

NSA Sets Training Course

Off the Board

The roundball bounces off the backboard in Tuesday's game with SMU when the Ags suffered their first defeat of the season. Trying to get their hands on the ball is Carter Creech of SMU (23) and Don Stanley of the Aggies (44).

On Laboratory Studies

Oak Ridge's Dr. P. R. Bell To Speak in Physics Building

Dr. P. R. Bell, a member of the 1959-60 team of traveling lecturers sponsored by the University Relations Division of the Oak Ridge Institute of Nuclear Physics, will speak on "Thermonuclear Studies at Oak Ridge" in the Physics Building, Room 320, at 4 p.m. tomorrow.

Bell is a well known authority in the field of nuclear instrumentation and is presently co-director of the Thermonuclear Experimental Division of the Oak Ridge National Laboratory where he is making outstanding contributions to knowledge of thermonuclear reactions. He was appointed to this position in 1957.

Born at Fort Wayne, Ind., in 1913, Bell received the B.S. degree from Howard College in 1936, and in 1954 he was awarded an honorary doctor of science degree from this college. He was with the

Cyclotron Group at the University of Chicago from 1938-1941, and he served as a staff member of the National Defense Research Project in Chicago in 1940 and 1941.

Radar Developer

During World War II, Bell was engaged in radar development at the MIT Radiation Laboratory, and in 1946 he joined the Scintillation Counter Group in the Physics Division of the Oak Ridge National Laboratory.

Since then, he has made an outstanding contribution in the field of scintillation gamma ray spectrometry, and has also published many articles on gamma ray energies and decay schemes of vari-

ous nuclides.

IRE Member

The well known work of Bell and Jordan on linear amplifiers, pulse height analyzers, and other nuclear electronic devices, indicate Bell's stature in the field of instrumentation. He is also a member of the American Physical Society and of the Institute of Radio Engineers.

Bell will arrive on the campus about noon Friday and those who wish to visit with him should do so before his lecture at 4 p.m. For further information, contact Dr. D. F. Weekes of Professor F. C. Whitmore of the Department of Physics.

The Bryan-College Station Chapter of the National Secretaries Assn. has mailed 661 letters to local secretaries announcing a "Professional Development Course."

It is stressed that a person does not have to be a member of NSA to register for the course.

Beginning Feb. 4 and ending April 21, this twelve week course will cover four phases of work. There will be two sessions on Personal Adjustment and Human Relations to be taught by Lloyd H. Taylor; three sessions on Business Law will be taught by John L. Sandstedt; three sessions on Business Administration will also be taught by Lloyd Taylor and four sessions on Secretarial Accounting will be taught by T. D. Letbetter. These three professors are members of the Division of Business Administration at A&M.

Classes Held in Francis Hall

Classes will be held in the Business Administration Building on the A&M campus Thursday evenings from 7-10 p.m. with a Coke break midway in the evening.

There is a registration fee of \$15 for the 12-week course and registrations will be limited to 30 people so full benefit may be derived from the course.

The \$15 will include all materials used during the course. At present 15 people have registered and interested secretaries are urged to contact Margaret Coleman, president, as soon as possible in order to get in on the classes.

Well-Qualified Profs

Mrs. Colman said, "We indeed feel fortunate in having the services of the Business Administration professors for this course."

Letbetter, CPA, has been employed at A&M since September 1948. He is an associate professor of accounting. Sandstedt has

spent most of his life in Bryan. He received his B.A. degree from Texas University in 1942 and his L.L.B. from TU in 1947. He has taught business law at A&M since 1954 and has actively practiced law here since 1947. Lloyd Taylor

just recently joined the business administration staff here. He received his B.B.A. and M.A. degrees from Baylor University. He was an instructor of management at Lamar State College in Beaumont and was assistant dean of men.

While at Lamar, Taylor taught a course similar to the one now being offered.

Mrs. Coleman adds, "We sincerely hope interest in the course is great so that future courses may be planned."

AGGIES

We Will Give Ten Silver Dollars If Anyone Can Give Ole Army LOU A Better Suggestion On How To Serve The Aggies Better — In A Business Like Way — Than We Are Now Trying To Do. It Is Easier To Buy Books In February Than It Is To Sell Books And There Always Is A Chance On Books That Go Out Of Date Before September. Therefore We Can Give More On Trade-In Books Than We Can Buying Them Out Right. We Find Aggies Like To Trade Books.

We Rent Books From 95c to \$1.95 And Some Cases Higher.

No Kind Of Trade Is Good Unless Both Of Us Are Satisfied And No Other Way Will We Trade. This Doesn't Apply To Books That Go Out Of Date Before September.

This Kind Of Trade-In Has Made LOU'S Reputation The Craziest In The College Book Stores.

...the tobacco that outsells all other imported tobaccos combined! Try it and your very first puff will tell you why. There's more pleasure in smooth-smoking, even-burning, long-lasting, mild AMPHORA.

Popular priced, and more for your money, too — full 2 ounces in every pack! Blended in Holland. In handy pouches and tins. Come in and try it today!
