Tax Requirements Announced for '59

Requirements for filing Federal income tax returns for 1959 were announced here today by Clarence E. Carlson, administrative officer of Internal Revenue at Bryan.

To sum it up—most people with \$600 or more of gross income for 1959 must file a return with Uncle Sam. Every citizen or resident of the U. S. A.—whether adult or minor—who had \$600 or more gross income in 1959 must file; if 65 or over, \$1,200 or more. However, if they are self-employed, they file a return if their self-employment income was \$400 or more, even though their gross income was less than \$600.

The Revenue representative added these potent points: A person with income of less than these amounts should file a '59 return to get a refund if tax was withheld. . . . A married person with income less than her (his) own personal exemptions should file a joint return with husband or wife to get the smaller tax or larger refund for the couple. . . . In determining income in a community property State, such as Texas, the total combined income of husband and wife is considered one half attributed to each. Members of Armed Forces should give name, service serial number, and permanent home address.

Taxpayers are urged to file their returns for '59 with the IRS District Director as soon after Jan. 1, as possible. Although the filing deadline is April 15, folks who wait until the last minute find it more difficult to get technical help the nearer the final day approaches.

Also, last minute filers make more costly errors in their returns. Checks or money orders for any tax due should be clipped, not

stapled, to the return and should be made payable to the "Internal Revenue Service."

Tax payers having questions about their tax returns can save time by phoning or visiting the Internal Revenue office in Bryan.

Officers To Inspect Dorms Sat

An inspection of Corps dormitories will be made this Saturday morning by cadet officers on the various staffs, Col. Frank S. Vaden, assistant commandant, said Tuesday.

The inspection will be held between 7 and 8 a. m.

Col Vaden said the inspection may become a regular part of Saturday morning Corps of Cadets activities as it was last year, but added nothing has been decided yet.

"We want to see how it will work. We know cadet officers can do a capable job and also feel that as they will soon be commissioned officers, the experience in inspecting will aid them," said Col. Vaden.

Cadets will be at their desks studying during the hour-long inspection except when the inspection party enters the room at which time they will come to attention until the inspecting cadet officer leaves, said Col. Vaden.

Tactical officers will also make spot inspections in the various dorms, Col. Vaden said.

Happy Birthday

The City of San Juan located in the heart of the Rio Grande Valley of Texas celebrated its 50th anniversary in a very unique way. The merchants set baskets of fruit in front of their stores and combined their two major industries—citrus and tourists—by inviting their winter visitors to take home some fruit "on the house." Here Robert L. Kirkland, of Emporium, Pa., happily accepts some "liquid sunshine" from Miss Linda Koester of San Juan; one of the Valley's beautiful Citriann hostesses. (AP Photo)

Fertilizer, Irrigation Discussion Given at Conference by Fisher

One of the most vital methods of boosting cotton lint yields to the optimum per acre is to maintain a proper balance of fertilizer and irrigation water.

F. L. Fisher, associate professor in the Department of Agronomy here and a speaker at the annual Texas Fertilizer and Limestone Conference Jan. 5-6 at the college, said recent irrigation experiments in the Brazos River bottoms show this recommendation to be true.

He said a medium rate of fertility, or about 80 pounds of nitrogen per acre, plus a high amount of moisture, resulted in the best lint yields consistent with economy. The yield was 862 pounds per acre, obtained by adding 6 inches of irrigation water in addition to available rainfall.

Fisher said any fertilizing and irrigation program must be accompanied by good management, which should include strict insect control.

The conference marked the first time for the Texas Plant Food Educational Society and Texas Agricultural Limestone Association to hold their yearly meetings together. Both organizations sponsored the affair in co-operation with A&M's Department of Agronomy and the state chemist of the Texas Agricultural Experiment Station.

Discussion emphasis was placed on fertilizer education and fertilization of irrigated crops.

C. A. Bursleson of the Weslaco Experiment Station said there is a deficiency of minor elements showing up in Rio Grande Valley vegetable and field crops. Field corn, sweet corn, cotton, tomatoes, potatoes and squash are the crops

which show the most response to such minor elements as zinc and manganese.

