

Narcotics Traffic Worries Senate Delinquency Probers

WASHINGTON, (AP)—Senators investigating juvenile delinquency are concerned with the increasing narcotics traffic across the Mexican border, especially into Texas and California.

El Paso County Judge Woodrow Bean gave, in a letter, this description of the situation in his area.

"It is just as easy for a juvenile to purchase heroin, marijuana, liquor or pornography in Juarez (Mexico) as it is for a 10-year old child to buy a soft drink in any city in the United States."

"For your information, those good citizens who live in Juarez

and who constitute the vast majority are just as anxious for the present free flow of narcotics to be stopped as we are here in the United States."

Crime Link Studied

To the extent that narcotics are involved in juvenile delinquency a Senate Judiciary subcommittee is taking up studies carried on by Texas Gov. Price Daniel when he, while a senator headed a special Judiciary narcotics control subcommittee a few years ago. The current juvenile delinquency subcommittee has called as the opening witness in its latest series of hearings (Jan. 22-26) another Texas—Treasury Secretary Robert B. Anderson.

Problems to Solve

While the invitation to testify was addressed to Anderson, the details of the problem are to be threshed out with two men under him—Narcotics Bureau Director Harry Anslinger and Customs Bureau Director Ralph Kelly.

The senators want to know what can be done to more effectively curtail the flow of dope into the United States from Mexico, and how more cooperation to that end may be promoted between local, state and federal officials.

Hearings To Be Concluded

Later after hearing State Department witnesses, the subcommittee expects to conclude the current hearings. But it may reopen them later and invite witnesses from Mexican border areas to testify. Judge Bean likely would be among those called.

In his letter to the Senate committee, Bean said the State Department is taking a kid gloves attitude toward the problem for fear of offending the Mexican government.

EXAM SCHEDULE

Date	Hour	Series
Jan. 23. Saturday	1-4 p. m.	Classes meeting TWF3 or TThF3 or TF3
Jan. 25. Monday	8-11 a. m.	Classes meeting MWFS

Jan. 29. Friday	1-4 p. m.	Classes meeting M4TTh11
Jan. 30. Saturday	8-11 a. m.	Classes meeting TTh9F2
Jan. 30. Saturday	1-4 p. m.	Classes meeting TF2 or TF2-3:15

New Rocket Boasts Gold Fourth Stage

DALLAS, Tex. (AP)—The national budget may make rockets appear constructed of pure gold—and, sure enough, at least one boasts a gold-plated fourth stage.

Chance Vought Aircraft of Dallas, which assembles the Scout rocket for the National Aeronautics and Space Administration, uses more than 100 square feet of gold plating in the rocket's skin.

The company says gold is gaining favor in space vehicles for many reasons, including its high heat reflectivity, relatively high melting point and resistance to corrosion.

The fourth stage of the Scout has its inner skin gold plated to protect the scientific instruments from extreme heat caused by friction with the atmosphere.

The plating is only .00001th of an inch thick and costs 60 cents a square foot to apply.

Because the parts of the stage are so large, the modern methods of plating by electrolysis and vapor deposits are not practical.

So the technicians and scientists reverted to a method centuries old. A form of gold dissolved in pine

oil is sprayed on the part to be coated. This then is baked twice in ovens and the coating turns to pure gold.

Gold also has another possible value for military aircraft, which radiate considerable infrared rays. Some anti-aircraft missiles are based on the missile's ability to zero in on anything emitting infrared rays.

Company scientists say that by preventing structural heating through use of gold coating on the internal hull of the plane, heat radiated from the engine through the plane's fuselage can be reduced substantially.

The firm has used gold coatings on certain copper electrical wiring assemblies to lengthen their storage life.

Green Algae Sweets Taste Like Cookies

SEATTLE, Wash. (AP)—A 14-year-old girl popped a batch of sugar cookies into the oven and came up with, guess what? Sugar cookies for space men.

Don't give Vicki Pilgrim too much credit, though. She used her father's recipe.

Vicki's father, Dr. Arthur J. Pilgrim, is head of the biochemistry unit of the Boeing Airplane Co.

Green algae, a kind of seaweed, long has been considered a likely source of food and oxygen for space travelers. One drawback: The stuff looks like scum and tastes like hay.

