

# Wynes Given Summer Grant

An instructor in the Department of History and Government at Texas A&M College, Charles E. Wynes, has been awarded a research grant by one of the oldest learned societies in the United States, the American Philosophical Society.

Purpose of the grant is for Wynes to devote full time during the summer of 1960 to the compiling and editing of "Southern Sketches," by Mrs. Orra Langhorne. For 30 years (1870-1900) Mrs. Langhorne contributed a monthly column of that title on life in post-Civil War Virginia to the Southern Workman, published at Hampton, Virginia.

Wynes has been with A&M two years and is a native of Rectortown, Va. He received his B.S. degree in Education at Madison College, Harrisonburg, Va., in 1952, with a major in history and minors in English and biology and received an M.A. degree in history from the University of Virginia in 1957. He recently completed his dissertation for the Ph.D. degree in history at Virginia. During 1956-58 he was Phelps-Stokes Fellow at the U. of Va.

He is a member of Kappa Delta Chi, Delta Kappa and several professional historical societies, including the Mississippi Valley Historical Assn. He is also the author of three articles on American Colonial religious history, banking in the Middle Period and post-Civil War politics in Virginia. The articles appeared in the University of Virginia Essays in History and in the Virginia Magazine of History and Biography.

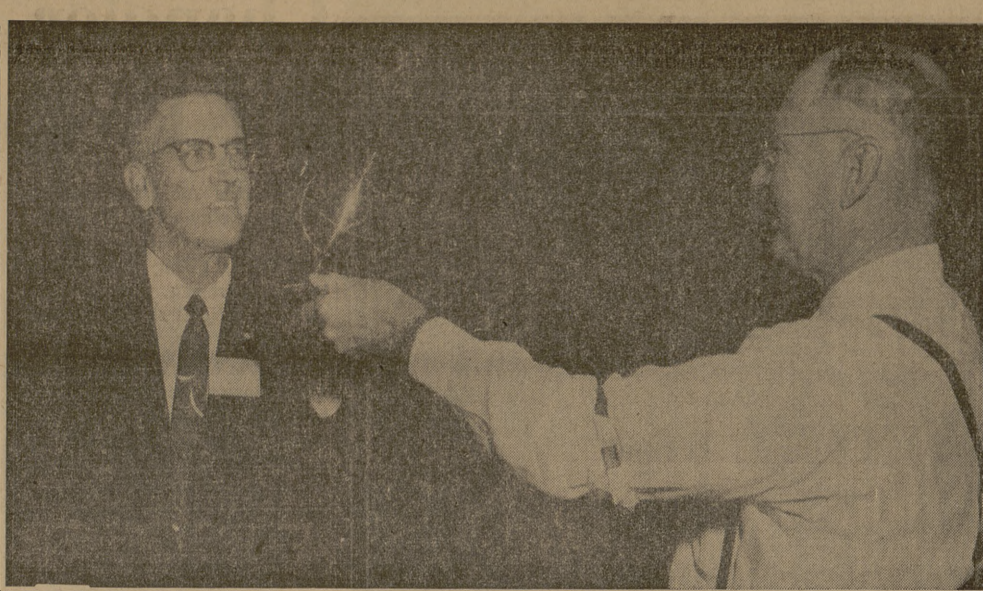

Wynes served as a lieutenant, USNR, education and training officer for enlisted personnel at the Naval Air Station, Corpus

## Austin Students Began Picketing Downtown Today

AUSTIN (AP)—Negro and white youths demanding desegregated lunch counters began picketing downtown establishments in Texas' capital city today.

The action followed a seven-day ultimatum laid down by students from various colleges here after an effort to win desegregation by negotiation failed last week.

The final decision to picket came at a meeting Tuesday night attended by about 150 white and Negro youths at the University YMCA near the campus of the University of Texas.

**Screwball Award**  
Roy E. O'Neill, left, secretary-treasurer of Industrial Scientific Inc. of Houston, is presented the "1960 Screwball Award," by Ralph Webb of Union Carbide Chemical Co. of Charleston, W. Va. The Screwball Award is the highest honor the Instrumentation for the Process Industries Conference can bestow upon a fellow member. It is presented for meritorious service to the organization. The conference is held annually at A&M, sponsored by the Chemical Engineering Department of which Dr. J. D. Lindsay is head.

## Wildlife Department Gets \$2,550 Grant

The National Science Foundation has granted \$2,550 to Texas A&M College for an undergraduate training program in the Department of Wildlife Management.

Dr. Richard J. Baldauf, associate

professor in the Department of Wildlife Management who will direct the program, said the research study will be concerned with the cranial morphology of *Syrphophus marnocki*, a type of frog found in Texas and one which is closely related to tropical frogs of Mexico, South America and Australia.

Three undergraduate students will be chosen to participate in the program. Students interested in the project are urged to contact Baldauf for details. A stipend will be awarded to participants.

