

# Germany Shows Beginning Of Anti-Semitism Wave

By CARL HARTMAN  
BERLIN, (AP)—First evidences in East Germany of the current worldwide wave of anti-Semitism were reported today. Mexico and Canada's West Coast also reported their first outcroppings of the hate campaign, and the daubing of swastikas and anti-Jewish slogans continued in other countries.

"Potsdam Jewish country tradesman" was painted during the night on the foundation of the Franklin D. Roosevelt monument overlooking the harbor of Oslo, Norway.

in West Berlin newspapers. The paper BZ said Communist police found a swastika and the now-familiar words "Juden Raus".

Jews get out painted on a shop window in a workman's district of East Berlin.

Religious and government leaders kept up a chorus of condemnation.

Police officials, particularly in West Germany and West Berlin, carried on diligent investigations to determine what was behind the outbursts of hate-mongering that began with the smearing of a new synagogue in Cologne Christmas Eve.

The first reports of anti-Jewish slogans in East Germany came

will be consequences you will not be able to overlook." The West Berlin police said Tuesday steps were being taken to ban the National Youth group as well as the League of Nationalist Students.

In what possibly was a reaction to the flareup of anti-Semitism, protests were made in London against a scheduled lecture at Britain's National Film Theater by Leni Riefenstahl, once Hitler's favorite movie actress.

BZ said someone who said he represented the neo-Nazi "National Youth of Germany" had telephoned, demanding that the paper stop printing items about neo-Nazi organizations or "there

## Social Whirl

Aggie Wives Bridge Club will meet tonight at 7:30 in the Memorial Student Center to elect officers. Bridge-O will be held Jan. 20 and dues must be paid by that date.

Chaparral Sports Car Club will meet tonight at 7:30 at the Continental Coffee Shop.

## Wee Aggies

We Aggies like to read about Wee Aggies. When a wee one arrives, call VI 6-4910 and ask for the Wee Aggie Editor.

A future Corps Commander was born Dec. 31 to Mr. and Mrs. Joe M. Nolan, '61, of A-6-B College View. The 6 lb., 10 oz. son, Kenneth Ross, was born at Searsey-Fleming Hospital in Hearne.

A daughter was born Dec. 18 at 5:52 p. m. to Mr. and Mrs. W. D. Calvert. Calvert is an assistant professor in the Department of Journalism. The girl was named Karen Elaine and weighed 7 lb., 6 oz. Mr. and Mrs. Calvert live at 4309 Oaklawn in Bryan and have another daughter and a son.

## A college professor warns: College cheating an American disgrace!

Why is cheating an accepted practice in many of our colleges today? What can we do to stop this scandalous habit? In this week's Saturday Evening Post, a college professor reports:

- about the ingenious ways students cheat.
- how one college official admits "1 out of 3 students cheats rather regularly."
- why many professors know what's going on — but do nothing to stop it.

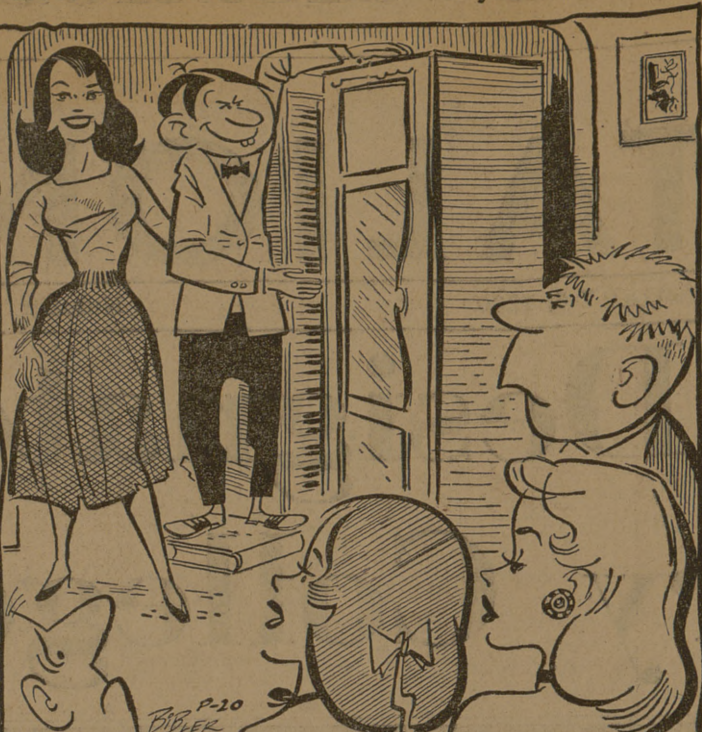

Be sure to read the explosive report on our "American Disgrace: College Cheating" — in this week's Post.

# Dr. Folweiler Named 'East Texas on Month'

Dr. Alfred D. Folweiler, director of the Texas Forest Service, a part of the A&M System, is one of the most respected and best qualified men connected with forestry in the United States today.

Folweiler, called "Doc" by his friends, has been named Man of the Month for January by "East Texas Magazine." And it was a good choice, too, for there are few people in the forestry industry in Texas or Louisiana who do not know and respect him. Folweiler is always ready to give direction to any matters pertaining to the development of our forest resources—a continuing asset which is engaging the attention of more East Texans than in any previous period in Texas history.

position with New Jersey's Forestry Division of its Department of Conservation and Development. While there, Folweiler did some original research on relating forest fire occurrence to weather by using weather data collected by the Aerological Laboratory of the Naval Air Station at Lakehurst, N. J. The results were applied with marked success by the state's Forest Fire Service.