Boeing scientists tried blanching some under fluorescent lights. It came out looking sort of like flour.

Encouraged, Pilgrim asked Vicki to do the baking bit. She used algae in place of flour—green algae in one batch, white algae in another.

Then, like Alice in Wonderland, she took a bite of each.

The green algae cookies tasted like baked hay.

And the white algae cookies? They tasted like cookies.

"This represents considerable progress," said Dr. Pilgrim, "in providing a possible food for space travel. With all of the myriad other problems facing a space traveler, it will be important to make his meals as palatable as possible."

Revenue Service To Help Nationals

Robert L. Melcher, foreign student adviser, announced today that a man from the Internal Revenue Service will be in his office, 27 Milner, on Feb. 10-11 from 2-5 p. m. to help all foreign nationals fill out their 1959 Income Tax Returns.

Churches Schedule Weekend Services

A&M METHODIST CHURCH
Church School will be held at 9:45 a. m. Morning worship service is at 10:55 a. m., with a sermon topic of "How You Believe Is Important." Sermon topic for the evening worship at 7 p. m. will be "Alibis and Accusations."

CHURCH OF CHRIST
Bible School is at 9:45 a. m., to be followed by a worship service at 10:45. Sermon topic for service will be "Zeal With Knowledge Pleases God." Young People's classes meet at 6:15 p. m. and Aggie Class meets at 6:30 p. m. Sermon topic for the evening service at 7:15 p. m. will be "I Will Follow Jesus."

Ladies' Bible Class meets Tuesday at 9:30 a. m. Prayer Meeting will be held Wednesday at 7:15 p. m.

A&M PRESBYTERIAN CHURCH
Sunday School is at 9:45 a. m. Morning worship service is at 11 a. m. Sermon topic will be "An Inescapable Point of Reference." The service will also feature special music by the choir, entitled "Brother James' Air." League will meet at 5 p. m.

Senior Choir rehearsal will be held Wednesday at 7 p. m.

ST. THOMAS' CHAPEL
Holy Communion will be at 8 a. m. and Church School is at 9:45

a. m. Morning prayer and sermon is at 9:15 and 11 a. m. YPSL meets at 6 p. m.

Prayer Group meets Tuesday at 8 p. m. Holy Communion will be held Wednesday at 6:30 a. m., followed by a breakfast. Evening Prayer and Canterbury meeting are at 7:10 p. m. Vestry meets at 7:30 p. m., followed by Parish Council meeting and Senior Choir practice, both at 8 p. m. Junior Choir practice will be held Friday at 3:45 p. m.

BETHEL LUTHERAN CHURCH
Sermon topic for the morning services at 8:15 a. m. and 10:45 a. m. will be "Lesson From the Monotony of Life." Sunday School and Bible classes meet at 9:30 a. m.

A vesper service will be held Wednesday at 7:45 p. m., with a sermon topic of "Woe to Him Who Tempteth Us."

Do You Think for Yourself?

(BUZZ THIS QUIZ AND SEE WHERE YOU LAND!*)

"A little learning is a dangerous thing" means (A) it's better to leave your mind alone; (B) people who act on half-knowledge often make mistakes; (C) beware of sophomores.

A B C

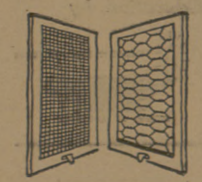

"Never look a gift horse in the mouth" is good advice because (A) he'll bite; (B) even if his teeth show he's old, what can you do about it? (C) there's nothing in there anyway.

A B C

Assuming the starting salary is the same, would you rather have (A) a job with an assured income for life, but with no chance to increase it? (B) a job where you'll always be paid according to your abilities? (C) a job where you have to advance rapidly or be fired?

A B C

"The finer the filter strands, the finer the filter action" is a way of saying (A) don't use chicken wire in a window screen; (B) Viceroy gives you finest filter action because it has the finest filter strands; (C) the finer the filters, the finer the smoking.

A B C

When you depend on judgment, not chance, in your choice of cigarettes, you're apt to be a Viceroy smoker. You

Familiar pack or crush-proof box.
