

12th Man Bowl Practice

Members of the Air Force ROTC team in the coming 12th Man Bowl Basketball Game were working out Wednesday afternoon in DeWare Field House. Coaches for the Air Force are Wilmer Cox and Kelly Chapman, Aggie cagers of last season's squad. The 12th Man Bowl will be Saturday, April 9, at 8:30 a. m. in G. Rollie White Coliseum.

FAA Approves Easterwood Grant

The Federal Aviation Agency (FAA) recently approved a grant offer of \$8,000 for Easterwood Field, it was announced at the FAA's Region Two Headquarters in Fort Worth.

This Federal Aviation Agency participation is a part of the Federal Airport Aid Program through which local governments are offered financial aid up to 50 percent of the total allowable construction cost.

According to the agreement, A&M will at least match the FFA \$8,000 sum with local funds, thereby bringing the total of \$16,000 for this airport work.

The money offered by the Federal Aviation Agency, along with the local funds, will be used to rehabilitate the runway lights on the east-west runway and install taxi-way turn off signs and marking.

FAA District Airport Engineer A. E. Dyatt, who has supervised the planning of this project at his district airport office in Fort Worth, commented that Easterwood Field with its improved facilities, will do much to increase safety and encourage the air traveler to realize the progressiveness of College Station.

Carl Lyman Plans To Attend Meeting

Dr. Carl M. Lyman, head of the Department of Biochemistry and Nutrition, will attend a meeting of the National Cottonseed Products Assn. to be held April 25-26 at New Orleans, La.

Lyman will serve as scientific advisor to the association's research committee.

12th Man Bowl Practice Starts

Practice sessions got under way Wednesday for the annual Twelfth Man Bowl game, this year a basketball game in G. Rollie White Coliseum Saturday, April 9, at 8:30 a. m.

ATOMIC

(Continued from Page 1)

perimental research in controlled thermonuclear energy as part of the world's first and largest privately-financed program in the use of nuclear fusion for the generation of power and energy.

Nuclear fusion is the process responsible for the tremendous power of the hydrogen bomb and the energy in the sun and the stars. The research being conducted at San Diego may eventually lead to the harnessing of the hydrogen bomb for peaceful purposes, including the generation of electric power.

"Aid and Foster Knowledge" In announcing the awarding of the scholarships, Cunningham said, "One of the purposes of the Texas Atomic Energy Research Foundation is to aid and foster scientific knowledge in Texas. We feel that these fellowships will serve this purpose by bringing into the state some of the knowledge and experience being developed by scientists at General Atomic."

Paid Regular Stipends Recipients of the fellowships will be paid a regular stipend while working at the General Atomic laboratory during the summer and each plans to continue his studies at a Texas college or university.

Robert G. Cochran, head of the Department of Nuclear Engineering at A&M, said the flexible program offered students in nuclear engineering the particular course of study they want to follow. He added that Walker is interested in going into research in thermonuclear dynamics, and that the summer's work should give him more background for his field.

Pehsenfeld, the University of Texas student, is studying for a Ph.D. in the field of gaseous electronics and the physics of metastable systems. He is from Troup and received his bachelor of science degree from Rice Institute in 1957.

Ramer, a graduate of the University of Houston, is working there now as a graduate student research assistant in physics. He is a member of Phi Kappa Phi.

FIRST WEEK SUCCESS

NEW YORK (AP)—The first week of racing at Aqueduct's \$3 million dollar track proved a success. The average daily attendance was 31,700. The first week drew 189,598 fans who wagered slightly more than 16 million dollars.

The teams held their first meetings Tuesday night. One man from each outfit is eligible for the team.

The Army team will be the maroons for this year's clash and will be coached by Wayne Lawrence and Dave Corson, both Aggie basketball players last season. The Air Force team—the white team—will be coached by Kelly Chapman and Wilmer Cox, also basketball standbys on the Aggie team.

Lack of Equipment Lack of football equipment this year caused the Student Senate, who is sponsoring the event to change it to a basketball game. They decided not to have the game in December because the month was so full of activity, according to Ben Cook, Senate Issues Committee chairman.

Then in a meeting in February, the groups discussed the possibility of making the annual event a basketball game instead of football. As the plans grew, the Senate group searched for a date for the game, and finally arrived at the April 9 date.

Sekerka Coordinates Senate President Jake Sekerka coordinated with Col. Joe E. Davis, commandant, and he arranged for drill to be held from 7 until 8:30, holding the 8:30 to 10 a. m. open for the game.

