

Around the SWC

By Alan Payne

Southern Methodist University
In a column bowing out after a year's service and turning the paper to a new staff, a columnist for the SMU Campus recalled the following events that had occurred during his tenure: a Japanese flag flying in front of an ROTC federal inspection, an alligator in a dormitory shower, Dresden being the capital of China and St. Augustine inventing frass.

Also, a candidate for the presidency of the SMU student body proposed to reduce tuition rates by selling bricks acquired by tearing down class room buildings. By borrowing money from the students, he promised to give them a 150 per cent return on their activity fees. Asked where he would get the money to pay off these loans, he replied, "Don't worry, we only owe it to ourselves."

Texas University
The president of TU's Student Assn. has been asked to be removed from office by a petition filed stating that he violated campaigning regulations in the recent campus elections held in Austin in which he was elected. The president stated that he had done "nothing to be ashamed of" while a petitioner said that the petition was filed to "call attention to general student opinion which has led to widely

spread dishonest practices in student government elections."

A freshman coed suffered a most humiliating accident as she was being honored at a traditional engagement shower.

Following the shower, the coed slipped and fell on the steps and was forced to spend the night in the Student Health Center. Her mother answered all replies by stating "I'm confident that she will be all right."

Also, a TU student is currently engaged in a desperate fight for the life of a friend.

A prisoner being held in Communist Sukarno is scheduled to die any minute now and the student is doing everything he possibly can to save him through numerous letters to prison and civil officials.

The two boys became friends in college in Florida before the Korean conflict and remained friends throughout the action.

The captured youth was caught in May of 1958 and accused of carrying arms for rebels.

Texas Christian University
TCU's Samuel E. Anderson Chapter of Angel Flight, an AF-ROTC drill team, has been awarded the Purdue Cup as the best angel flight unit in the nation. The trophy marked the first the TCU group has won.

Research Engineer Finishing Eighth Year As A&M Prof

By TOMMY HOLBEIN
Battalion Feature Editor

Dr. Charles D. Holland, professor in the Department of Chemical Engineering and associate research engineer in the Texas Engineering Experiment Station, has been with the college since 1952, when he became an instructor in the department.

Holland received an associate in arts degree from Mars Hill Junior College in Mars Hill, N.C. in 1941 and in 1943 he was pre-

sented a B.S. degree in chemical engineering from North Carolina State College in Raleigh, N.C. From 1943-47, Holland served as an officer in the United States Navy on destroyer duty. After World War II, he worked for one year as junior engineering for the Burlington Mills Corp.

In 1952, Holland assumed a position as instructor in the Department of Chemical Engineering at A&M and in 1953 became assistant professor in the department, simultaneously receiving an M.S. in chemical engineering.

Holland served as assistant professor until 1956, when he was promoted to associate pro-

fessor and remained in this capacity until September 1959, when he became a full professor in his department, a position which he still retains.

During the summer of 1955, Holland worked in the Technical Service Division of Humble Oil and Refining Co. and, during the following summer, he was employed in the Unit Operations Section, Oak Ridge Institute of Nuclear Studies.

In the profession, Holland is chairman of the A&M College of Texas-Baylor University Section of the American Chemical Society for 1959-60, and is a member of the executive committee of the South Texas section of the American Institute of Chemical Engineers. He is a member of Sigma Xi, Phi Kappa Phi and in the American Society of Electrical Engineers.

Cottonseed Flour May Whip Deficiency As Milk Substitute

Underdeveloped countries in the world, where milk is in extremely short supply, may soon be whipping a protein deficiency disease of children by using cottonseed flour as a milk substitute.

Dr. Carl M. Lyman, head of the Department of Biochemistry and Nutrition, told members of the 28th annual Oil Mill Operators Short Course held last weekend at the College that development of the milk substitute as a human protein source was a significant step in nutrition and in the cottonseed products industry.

He said that Guatemala, a short milk supply country, is trying the substitute with good results in a program to boost the nutritional level of its children. The substitute is known as inaporrina.

Incaporrina is a combination of 38 per cent cottonseed flour, 29 per cent corn, 29 per cent sorghum grain and a smattering of the necessary vitamins and minerals. It is mixed with water to make a drink.

Children relish it, Lyman said, and the cost is a mere penny a glass in Guatemala.

The nutritionist said children often come down with a protein deficiency ailment known as kwashiorkor when they are unable to get enough milk. The disease is responsible for many deaths.

Lyman predicted that in the near future, cottonseed protein will become an important human food in many areas of the world where animal protein sources are scarce.

He told the group that cottonseed flour, to be fit for human consumption, must have all the hulls removed and be of high quality.

Heading the inaporrina project in Guatemala is Dr. N. S. Scrimshaw, director of the Institute of Nutrition of Central America and Panama.

Discussing livestock nutrition, Lyman said it has become increasingly apparent that the unavailability of lysine, an essential amino acid, is a primary factor in the feeding value of cottonseed meal. When commercial lysine is added to hog rations, for example, meal mediocre in quality can be converted to an excellent source of protein.

He said that commercial lysine is still too expensive to be practical, although the price is trending downward.

The Oil Mill Operators Short Course was conducted by the Department of Chemical Engineering in co-operation with the Texas Cottonseed Crushers Assn. and the International Oil Mill Superintendents Assn.

Another speaker, H. D. Reeves of the Plains Co-Operative Oil Mill at Lubbock, said his firm uses asphalt pavement as a base on which to store cottonseed out in the open. The asphalt is slightly high in the middle for drainage purposes.