Wheat and grain sorghum, grown on tight soils, showed the most significant response to additions of nitrogen fertilizer, according to Alex Pope of the Southwestern Great Plains Field Station near Bushland. Course of nitrogen was not important.

He said that on sandy soils, optimum wheat and sorghum growth was obtained through a combination of nitrogen and phosphata.

March of Dimes Aid Urged By Rupel at Kiwanis Meet

Dr. Walker Rupel of the Brazos County Board of Health spoke to the College Station Kiwanis Club at their meeting Tuesday at noon, urging their support for the 1960 March of Dimes.

The goal for the new March of Dimes has been set at \$10,000 to be split between the Brazos County Chapter and the National Foundation.

"There are three ways in which the people of College Station can help in this effort," Dr. Rupel told the Kiwanians. "By their monetary support, by spreading the news of the 1960 March of Dimes, and by encouraging those who have not yet been vaccinated to do so as soon as possible."

Proceeds from the new March of Dimes drive will go for medical care in cases of birth defects, arthritis and polio.

It was the National Foundation that provided the funds, the direction, the programming and coordination of scientific abilities—the total sponsorship—which produced the polio vaccine.

The National Foundation which directs the March of Dimes drive is the only voluntary health agency in America to have mastered the secret of a major disease.

Following Dr. Rupel's talk, a film entitled "Doing Unto Others" prepared by the National Foundation of the March of Dimes was shown.

Tony Sorenson directed the singing which preceded the luncheon. Murray Brown was the pianist. The invocation was given by Otis "Judge" Miller.

Segrest Goes To Meeting In Cincinnati

Herman B. Segrest, professor in the Department of Health and Physical Education, was a recent program participant at the 63rd annual meeting of the College Physical Education Assn. held Dec. 27-30 at the Sheraton-Gibson in Cincinnati, Ohio.

Segrest gave the report from the membership committee.

The annual meeting, which was attended by nearly 400 physical educators from universities and colleges in the United States and Canada, included teacher education, inter-collegiate athletics, intramurals, research, basic instruction and foreign relations in the field of physical education.

The CPEA has furnished much of the leadership in developing curricula, sports programs, athletics and research in physical education.

tion to the college and their organization by again retaining the military college rating. This has been accomplished by the maintaining of a high state of discipline, training and required standards by cadet officers and individual members of the Corps of Cadets. It is with pride that I congratulate them on this accomplishment," Col. Joe E. Davis, commandant of the Corps, said.

\$231,746,000 Spent for Chemicals

At least \$231,746,000 was spent by Texas firms for selected chemicals and allied products in 1958. About 138,295,000 of this amount represents purchases from other states.

These figures were established by James R. Bradley of the Industrial Economics Research Division of the Texas Engineering Experiment Station (a part of the A&M College System) in a state-wide survey. His survey findings show that Texas presently provides chemicals and allied products for only 40.3 per cent of its needs and out-of-state suppliers make available the other 59.7 per cent required.

The out-of-state purchases by major categories were as follows: Industrial inorganic chemicals, \$70,455,000; industrial organic chemicals, \$22,930,000; pharmaceutical preparations, \$23,417,000; soap and glycerin, \$573,000; cleaning and polishing preparations, \$2,576,000; sulfonated oils and assistants, \$48,000; paints and varnishes, \$781,000; inorganic color pigments, \$2,549,000; whitening and fillers, \$511,000; hardwood distillation products, \$258,000; softwood

distillation products, \$2,209,000; fertilizers, \$11,768,000; printing inks, \$2,000; and essential oils, \$218,000.

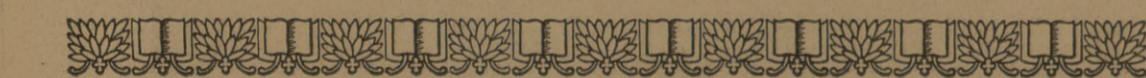

The survey was conducted in the interest of industrial development to reveal an awaiting market for Texas enterprise.

