Data Processing Center To Be Dedicated Thursday

A&M, with \$3 million worth of electronic computing equipment on hand including the giant IBM 704 computer, will dedicate its \$300,000 data processing center Thursday.

Dr. Aaron Rose, director of the Engineering Experiment Station here at A&M, which has supervision over the data processing center, works with a staff of about 30 personnel in offering 250 students courses in electronic computation and data processing.

A&M has three IBM computers—the big 704, the middle size 650, and an older, smaller model known as the 604. The 704 is 1,000 times faster than the 650, according to Dr. Rose. A&M is the fourth American college to install a 704, the others being Massachusetts Institute of Technology, University of California at Los Angeles and University of Southern California.

Dr. R. E. Patterson, A&M vice chancellor for agriculture who has taken the lead in developing the use of computers here, beginning with pioneer mechanical models in the 1930's, stated his opinion whether man can become a slave or victim of machines.

"As long as man makes them, he is going to control them," said Patterson. "The machine is a tool of man, not his master. You're not going to get anything out of the machine that you don't put in it."

This doesn't mean the men who know the machines best don't have a tremendous respect for their capabilities and their potentialities.

Patterson pointed out they have a perfect memory—that is, every

bit of information run through their electrical brain can be pigeonholed for future use. Another tremendous advantage is the speed with which they can make computations.

Those who work closely with the machines and understand them best still stand in a certain awe of them, he said.

This is admitted with occasional

wry humor. For example, the 704 computer here at A&M, installed early in December, has a little red case on top, such as is used for giving fire alarms. A sign on this gadget reads "In case of emergency, break glass." Inside is an abacus, the wire and bead device with which the ancients performed their mathematical calculations, he said.

Secretarial Meet Set for Saturday

Secretaries from over the area and state will arrive in College Station Saturday to attend a secretarial seminar at the Memorial Student Center on the A&M campus.

The seminar "Destination Success" is sponsored by the Bryan-College Station Chapter of the National Secretaries Assn. and is their second seminar.

Two events—a business machine show and a style show—are scheduled to attract widespread attention. Business machine firms will set up displays showing the latest in office equipment and local businessmen are invited to come and visit the displays. There will also be a style show presented by Lester's with models being chosen from the chapter members.

Dr. Imogene Bentley, dean of women at North Texas State College in Denton will speak on "Transcripts for Success," and Miss Helen Howard, chairman of the Department of Office Admin-

istration at Baylor University will speak on "Personal Qualities which Lead to Success." Other major addresses will be given by J. Harold Dunn, president of the Shamrock Oil Co. in Amarillo and James H. Pipkin, vice president of Texaco, Inc. in Washington, D. C. Mrs. Illien Austin, CPS, president of the Texas-Louisiana Division, NSA, from Houston will deliver the closing speech.

Dr. M. T. Harrington, chancellor of the A&M College System will welcome the group and will be introduced by Mrs. Margaret C. Coleman, president of the Bryan-College Station Chapter, NSA. Invocation will be given by the Rev. W. R. Oxley of the St. Thomas Episcopal Church. Mistress of ceremonies for this occasion will be Mrs. Mary Beth Oddy.

Registration will begin at 8 a.m., with the seminar scheduled to start at 9. The program will last until about 4 p.m.

Sportsman Trophy Constitution Revised

Committee Drops Rotation of Award

The Southwest Conference Sportsmanship Trophy will again be awarded each year to the school voted the outstanding sportsmen in the conference.

The action to change the constitution of the SWC Sportsmanship Committee to restore the old method of awarding the trophy was taken at a three-day meeting of the group last week in Dallas.

A constitutional amendment passed at a meeting of the group at a spring meeting at A&M necessitated last week's action. Last spring the committee voted to do away with selecting the trophy winner by vote and decided instead the trophy would be awarded on a rotation basis among the members schools of the conference.

No Aggies Lost In Accidents Over Holidays

Aggies for the fourth consecutive year have returned from the Christmas Holidays without suffering a traffic fatality.