The South looked like the region with a future for a young forester, so Folweiler wangled a temporary job with the Appalachian Forest Experiment Station of the U. S. Forest Service in 1928 and later became a district forester for the North Carolina Forest Service. In 1934 Folweiler joined the fac-

ulty of the Department of Forestry at Louisiana State University. During World War II, Folweiler took leave for military duty as a commissioned officer in the Corps of Engineers and was attached to General Patton's Third Army.

In 1949 Folweiler was named director of the Texas Forest Service. Authority and responsibility were decentralized into four departments and six administrative districts. In 1953 research in tree improvement was begun, the first of this type work in the Deep South, with the financial assistance of lumber and paper companies.

Dr. and Mrs. Folweiler have two children—Robert, a graduate metallurgist doing research for General Electric, and Mrs. Janet Routt.

# Just Recognition

If ever a group of men received just recognition, the men of the Corps of Cadets did with the designation of Texas A&M as one of the nation's seven military colleges.

This year the Men of Aggieland can be even more proud of their designation than the rating last year.

Improvements were just being instituted in the Corps of Cadets last year that have now been accepted as standard procedure. Other changes have been accomplished this year that have done even more to make the Texas A&M Corps of Cadets deserving of special recognition as one of the finest and we think THE finest—college military organization in the world.

The money that goes along with the military college designation is a side benefit that is important to the Men of Aggieland, but is completely overshadowed by the honor of the recognition of the award.

Although many advances have been made and other improvements are in the process of being made, members of the Corps of Cadets must be on their guard in order to continue to deserve their military college rating.

The men of the Corps of Cadets must remain on their guard and continue to improve the Corps as it has been improved in the past, Texas A&M's claim to its designation as a military college will never be challenged.

If the men of the Corps of Cadets fail to guard against developing a false sense of security, next year at this time the list of military colleges will be reduced by one.

The same men who earned the military rating for Texas A&M can also lose it, if they so choose.

They have shown they have what it takes to be tops—we feel they will continue to prove Texas A&M has the finest college military organization in the United States.

# Center of Progress

When the dedication ceremonies for the new \$3,250,000 Data Processing Center are held here tomorrow, Texas A&M will officially take another major step in the direction of progress.

Ours is a rapidly growing scientific and technical age and the establishment of the Data Processing Center proves that Texas A&M is keeping abreast of the times and is interested in the welfare and future of our age.

The new center is of vital importance mainly because it will not only be used by Texas A&M, but by all other Southern colleges, universities and science research groups and by Southern industry. The outstanding feature of the center is the gigantic IBM-704 electronic computer, one of four found on college campuses in the United States. It is an honor that Texas A&M is one of these colleges.

Assistance in the field of scientific research will be the principal service of the center. The services will be available, without cost, for non-sponsored research by institutions of higher learnings. Standard fees will be charged for sponsored research.

Following the Data Processing Center and currently in the process of being constructed is the Texas A&M's Nuclear Science Center—being established under the plan approved by the executive committee of the A&M System Board of Directors.

Scheduled to be in operation early in 1961, the Nuclear Science Center is designed for research in chemistry, physics, biology, agricultural, engineering and medicine and is expected to be the most versatile unit of its type in the country. Other colleges and universities across the Southwest and Southern industry will also use the services of the nuclear center.

The Nuclear Science Center and the Data Processing Center will establish Texas A&M as a leader in science and technology—probably the most important fields in the world's future.

## Letters To The Editor

The Battalion welcomes letters to the editor but reserves the right to edit letters for brevity, clarity and accuracy. Short letters stand a better chance for publication since space is at a premium. Unsigned letters will not be published.

Editor, The Battalion

As sophomores at A&M, we have had a chance to observe the general attitudes which prevail on this campus.

It has often been observed by us that individuals who are normally faithful in their attendance to church at their home, fail to attend any religious institutions regularly—if any—while residing on this campus.

It must be admitted that College Station is blessed with a number of religious organizations who are zealous in their attempts to promote student attendance to their various functions. We are not blaming them, but rather are suggesting that

something in the line of a Corps Church Service be initiated.

We suggest that individual units should march to a central location—say G. Rollie White Coliseum—every Sunday morning and hear a service which does not stress denomination, but rather is aimed at strengthening individual faith.

We do not think these formations should be compulsory (others might wish to attend one of the fine churches in this vicinity), but we do think that they should be emphasized by the individual unit commanders.

We hope some action will be taken on these suggestions.

Mike Schneider, '62  
Mike Groves, '62  
Chuck Neely, '62

# THE BATTALION

Opinions expressed in The Battalion are those of the student writers only. The Battalion is a non-tax-supported, non-profit, self-supporting educational enterprise edited and operated by students as a community newspaper and is under the supervision of the director of Student Publications at Texas A&M College.

Members of the Student Publications Board are L. A. Ducewall, director of Student Publications, chairman; Dr. A. L. Bennett, School of Arts and Sciences; Dr. K. J. Koenig, School of Engineering; Otto E. Kunze, School of Agriculture; and Dr. E. D. McMurry, School of Veterinary Medicine.

Entered as second-class matter at the Post Office in College Station, Texas, under the Act of Congress of March 3, 1879.

Mail subscriptions are \$2.50 per semester, \$6 per school year, \$6.50 per full year. Advertising rate furnished on request. Address: The Battalion, Room 4, YMCA, College Station, Texas.

News contributions may be made by telephoning VI 6-6618 or VI 6-4910 or at the editorial office, Room 4, YMCA. For advertising or delivery call VI 6-6415.
