

Agriculture Outlook Mixed For Remainder of 1960

The outlook for agriculture for the remainder of 1960 is both bright and dark, according to John McHaney, economist with the Texas Agricultural Extension Service. Speaking at the State Assn. of Young Farmers of Texas Field Day held Monday at the college, McHaney said demand should be firm during the year because consumer income will stay high, state and local governments will continue to spend more money and overall economic activity will remain strong, although there are signs of it weakening faster than expected.

He also said federal government expenditures are expected to be high and the continuing population growth will aid in strengthening market demand.

Negative Side
On the negative side, McHaney said a high percentage of American

consumers are in debt, and some industries are cutting production. He also predicted that there will be a further slight drop in prices to farmers, a slight rise in production and marketing costs and an overall decline in farmers' net realized income.

The Young Farmers field day is held each year to bring its members up on the latest developments and problems in agriculture. It is sponsored by the Department of Agricultural Education in co-operation with the School of Agriculture.

Dr. J. R. Jackson, associate advisor to the organization and associate professor in the Department of Agricultural Education, said the Young Farmers are a group of men under 35 years of age who are becoming established in farming and ranching. There are about 2,000 members in char-

tered chapters who work closely with their local vocational agriculture teachers.

No Major Changes
McHaney said there probably will not be any major changes in the nation's agriculture as long as the international situation remains the same.

He said the total agricultural output probably will be large in 1960 and exports are expected to be in good volume. Cotton and rice exports likely will be higher than they were during the marketing period of 1958-59.

The economist told the group that the sharp rise in land prices, so evident in the past five years, may be approaching an end.

Pesticides Discussed
Another program speaker, Dr. J. C. Gaines, head of the Department of Entomology, discussed the Miller Pesticide Bill of 1954, which established how much residual dust or spray can safely remain on farm crops for human or livestock consumption.

He said literature on pesticide tolerances is available in county agent offices, or at the Agricultural Information Office at College Station.

Dr. Wayne Hall, head of the Department of Plant Physiology and Pathology, cautioned the Young Farmers not to use any crop pesticide or herbicide chemical that has not been cleared by law. Approved chemicals should be applied strictly according to instructions.

He urged the group to be especially careful about the time of pesticide and herbicide application in relation to the time the crop is to be harvested.

Cattle Breeding
Dr. Murray Brown, assistant professor in the Department of Dairy Science, said the day is coming when dairy cattle will be bred for high non-fat milk solids production in response to growing consumer demand for high protein foods.

He said research has already shown that protein content in milk is hereditary to a large extent. And one of the first steps in future work is to find good tests for protein and then discover how it varies from animal to animal. Next will come application of already-known breeding methods to obtain dairy animals with high milk protein production rates.

The dairy scientist said definite differences are being found in the ability of bulls to transmit the protein trait.

"Someday, milk may be marketed on the basis of protein content and volume instead of the present system of butterfat content and volume," Dr. Brown said.

Gordon Koonce of Wharton, Young Farmer state president, presided over the session.

Steelmobile

This unique trailer made of stainless steel drainage pipe and containing demonstrations of the design of flexible metal structures will be on the campus Monday and Tuesday. Guided tours will be conducted through the exhibit, and illustrated lectures will be given in some engineering classes on the two days.

Engineers Urged To See Steelmobile

The Steelmobile, the only stainless steel drainage pipe on wheels, will visit Texas A&M Monday and Tuesday.

"An invitation is extended to all engineering students, graduate students and faculty members to see the Steelmobile," announced George E. Shafer, formerly vice president of engineering for Armco Drainage and Metal Products, Inc. Shafer will deliver illustrated lectures on selected subjects to engineering classes.

Sponsored by Armco Drainage and Metal Products, Inc., the Steelmobile contains full-scale exhibits of highway and municipal products.

On display inside the Steelmobile is graphic demonstration of the design of flexible-metal structures. While the major exhibit is on corrugated metal pipe, other products included are Smoothflow Sewer Pipe, water pipe, tunnel liner plates, water control gates, highway guardrail, foundation piling, retaining walls and steel buildings.

Tours through the Steelmobile will be conducted by Chris Bentz, a recent engineering graduate from Tri State College and driver of the vehicle.

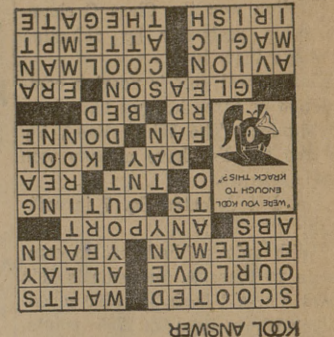

The exhibit cost more than \$50,000 and took nine months to build. The 12-gage stainless steel pipe

Civilian Council Winners Revealed

Results of the April 11 election of class representatives to the Civilian Student Council were announced today.

Chairman Named For Conference Slated Next Week

Bill Whittington is chairman of the local committee to handle the 13th annual Accounting Conference to be held here Monday and Tuesday.

His committee is composed of Robert M. Stevenson, Thomas W. Leland, John E. Oliver, James Ingram, Thomas D. Ketbetter, Walter S. Manning, Edward S. Packenham and Robert P. Wood, all of the Division of Business Administration.

Russell H. Kyse of Peat, Marwick, Mitchell and Co., of San Antonio, is conference chairman. Sessions will be held in the Memorial Student Center, commencing at 9 a.m., Monday.

William Q. Richards, 3-J Puryear, was elected senior class representative. Junior representative is David L. Beauchamp, 2-G, Law; sophomore representative is David A. Carter, 3-G, Puryear; and graduate student representative is Lee A. Griggs, 1-E, Law.

Representative for next year's freshman class will be elected next fall.

Fred Davidson, C-9, Hart Hall, was elected senior class representative to the Hart Hall Council in another civilian election April 11. Junior class representative is Edward L. Cohen, D-11, and sophomore representative is William D. Edmonds, C-1.

"A" Ramp representatives are John R. Gannaway, A-1, and Marshall Wallace, A-1. Harvey Spross, B-8, and Tommy Childress, B-3, were elected representatives from "B" Ramp. "C" Ramp elected Donald S. Boyd, C-6, and Donald A. Hayes, C-12, its representatives to the council.

Anachronism?

Not really. 'Cause if Coke had been around in Caesar's day, Caesar would have treated himself to the sparkling good taste, the welcome lift of Coke! Caesar's motto—"I came, I saw, I conquered." Pretty good motto for Coke too—the prime favorite in over 100 countries today!