Col. Frank S. Vaden, Assistant Commandant, and Bennie Zinn, Director of Student Affairs, said that they had not received any reports of student fatalities. Col. Vaden said as far as he knows all cadets were back with the exception of those who were unable to make transportation connections.

The last Christmas holiday traffic fatality occurred in 1955 when two Aggies were killed near LaGrange on their way home.

A hunting accident caused one Aggie fatality during the 1956-57 holiday period and the 1957-58 holiday period had no violent deaths.

Vandals Sought In School Break-in

Vandals who broke into the A&M Consolidated High and Junior High Schools during the recent holiday period are being sought by College Station Police.

An estimated \$200 in damages resulted from the vandalism.

Equipment was damaged in the high school science and home-making laboratories and a number of books in the junior high building. Books and other equipment in the two laboratories had been scattered all about the rooms. Apparently nothing was stolen.

Rupp's shooters were 13th a week ago. But when Georgia Tech handed Kentucky its fourth defeat the Wildcats plummeted out of the rankings.

The top 10, based on 10 points for a first-place vote, 9 for second etc., with first-place votes in parentheses:

Rank	Team	Points
1.	Cincinnati (150)	1,886
2.	California (11)	1,245
3.	West Virginia (12)	1,140
4.	Bradley	891
5.	Utah (10)	640
6.	Georgia Tech (2)	615
7.	Ohio State	574
8.	Wake Forest	278
9.	Illinois	257
10.	Southern California	245
Second ten:		
11.	Indiana	229
12.	St. Louis	202
13.	Texas A&M	152
14.	Miami, Fla.	121
15.	Detroit	104
16.	Villanova	101
17.	Utah State	84
18.	Western Kentucky	71
19.	North Carolina	70
20.	Te Iowa	66
	Toledo	66

Texas University Professor to Present Seminar in Physics Building Today at 3

Dr. Bernard B. Kinsey, professor of physics at the University of Texas, has been invited to the A&M campus to present a seminar today, sponsored by the Department of Physics and the Department of Nuclear Engineering.

Kinsey is internationally known for his contributions in the field of nuclear physics. He spent many years at the Atomic Energy Research establishment in Harwell, England, and in 1950 he moved to

West Virginia, Utah and Illinois also fell from the dwindling all-winning group.

There's one real oddity in the list of top 20 teams. Kentucky isn't in the select group. Adolph

the Atomic Energy Project at Chalk River, Ontario, Canada.

Kinsey's work on "capture gamma rays" while at Chalk River is a classic in the field of nuclear physics.

The seminar will be held in Room 320 of the Physics Building at 3 p.m. Kinsey's talk will be on a topic of current interest in nuclear physics. All interested persons are cordially invited.

With March of Dimes

Rupel Urges Help Of Health Board

The College Station Lions Club heard Dr. Walker Rupel of the Brazos County Board of Health urge their support for the 1960 March of Dimes Monday noon at the club's regular weekly meeting in the Memorial Student Center.

Following a short talk by Dr. Rupel, a film entitled "Doing Unto Others" prepared by the National Foundation of the March of Dimes.

Proceeds from the new March of Dimes drive will go for medical care in cases of birth defects, arthritis and polio.

It was the National Foundation that provided the funds, the direction, the programming and coordinating of scientific abilities—the total sponsorship—which produced the polio vaccine.

This took years of hard work, millions of dollars. It took something more—the pioneering spirit, the drive, the heart to go on in

the face of vast discouragement. It is the classic example today of the advantage of "venture capital" in medical research.

The National Foundation which directs the March of Dimes drive is the only voluntary health agency in America to have mastered the secret of a major disease.

The goal for the new 1960 March of Dimes has been set at \$10,000 to be split between the Brazos County Chapter and the National Foundation.

"The dimes you spare," said Dr. Rupel, "may spare a Brazos County child from birth defects, arthritis or polio."

Music preceding the luncheon was directed by Capt. Jim Killebrew and Mrs. A. B. Medlin was the pianist.