Proceeds from the game will go to a Senate-sponsored scholarship, according to Sekerka. He said a good turnout would be needed to clear the \$500 needed for the scholarship fund.

Tickets for the game will be 50 cents each, and plans for sale of the tickets either through company commanders or at another central place will be announced later, according to Sekerka.

Eleanor Puts Value on Race In Wisconsin Vote

SALT LAKE CITY, Utah (AP)—Mrs. Franklin D. Roosevelt doesn't think winning the Wisconsin presidential primary next week will assure the Democratic nomination for either Sen. John F. Kennedy (D-Mass) or Sen. Hubert Humphrey (D-Minn).

"I shouldn't think it would be considered decisive," she told newsmen Wednesday night. She said Adlai Stevenson and possible Rep. Chester Bowles (D-Conn) are the only men who could break a deadlock at the Democratic National Convention. She said although Stevenson says he isn't a candidate for the nomination, "he might have to take it."

He is attending as regional associated university representative and as such is a guest of the conference.

The assistant professor has been with A&M since 1948, having his undergraduate work at the University of Pittsburgh. He studied for 18 months at the North Carolina State College in the field of nuclear physics. He is recognized as an authority in the field of power generation.

M.E. Prof Attends Chicago Meeting

Alan B. Alter, assistant professor in the Department of Mechanical Engineering, attended the 22nd annual American Power Conference held in Chicago, Tuesday through today.

He is attending as regional associated university representative and as such is a guest of the conference.

The assistant professor has been with A&M since 1948, having his undergraduate work at the University of Pittsburgh. He studied for 18 months at the North Carolina State College in the field of nuclear physics. He is recognized as an authority in the field of power generation.

A Living Legend

J. Frank Norfleet of Hale Center shown here with his wife, still has zest for this world, although he's 95 and ready to argue he's 100. Norfleet, an amateur, became a sensational manhunter more than three decades ago after five swindlers took \$45,000 from him in Dallas. The West Texas rancher saw all five placed in prison. And his activities sent at least 61 other criminals to the penitentiary. (AP Photo)

Argues About Age

Old Manhunter Lives on Memories

HALE CENTER, Texas (AP)—A living legend, J. Frank Norfleet, still has zest for this world, although he's 95 and ready to argue he's 100.

Norfleet, an amateur, became a sensational manhunter more than three decades ago after five swindlers took \$45,000 from him in Dallas.

The West Texas rancher saw all five placed in prison. And his activities sent at least 61 other criminals to the penitentiary.

"I'm 100 years of age, never mind what the papers say," he shouted to Emmet Collins of The Houston Post during a recent interview.

"You're 95," his wife shouted to penetrate his deafness. "He's always wanted to live to be 100, so he says he's 100. He's 95. I'm 89."

Argues About Age Norfleet heard more than expected. "I'm 10 years older than you by three days," he declared loudly.

His saga began in Dallas in 1919.

"I worked my way up," said Norfleet in the interview. "I was a ranch hand, then a foreman. I saved my money. I began to do a little trading to make more money. And I was able to get more. I later got my own ranch, with a wonderful home, then I decided to expand my ranch. That was why I went to Dallas."

At the time he was 54. Dallas Trip Norfleet journeyed to Dallas to sell a piece of land and buy a larger section.

He met one of the swindlers, Reno Hamlin, who roped him into a stock market swindle, using the other four men. He handed them \$20,000 payment on a sure thing, then demanded \$25,000 more before they would cash in his winnings, which he expected to be \$160,000. The man took the money and disappeared.

Little Help Norfleet received only nominal help at the time from officers.

His first clue, a name in a book, led him to San Antonio. From there, the trail led him over most of the United States.

In California, he saw two members of the ring placed in jail. They were Charles Gerber and E. J. Ward.

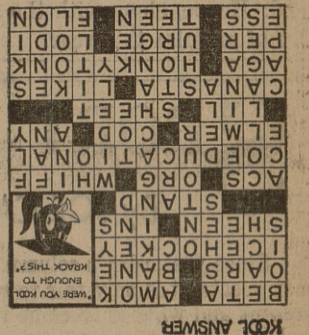

One Caught Authorities caught Hamlin in Oklahoma City. But Georgia had priority on trying him, and he went to prison there.

The ringleader, Joe Furey, still eluded the rancher. Finally he received a tip that Furey was in Jacksonville, Fla.

While Norfleet was bringing Furey back to Texas, the confidence man crashed out of the window of the train and jumped on a switch engine going back to Jacksonville. But officers were alerted and soon picked up the escapee.
