FBI Man Assumes Yale University Relations Position

NEW HAVEN, Conn. (AP)—An FBI agent will take over the tough job of managing Yale University's often strained relations with the city of New Haven.

John W. Powell will end a 17-year career with the Federal Bureau of Investigation to become security director and associate dean of students.

"It's a new concept of law enforcement as far as university police departments go," Powell said today. "To my knowledge, it will be one of the first times a university police chief will have faculty status. It deals not only with the campus police, but with the students, faculty, and the community, too."

Yale's 64-man campus police force, the school's representative in town-and-gown relations, and—he hopes—a friend of the students.

He says the biggest job will probably be maintaining good relations between the university and the city. Yale, which has about 4,000 energetic undergraduates, is built right in the center of New Haven, a city of 169,000.

Tension Is Strong

Tension between the school and the town is often strong. It was strong just a month ago, when the widely publicized "sex in the dormitory" case came to light. That case led to Powell's appointment Monday.

Twenty students were charged with lascivious carriage, a general charge, after it was alleged they had indulged in sexual play with a 14-year-old girl in a dormitory.

The campus police investigated the case for several days before the New Haven police knew about it. When the case was publicized, it was reported that Yale's handling of the matter had caused friction between the university and the city.

The campus police chief was reassigned to another job. Powell, as security director, will take over the campus police chief's job. The 20 students arrested in the sex case paid \$25 to \$50 fines after they pleaded no contest in city court Jan. 27.

SUMMER JOBS

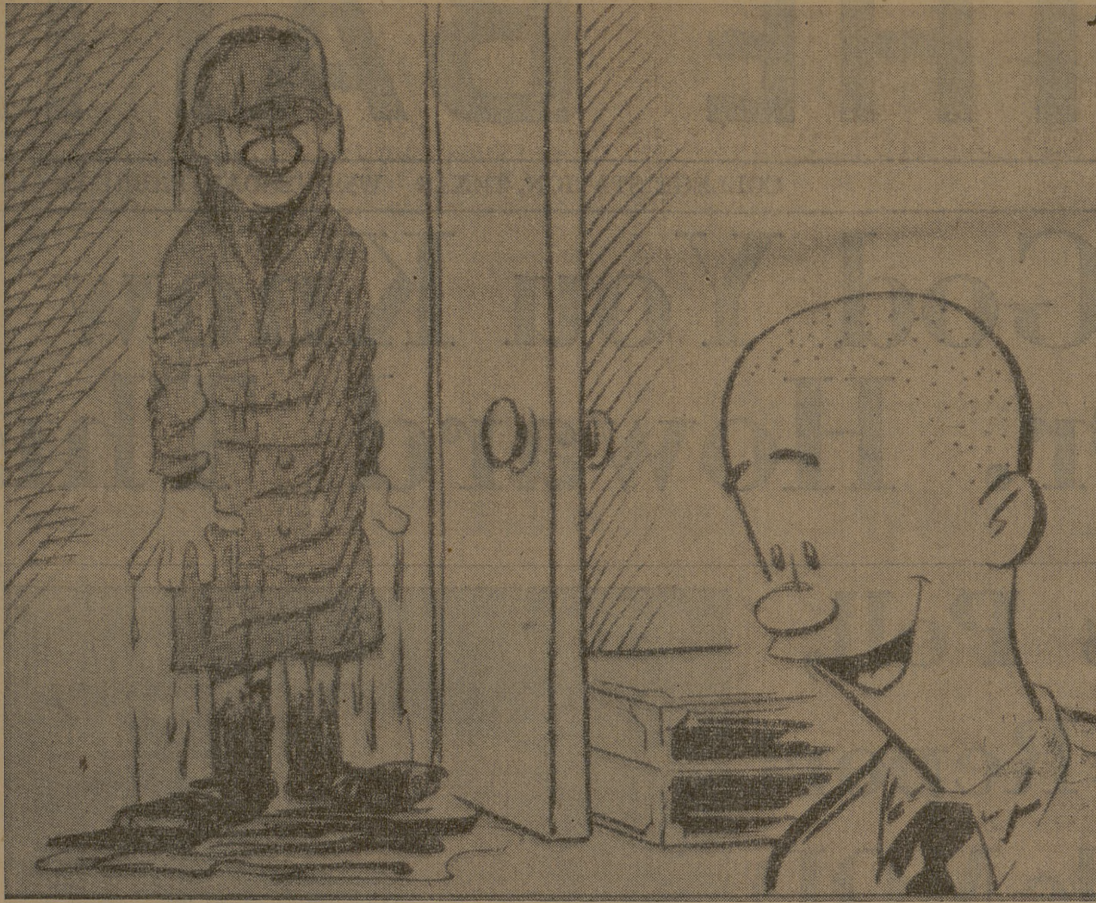

The following companies will interview students for summer jobs tomorrow in the Placement Office on the second floor of the YMCA Building:

Texaco Inc. will interview chemical, civil, industrial and mechanical engineering students for temporary position in refinery process operations and manufacturing assignments. All applicants must have completed their junior year by June.

