On Other Campuses

By Alan Payne

that actually seems to warrant roundings. a legitimate complaint.

It seems quite a few doors are havoc with students' frantic dashes from class to class.

These doors, located in straa few stiff arms and swollen girl. wrists from students intending to

push right on through them. They are trying to work out some kind of remedy for the situation at present so we'll have to keep informed and see that everything works out all right. It sure makes one feel bad to hear about such problems. SMU

An article in the SMU student paper urged the students to extend "friendly hellos" to all delegates on campus for last week's national swimming meet held on the SMU campus.

Something like that certainly looks silly when compared with our "howdy" custom we have down here. There was undoubtedly not much reaction to the SMU request anyway but such an article would certainly have been a waste of words and space down here, wouldn't it?

Texas Tech

A report from the Texas Tech Toreador is enough to turn a few heads in wonderment. It reads as follows: Government agriculture offi-

cials say a hen that laid 204 eggs during a recent contest has turned into a ROOSTER.

The article then goes on to explain that this is due to an over supply of male hormones in the hen, but still, its something that is fit material for the "Believe It or Not" series.

34 340 340 Spring has also come to the

Tech campus and is casually mentioned in the following excerpt: This is the time of rebirth. The male student's mind, which has

No more can he concentrate on his chosen work. No longer can left locked around the campus he spend long hours at the library during the day that really play in pursuit of scientific and technological learning. He begins to notice the girl walking down the sidewalk-the girl sitting next to tegic places, have produced quite him-the girl in the SUB-the

> Now isn't something like that just about enough to drive one out of his mind? Oh well, the weather has been pretty nice, hasn't it?

A report in TU's Daily Texan includes the following report concerning a demonstration held for Soviet Premier Khrushchev in Paris:

Out of the group of flags displayed at the demonstration was a flag of the Confederate States of America.

The youth who was carrying the flag, when asked his name and address, replied, "I can't give it to you. My daddy doesn't even know I'm in Europe.' Among the Faculty and Staff

* * * Congratulations are also in Congratulations are also in order for the Tea-sips. They have finally gotten an editor for next School Board, Botany Class year's Ranger, the humor maga-zine that looked like it wasn't going to have an editor next year. The new editor, when inter-viewed following his appointment. Keep Biology Prof Busy viewed following his appointment, said, "I intend to continue raising hell in the fine Ranger tradition, but I doubt that we will have a Sinner's Guide to Dallas' for a

few more years. However, we may get Hairy elected student president or something." Hairy is their cartoon char-

acter.

A report has also come from TU concerning a camel who had to have its leg amputated. The

bite inflicted by the camel in a two years of the Education Comfit of rage.

in the bathtub.) Assuming that you have first visited your friendly tobacconist, simply light your first Winston and smoke it. Reasoning backwards, the discovery proceeds as follows: first, you will notice a delightful flavor, in the class of fresh coffee or of bread baking. Obviously, such

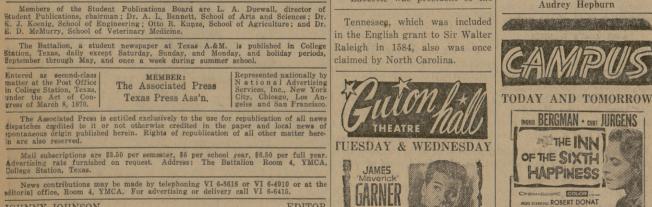

It's easy as π . (Yes, you can do it

flavor cannot come from the filter. Therefore, it's what's up front that counts: Winston's Filter-Blend. The tobaccos are selected for flavor and mildness, then specially processed for filter smoking. This extra step is the real difference between Winston and all other filter cigarettes. Besides, it's why Winston is America's bestselling filter cigarette.

"Eureka! Winston tastes good ... like a cigarette should!"
