Ashworth Makes Mite Discovery

Dr. Lee J. Ashworth of the Department of Plant Physiology and Pathology has found the mite that transmits the wheat streak virus from wild grasses to wheat in Hansford county.

The mite also transmits the virus from diseased wheat to healthy plants, he said.

Ashworth's studies indicate that the discovery may be a valuable find, as wild grasses are more prevalent in Texas during the summer months than in volunteer wheat.

In states north of Texas in the wheat belt, volunteer wheat is largely responsible for spread of the wheat streak virus.

Some Schools Closed

Infuenza Rises Across Texas

By The Associated Press Several Texas cities are reporting an increase in the number of cases of mild influenza and related illnesses Thursday with several schools closing in the Houston area.

Austin, El Paso, Victoria, Temple and San Angelo were other points reporting a sharp rise in the number of flu cases. Classes

Dairy Meeting On Efficiency Slated Monday

The annual Dairy Manufacturers' Conference, which this year stresses plant efficiency, will be held Monday and Tuesday at the Memorial Student Center.

Dr. A. V. Moore, professor in the Department of Dairy Science and program chairman, said the conference is held primarily for the benefit of those interested in procurement of raw dairy materials, the processing, distribution and handling of dairy products and the engineering phases of plant operations.

Following a welcome by Dr. G. M. Watkins, dean of the School of Agriculture, the first talk Monday will be made by Dr. W. C. Vanderzant of the Department of Dairy Science. He will discuss "The Growing Importance of Solids-Non-Fat."

Next on the program is a series of group discussions on milk plant problems, frozen desserts, cheese and cultures and personnel training. Discussion leaders are J. E. Edmondson of the University of Missouri; W. J. Caulfield, Iowa State College; Eugene Jadd, head of the dairy service department of Paul Lewis Laboratories at Milwaukee, Wis.; R. F. Matthews, Texas Engineering Extension Service; and Dr. Moore, Dr. Vanderzant and Dr. I. I. Peters of the Department of Dairy Science.

Additional first day activities will include a talk, "Processing Plant Automation," by H. S. Christiansen, assistant chief engineer of Carnation Company at Los Angeles, Calif. and tours of A&M dairy science facilities.

Monday evening, G. M. Clarke of Austin, executive vice president of the Dairy Products Institute of Texas, will make an address, "The Challenge of the Sixties."

was suspended at St. Cecilia Catholic School in Spring Branch and at the Zion Lutheran School in Pasadena. Both are near Houston.

Officials of the Lutheran school said 50 of the 150 pupils had pneumonia and at the Catholic school 11 teachers and 40 of the 400 pupils were reported ill.

El Paso officials blamed a virus or combination of viruses akin to Asian flu for widespread illness among public school students and business firm employees. School authorities listed 6,729 absent, or 14.4 per cent of the total enrollment.

Victoria's County health officer, Dr. Roy Reed, estimated more than 200 new cases of flu and other upper respiratory ailments would be treated this week. Victoria physicians last Friday listed 183 cases of flu and companion illness—an increase of 156 from a week earlier.

Temple's public schools counted 499 of 6,019 students absent Wednesday. They said this was about double to usual 4 per cent rate.

At Austin the city health officer, Dr. B. M. Primer, said a sampling of physicians' reports showed 700 cases of flu or pneumonia in the state capital last week. This compared with about 175 a week in December and about 200 a week earlier this month.

At San Angelo flu and nasty weather got the blame for about double the usual number of school absentees. Hospitals reported an abnormal incidence of influenza.

OLE ARMY

The Semester Is Far From Over, Even Though Time Is Short. Those "D" Quizzes And Finals Can Make Or Brake You, In Most Cases Help You. In Some Courses 40% Of The Grade Is Yet To Be Made. Check With Your Profs And If You Still Need Help We Have Approved Tutors In History, Chemistry And Math At No Cost To You—Only Thing Lou Asks Of You Is To Be Interested And Want To Study—There Is No Easy Way Out.

WE STILL HAVE A FEW CHAPTERS 9 & 10 LEFT AND NOW CHAPTERS 13 & 14 ARE AVAILABLE IN CHEMISTRY.

You Aqs Check With Your Scholastic Officers And Faculty Advisers For Details.