The Dow Chemical Co. will interview chemical engineering and chemistry students with at least two years of college for summer assignments.

JOB INTERVIEWS

The following companies will interview job applicants in the Placement Office on the second floor of the YMCA Building on Thursday.

ACF Industries, Inc. will interview B.S. degree applicants in chemical engineering and physics, E.S. and M.S. degree applicants in mechanical engineering and B.A. degree applicants in mathematics for jobs in product design and development.

Airborne Instruments Laboratory, Division of Cutler-Hammer, Inc., will interview graduates in all degree levels of electrical engineering for research, design, development and production of complex electro-mechanical systems and components.

Factory Mutual Engineering Division will interview graduate in chemical, civil, electrical, industrial, mechanical and petroleum engineering. Applicants must be available to start work in June.

The Navy Department will interview candidates in all degree levels in aeronautical, architectural, civil, electrical and mechanical engineering.

The Dow Chemical Co. will interview candidates in all degree levels of chemical, industrial, electrical and mechanical engineering, chemistry mathematics and physics for positions in research and development, production and technical sales.

The Soil Conservation Service, U. S. Department of Agriculture, will interview graduates in agricultural education, agricultural engineering, animal husbandry, civil engineering, agronomy and range and forestry to work as soil scientists, range and soil conservationists and engineers.

Square D Co. will interview B.S. degree candidates in electrical, industrial and mechanical engineering and M.S. degree candidates in physics for work in the mid-west. They also require one Spanish speaking electrical engineering graduate for assignment in Latin America.

Convair in Ft. Worth will interview all degree candidates in aeronautical, civil, electrical, mechanical and nuclear engineering, mathematics and physics for work in aircraft research and development.

Texaco, Inc. will interview all degree levels in chemical, electrical, mechanical and petroleum engineering, geology, geophysics and chemistry; M.S. and Ph.D. degree candidates in geological engineering and mathematics; M.A. and Ph.D. degree candidates in mathematics and candidates for degrees in civil and industrial engineering, business administration, economics and physical education.

Rideout stated that 646 students have been permitted to enter this division since its beginning in 1952. After their stay in the Division of Unclassified Students, 387 students were permitted to enter other schools of the university. Eighty per cent

Waivers, Poor Student Aid Top Intercollegiate News

Exceptional students are now eligible to have certain courses waived at Michigan State University, according to Dean Edward Carlin.

Carlin stated that the new program, developed after 18 months of discussion, is open to new students, transfer students and presently enrolled students "with particularly strong academic backgrounds who feel they are prepared for certain programs in the Basic College." The new waiver plan applies to Basic College courses involving communication skills, natural science, social science, and humanities.

After waiver for the course has been given, the student will receive no credit, but is eligible to take the course final examination. Full credit will be given if the student makes B or better.

Cornell University has stated that 70 per cent of students that would flounder on academic shoals and rocks are being saved.

Blanchard L. Rideout, professor and head of the Division of Unclassified Students stated that instead of leaving school because of bad grades, a student could enter the Division of Unclassified Students. While in this division, the student has up to two terms to take any courses in any curriculum in order to help him select a better course of study. The student must maintain a "77" average while finding himself at the University.

Rideout stated that 646 students have been permitted to enter this division since its beginning in 1952. After their stay in the Division of Unclassified Students, 387 students were permitted to enter other schools of the university. Eighty per cent

of these students have maintained a grade average of "70" or better.

More students abandon engineering, according to Rideout, than any other division of Cornell University. Rideout blames over-zealous parents, and a current fad to be engineers and scientists of pushing unqualified students into the field of engineering.

A national academic program in Catholic colleges is in the process of being instituted by the National Federation of Catholic College Students.

Initiated on the campus of St. Joseph's College at Rensselaer, Ind., the program is interested in student-faculty relationships, honor programs, academic segregation, and other problems.

Liberal arts colleges are undergoing a real crisis in education, according to Dr. Blair Stewart, president of the Associated Colleges of the Midwest.