Students chosen for the program, Baldauf said, will be required to prepare serial sections of tissues and to present an illustrated description of the cranial anatomy of the species. Results will be published in a recognized scientific journal.

Baldauf has been studying frog and toad morphology for several years. Among studies published by the teacher and researcher is one that appeared in a recent issue of the *Journal of Morphology*. The article presents a new theory on the evolution and relationship of toads with other closely related amphibians.

He is currently director of the A&M Undergraduate Research Participation Program.

John M. Stalnaker, president of National Merit Scholarship Corp., hailed the 1,000 new merit scholars and 9,000 of their fellow finalists as being "among America's finest academic prospects for the future."

He noted that Governor Price Daniel, along with the governors of 29 other states, has declared today as Merit Scholar Day.

In the first five years of the merit program about 4,000 scholarships have been awarded with an estimated value of \$20,000,000.

The West Berlin Zoo bought a mailed hippopotamus from hunters in India this year. Cost was about \$12,000, raised by a lottery.

## Specialists Present Views On TV Program Analysis

WASHINGTON (AP)—House payola investigators summoned three statistical specialists today to report their own interpretation of an analytical study of Dick Clark's TV disc jockey show.

The study, made for Clark by a New York statistical firm, reported that Clark could have had a personal financial interest in 27 per cent of the songs played on his matinee music show. By implication, it showed he had no personal interest in 73 per cent of the songs he played.

Rep. John E. Moss (D-Calif.) promptly challenged the survey results, calling them misleading and incomplete.

"We have asked these three experts to analyze the study," Robert W. Lishman, chief counsel of the Legislative Oversight subcommittee, told a reporter.

"And they are going to tell us whether it has any validity or whether it doesn't."

Lishman implied Tuesday that Clark, the nation's best known disc jockey, has dishied out payola to other deejays to promote records in which he has a personal financial stake.

Lishman raised this point in asking Thomas Noonan, research director for Billboard Magazine, what weight is given to Clark in compiling the trade publication's weekly ratings of the top 100 hit tunes.

"Do the ratings," Lishman asked, "take into account that he or his companies have paid payola to numerous disc jockeys throughout the country?"

Noonan replied that payola was considered but that it was impossible to gauge it with any accuracy.

To this, Lishman inquired how Clark's influence could be measured "if you don't know the extent of payola he has paid?"

## ANGUS CONFERENCE TO BE HELD MAY 11-13

Cattlemen from throughout Texas and many areas of the nation will be attending the sixth annual American Angus Conference to be held here May 11-13.

"Pacing Progress for Greater Profit" is the theme of the session, which will feature talks on use of records in commercial cattle production, herd classification and interpretation of Angus herd improvement records. Conference members also will see a demonstration of a machine which ultrasonically measures the loin eye of a live animal.

Joe Keefeaver of Jonesboro, Tenn., president of the American Angus Assn., said cattlemen of the Southwest should be especially interested in a panel discussion on merchandising of Angus cattle.

This portion of the program will cover feeder calf sales, public auctions of purebred and private treaty sales. Also included will be an outlook report on the export market.

The three-day meeting is sponsored by the American and Texas Angus Associations in cooperation with Texas A&M.

Some of the speakers and their subjects are Louis P. Merrill of Midlothian, "Using Herd Classification"; T. Books Porter of Austin, "Merchandising Angus Cattle"; Herman Allen of Menard, "Feeder Calf Sales"; Milton E. Miller of Brady, "Private Sales and Export Possibilities"; Dr. A. M. Sorenson, Jr., A&M, "Dry Cows Are for the Rich"; L. D. Wythe, A&M, "Report on Angus Sire Groups," and Dr. O. D. Butler, head of the Department of Animal Husbandry, "Heritability of Carcass Traits."

President Earl Rudder will give an address of welcome to the group. Roy Snyder, meats specialist with the Texas Agricultural Extension Service, will be in charge of a "Texas Chuck Wagon Feed" at the Grove at 5 p.m. on the first day of the conference.

The 1 out of 20 that didn't get smoked

There's a lot of satisfaction in pointing out something good to a friend. That's why it often happens that one cigarette out of a pack of Dual Filter Tareytons never does get smoked.

People break it open to demonstrate its unique Dual Filter containing Activated Charcoal. They may not know why it works so well, but they do know this: It delivers far more than high filtration... it brings out the best taste of the best tobaccos—as no single filter can!

Try a pack of Tareytons. We believe the extra pleasure they bring will soon have you passing the good word to your friends.

**HERE'S HOW THE DUAL FILTER DOES IT:**

1. It combines a unique inner filter of ACTIVATED CHARCOAL... definitely proved to make the smoke of a cigarette mild and smooth...
2. with an efficient pure white outer filter. Together they bring you the real thing in mildness and fine tobacco taste!