A. L. Flowers, president of the local club, presided at the Monday noon meeting.

Price Daniel Announces Plans To Run For Governor Again

AUSTIN (AP)—Gov. Price Daniel wants a third term and the backing of Texas voters to shove unfinished major parts of his program all the way through the Legislature.

He answered the reelection question that has kept many political hopefuls on the edge of their chairs in a statewide appeal Monday night for public support.

Daniel said he wants Texans to join him in what he called a "crusade" for better public schools and colleges, and adequate and equitable long-range state fiscal program, and water board reorganization along lines now followed by the State Highway Commission.

He suggested there may be some changes needed to correct possible "inequities" in the auto insurance law—now a raging issue.

The governor listed a dozen items of unfinished or half-finished business left hanging by the 1959 Legislature. Higher teachers pay and other school improvements is the No. 1 plank in his reelection platform.

He blamed "selfish interests, pressure groups and powerful lobbyists" plus the lawmakers' preoccupation with taxes as the reasons for the 52nd Legislature's failures. It held one regular and three special sessions.

A big remaining unanswered question is whether or not Atty. Gen. Will Wilson will run against him, or seek reelection. Wilson has not commented on Daniel's announcement or indicated when he might.

Daniel already has two opponents in prospect. They are former Rep. Jack Cox of Breckenridge and former Highway Commission Chairman Marshall Formby.

Cox predicted after the announcement that he will be in a runoff with Daniel next July.

He said he would spell out his platform by Feb. 1.

Cox is an oilman and former executive secretary of the conservative group, Freedom-in-action, which is interested in government and economic issues. He said finances and educational needs are Texas' biggest problems.

Texas, the governor warned, "must face the fact that a balanced budget and public school improvements will require some additional taxes."

Daniel said he was sure Texas could balance its budget, pay for better schools and other needed services and start a long-range fi-

nancing program without using the "last resort" general sales or state income taxes.

He promised to appoint a study group to help prepare a tax program for the next regular session.

"It will be a program designed to preserve a good climate for business and for individual human beings," the governor said.

Daniel warned that "selfish interests, pressure groups and powerful lobbyists" would try again to "stop the wheels of progress and good government." He said he chose now to continue the fight rather than turn his back on the conflict, "leaving the job undone."

Wallace Elected Delegate to World Teaching Meeting

David Marshall Wallace, 20, junior at A&M, has been elected a delegate to the World Teaching Conference to be held next July 15-Aug. 1 at Strasbourg, France.

Sponsored by the World Student Christian Federation, the conference will attract approximately 600 delegates from throughout the world. This will include about 58 American students representing all the major denominations and the YMCA and YWCA.

A preparatory conference was held Dec. 27-Jan. 2 at Athens, O., which will be related to "Life and Mission of the Church."

The Ohio and Strasbourg conferences grew out of a five-year Life and Mission study begun by the World Student Christian Federation. Present emphasis is on the "Mission of the Church in the World," while next year's emphasis will be on the "Mission of the Church in the University."

Wallace is a history major at A&M, a member of the National Student Committee of the YMCA and is son of Mr. and Mrs. J. H. Wallace of Pecos.

Among the seminars he will attend at the conference in France are "Peace in the Atomic Age" and "Christianity in the University."

Main speakers at the Strasbourg meeting will be Dr. M. Richard Shaull of Brazil; the Rev. Charles Long, Geneva, Switzerland, and the Rev. Harry Daniel, general secretary of the India Student Christian Movement.

Cadets 13th in Cage Rankings

By The Associated Press
Cincinnati rules high and mighty over the college basketball world and the Bearcats' lengthy reign appears almost certain to stretch at least another week.

One of the four major, unbeaten teams in the country, Cincinnati (10-0) was a landslide top choice today in the weekly Associated Press poll of sports writers and sportscasters around the country.

The Bearcats were named first on 150 of the 175 ballots, collecting 1,686 points. California, which took over second in an exchange of positions with third place West Virginia, had 11 first and 1,343 points. West Virginia has 12 first placers and 1,140 points. Bradley was fourth in a big promotion from their ninth of a week ago and Utah was fifth.