The complete findings of the survey are contained in Research Report No. 66 "Out-of-State Purchases and Total Purchases of Chemicals and Allied Products by Texas Organizations, 1958" which is available from the Texas Engineering Experiment Station.

PAUSE AT FORT'S SITE:

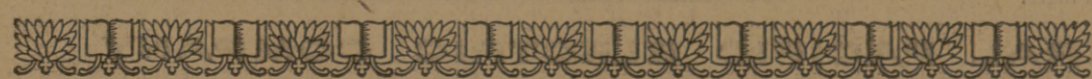

CHICAGO (AP) — Old Ft. Dearborn, founded in 1803, exists no more, but thousands of motorists each year are forced to halt at the location.

The site of the fort now is the south approach to the busy double-decked Michigan Ave. bridge over the Chicago River. Motorists pause at the fort site every time the huge bridge opens for Great Lakes cargo ships.

The LITTON Study-Work Advanced Degree Program for Engineers, Scientists, Mathematicians

The Litton Study-Work Program towards an advanced degree assists the student who might not otherwise be able to finance graduate education. While gaining experience in our research and development laboratories you are normally able to earn your master's degree in four semesters. You may qualify if you are a candidate for a BS degree in electronics-oriented engineering, science or mathematics. For full information see your college placement office or write to Mr. Joseph Cryden, Director of Advanced Scientific Education **LITTON INDUSTRIES** Electronic Equipments Division, Woodland Hills, Los Angeles, California.

LUCKY STRIKE presents

Dear Dr. Frood:

BAFFLING BLOT FAILS TO FAZE FROOD!
(see below)

Dear Dr. Frood: Every night for the past two weeks I've dreamt that I am being pursued by a beautiful girl in a Bikini who wants one of my Luckies. Just as she catches me, I wake up. How can I prevent this? *Puzzled*

Dear Puzzled: Go to bed a few minutes earlier.

Dear Dr. Frood: I am the ugliest guy on campus. My face looks like 90 miles of bad road. When I go to a party someone always steals my date. I worry about this. Can you help me? *Loveless*

Dear Loveless: Take heart. Any girl who would go out with you isn't worth worrying about.

Dear Dr. Frood: I think this ink blot looks just like rabbit ears. My friends say I'm nuts. What think? *Bugs*

Dear Bugs: It's your friends who are nuts. Those are clearly rabbit ears. And the long shape extending down is the rabbit's trunk.

Dear Dr. Frood: I have invited three girls to the dance this Saturday. How do I get out of this mess? *Uptha Creek*

Dear Mr. Creek: Tell two of them to dance with each other until you cut in.

Dear Dr. Frood: I have been dating one girl but I am so good-looking and so popular that I have decided to spread myself around a little more. What should I do about this girl? *Dashing*

Dear Dashing: Tell her the good news.

Dear Dr. Frood: My roommate always wears my clothes. What should I do? *Put Upon*

Dear Put Upon: Cover yourself and stay indoors.

Dr. Frood, Ph.T.T.

Dear Dr. Frood: My mother and my brother don't like my boy friend, but my father and my sister do. His father and two brothers don't like me, but his mother and his other brother do. What should I do? *Miss Muddle*

Dear Miss Muddle: Tell your father to talk to your mother and tell your sister to talk to your brother. Then tell your boy friend's mother to talk to his father and tell his brother to talk to his brothers. If that doesn't work, then talk to your mother and brother yourself. Maybe they know something you don't know.

COLLEGE STUDENTS SMOKE MORE LUCKIES THAN ANY OTHER REGULAR!

When it comes to choosing their regular smoke, college students head right for fine tobacco. Result: Lucky Strike tops every other regular sold. Lucky's taste beats all the rest because L.S./M.F.T.—Lucky Strike means fine tobacco.

TOBACCO AND TASTE TOO FINE TO FILTER!

Product of The American Tobacco Company—Tobacco is our middle name!