In an address to the annual faculty conference at Denison University, Stewart said the liberal art college is doing a rather poor job as an educational institution and is having difficulty, due to inflationary salaries, in employing able faculties. Stewart

then summarized what he considers the advantageous parts of the widely-publicized Ruml Report, Memo to a College Trustee, which proposes radical reorganization of colleges.

The "Utopian College" proposed in the Ruml Report would give students more responsibility in the learning process; faculty time should be used to its fullest advantage; and colleges must study different methods of both teaching and learning to determine if the large lecture situation or the small-discussion class or a combination is most effective.

Curriculum in Business Administration at the University of Delaware will change for students entering the program after the academic year 1959-60.

In the third year, each student will take a survey course in each of the three major functional areas of business: finance, marketing and production.

In the fourth year, each student will take a survey course in labor and industrial relations and a six credit hour concentration in either finance, marketing or production, including a seminar in the spring semester. Each student will take a six-hour sequence in either psychology or sociology to obtain some understanding of the human relations of society.

To make room for the additions called for in the above changes, the modern foreign language requirement has been removed, although it is possible for the interested student to use his elective hours in such a language study.

Rio Gets Ready For Ike's Visit

RIO DE JANEIRO, Brazil (AP)—Brazil's beautiful waterfront capital readied a tremendous ovation for President Eisenhower today. The U.S. chief executive faced a jam-packed schedule including speeches and more talks with President Juscelino Kubitschek.

A good share of Rio de Janeiro's three million residents were expected to fill the streets of the flag-decked city to greet the President on his arrival from Brasilia, the nation's future capital being built 600 miles to the northwest.

Government employes were given the day off and most business firms declared a half holiday so their employes could see the two presidents drive for an hour and a half through the city.

After the landing at Galeao International Airport, on an island in Guanabara Bay, and a six-mile trip along the waterfront in a navy launch, the motorcade route lay along the tree-lined Avenida Rio Branco, the city's main business street, then along the broad bay-side drive to the U. S. Embassy.

REGARDLESS OF THE WEATHER SPRING IS JUST AROUND THE CORNER. OUR SHORT SLEEVE SPORT SHIRTS ARE NOW IN STOCK. WHY NOT COME IN AND PICK THE BEST.

This is the B-52. Advanced as it may be, this airplane has one thing in common with the first war-galleys of ancient Egypt... and with the air and space vehicles of the future. Someone must navigate it.

For certain young men this presents a career of real executive opportunity. Here, perhaps you will have the chance to master a profession full of meaning, excitement and rewards... as a Navigator in the U. S. Air Force.

To qualify for Navigator training as an Aviation Cadet you must be an American citizen between 19 and 26½—single, healthy and intelligent. A high school diploma is required, but some college is highly desirable. Successful completion of the training program leads to a commission as a Second Lieutenant... and your Navigator wings.

If you think you have what it takes to measure up to the Aviation Cadet Program for Navigator training, see your local Air Force Recruiter. Or clip and mail this coupon.

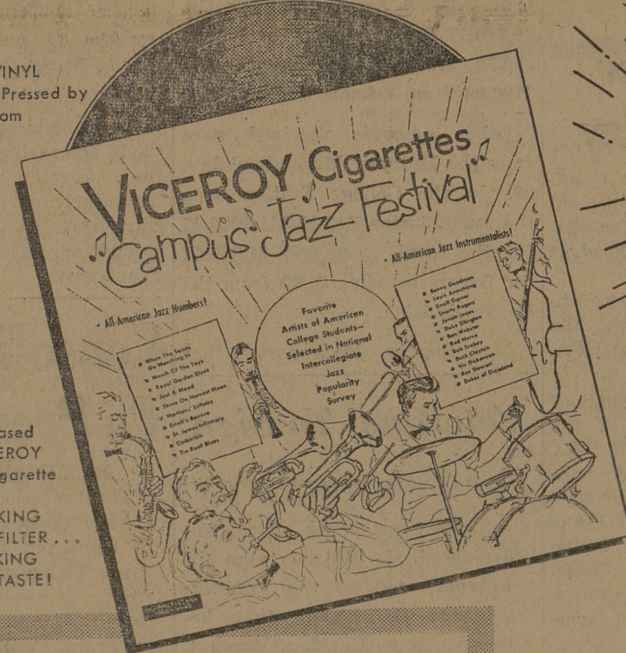

There's a place for tomorrow's leaders on the **U.S. Air Force**
