three articles explaining the services of the College Hospital, the Memoria Student Center and the Intramurals program.)

The fully-equipped College Hospital under the direction of Dr. C. R. Lyons has undergone several major changes this summer.

The biggest change this year according to Dr. Lyons is the addition of a Physio-Therapy Room. This room, under the direction of Mrs. Rose Sowers, contains two whirlpools, one tub that can be rigged with a whirlpool machine and two diathermy machines. The diathermy machine is used for deep heat treatment.

Dr. Lyons said that the hospital can handle almost any type of injury or illness.

"We are equipped to take X-Rays, handle all types of laboratory work, minor surgery, fractures, infirmary care, medical counseling and psychiatric counseling," he said.

The hospital normally has 50 beds set up but it does have facilities to handle 200 bed patients. "On a normal day we handle approximately 200 out patients," he added.

The hospital employs thirty-five persons. This includes six physi-

cians including specialists in internal medicine, surgery, ear, nose and throat. There are also nine registered nurses and two fully trained technicians on the staff.

For those students who have been wondering about the \$17.35 paid for student services, \$11 of this fee goes to the hospital. This is an increase of \$1 over last year. Dr. Lyons said that this increase was necessary to replace the \$4,000 that the Texas Legislature did not give the hospital this year.

Dr. Lyons also said that the hospital has a contract with the Army to give physicals to Army contract applicants. The extra money that the hospital receives under this contract is put toward

Auxiliary Officers Needed for Help At Ag-Cougar Game

Approximately 40 students will be hired as auxiliary patrolmen to help direct traffic and parking for the A&M-University of Houston football game Oct. 10, Fred Hickman, chief of campus security, announced yesterday.

Any students interested in applying for this work are urged to inquire at the Campus Security Office, Hickman said.

giving the students better medical service.

Under the remodeling plans now underway the hospital hopes to soon be able to replace all of the old ceiling fans with window air conditioners, Dr. Lyons said. He added that with the new improvements and others to be added soon, the College Hospital will be able to offer as fine a service as any hospital in the area.

Dr. Lyons advises students not to come over after hours for treatment of common ailments since they cannot be accommodated at that time.

Fred Thornberry Sets Judging Mark At Memphis Meet

Fred Thornberry, senior agricultural education major from Conroe set a new contest record in the Senior Dairy Cattle Judging Contest at the Mid-South Fair at Memphis, Tenn., Sept. 29.

Dr. M. A. Brown, coach of the Senior Dairy Cattle Judging Team reported by telephone that Thornberry scored 640 points out of a possible 700. He received two trophies, one for high individual in the contest and another for high score in the Guernsey classes.

Rhodes Scholarship Conferences To Begin

Conferences for students interested in obtaining applications for Rhodes Scholarships at the University of Oxford are now open, according to Dr. Richard H. Ballinger, professor in the Department of English and the college representative for the scholarship.

Ballinger said yesterday that students who are unmarried and of junior classification should contact him in 302C Academic Building before Oct. 10.

If selected, the students will enter Oxford in October, 1960. The value of a Rhodes Scholarship is 750 pounds per year—equivalent to approximately \$2100 in American money. The scholarship is for two years with the possibility of an additional year.

Only 32 Rhodes Scholarships are available to students in the United States. Those nominated to represent their college or state must also appear before a District Committee, composed of six or seven states from which four men will be chosen Rhodes Scholars. The

states are divided into eight districts.

Texas forms a district with Alabama, Mississippi, Louisiana, Oklahoma and Arkansas.

The scholarship, provided for in the will of Cecil Rhodes, famous British Empire builder, has four qualities as basis of selection. Students applying must show literary and scholastic ability and attainment; qualities of manhood, truthfulness, courage, devotion to duty, sympathy for and the protection of the weak, kindness, unselfishness and fellowship; exhibition of moral force of character and of instincts to lead and to take an interest in his fellows; and physical vigor, as shown by fondness for and success in sports.

A Rhodes Scholar may study for the Oxford B.A. in any of the Final Honour Schools or for an advanced degree.

Included in the course of study in the Final Honour Schools are Literae Humaniores, Mathematics, Physics, Chemistry, Animal Physi-

ology, Zoology, Biochemistry, Botany, Geology, Engineering Science, Science of Metals, Geography, Agriculture, Jurisprudence, Modern History, Theology, Oriental Subjects, English Language and Literature, Philosophy-Politics-and-Economics, Psychology-Philosophy-and-Physiology, Modern Languages, Foreign Language and Music.

Only two A&M men have been selected Rhodes Scholars. Charles Wright Thomas, who received his B.S. degree in Chemical Engineering here in 1922, was selected a Rhodes Scholar. However, he studied English Language and Literature and is now chairman of the Department of English at New York State Teachers College in Cortland, N. Y.

Jack Edward Brooks received his B.S. degree in Electrical Engineering here in 1946 and was also a Rhodes Scholar. Brooks studied physics at Oxford and is now a member of technical staff of the Ramo-Wooldrige Corp. in Los Angeles, Calif.

Easy On The Dogs

A&M Freshman Philip Grant took time out from his daily tours yesterday to have the blisters on his feet checked at the College Hospital. Registered Nurse Marie Caswell applies bandages to Grant's feet.