If possible, green seed should

not be stored outside, he said. When inside storage is not available, green seed should be placed at the end of the pile where it can be worked first.

Outside stored seed should be packed and depressions smoothed out to shed rain, Reeves said. A cooling system should be installed to avoid seed heating.

W. B. Harris of the Cottonseed Products Research Laboratory here discussed aeration studies and described how seed pile resistance to air flow varies with depth.

EUROPE MADE SIMPLE: NO. 2

Last week we discussed England, the first stop on the tour of Europe that every American college student is going to make this summer. Today we will discuss your next stop, France—or the Pearl of the Pacific, as it is generally called.

To get from England to France, one greases one's body and swims the English Channel. Similarly, to get from France to Spain, one greases one's body and slides down the Pyrenees. As you can see, the most important single item to take to Europe is a valise full of grease.

No, I am wrong. The most important single item to take to Europe is a valise full of Marlboro Cigarettes. Oh, what a piece of work is Marlboro! If you think flavor went out when filters came in, treat yourself to a Marlboro. The filter works perfectly, and yet you get the full, zestful, edifying taste of the choice tobaccos that precede the filter. This remarkable feat of cigarette engineering was achieved by Marlboro's research team—Fred Softpack and Walter Flitpop—and I, for one, am grateful.

But I digress. We were speaking of France—or the Serpent of the Nile, as it is popularly termed.

First let us briefly sum up the history of France. The nation was discovered in 1492 by Madame Guillotine. There followed a series of costly wars with Schleswig-Holstein, the Cleveland Indians, and Captain Dreyfus. Stability finally came to this troubled land with the coronation of Marshal Foch, who married Lorraine Alsace and had three children: Flopsy, Mopsy, and Charlemagne. This later became known as the Petit Trianon.

Marshal Foch—or the Boy Orator of the Platte, as he was affectionately called—was succeeded by Napoleon who introduced shortness to France. Until Napoleon, the French were the tallest nation in Europe. After Napoleon, most Frenchmen were able to walk comfortably under card tables. This later became known as the Hunchback of Notre Dame.

Napoleon was finally exiled to Elba where he made the famous statement, "Able was I ere I saw Elba," which reads the same whether you spell it forwards or backwards. You can also spell Marlboro backwards—Orolbram. Do not, however, try to smoke Marlboro backwards because that undoes all the efficacy of the great Marlboro filter.

After Napoleon's death the French people fell into a great depression, known as the Louisiana Purchase. For over a century everybody sat around moping and refusing his food. This torpor was not lifted until Eiffel built his famous tower, which made everybody giggle so hard that today France is the gayest country in all Europe.

Each night the colorful natives gather at sidewalk cafes and shout "Oo-la-la" as Maurice Chevalier promenades down the Champs Elysees swinging his Malacca cane. Then, tired but happy, everyone goes to the Louvre for bowls of onion soup.

The principal industry of France is cashing travelers checks.

Well sir, I guess that's all you need to know about France. Next week we'll visit the Land of the Midnight Sun—Spain.

©1960 Max Schulman

Next week, this week, every week, the best of the filter cigarettes is Marlboro, the best of the non-filters is Philip Morris; both available in soft pack or flip-top box.

The Firing Line

(Editor's Note: The letter below was addressed to Bobby Bennett, secretary of the Texas Aggie Rodeo Assn., with reference to the recent rodeo on the Texas A&M campus.)

Mr. Bobby Bennett, Secretary Texas Aggie Rodeo Assn.:
We are grateful to you and the officials of Texas A&M for your hospitality on April 30, 1960, when our bus load of hospitalized veterans had the privilege of attending the 11th Annual National Intercollegiate Rodeo. P. L. (Pinkie) Downs of the Information Office arranged for the meals at Duncan Mess Hall, and as usual this is a highlight of our visits to your fine school. J. G. Peniston of Duncan Dining Hall does an outstanding job of making our veterans feel at home. Our trip supervisor, Jim Dur-

an, reported a wonderful trip and a good rodeo despite the mud. Thank you very much and we would like to extend an invitation for you to visit our Center at anytime.

Sincerely yours,
C. D. Taylor
Coordinator, P M and R Service

Social Whirl

7:30
An A.F.S. meeting will be held tonight in the Mechanical Engineering Building.
The Aggie Wives Bridge Club will not meet this week.

Wee Aggies

We Aggies like to read about Wee Aggies. When a wee one arrives, call VI 6-4910 and ask for the Wee Aggie Editor.

A future Corps Commander, Michael Ross, was born to Mr. and Mrs. Norman B. Ross, '59, Tuesday, April 5 at 8:47 a.m., in St. Joseph's Hospital. Michael weighed 6 pounds, 8 ounces.

What's Cooking

The Pre Med-Pre Dental Society will meet in the Biology Lecture room tonight to elect officers for next year.

THE BATTALION

Opinions expressed in The Battalion are those of the student writers only. The Battalion is a non-tax-supported, non-profit, self-supporting educational enterprise edited and operated by students as a community newspaper and is under the supervision of the director of Student Publications at Texas A&M College.

Members of the Student Publications Board are L. A. Dueswall, director of Student Publications, chairman; Dr. A. L. Bennett, School of Arts and Sciences; Dr. K. J. Koenig, School of Engineering; Otto B. Kunze, School of Agriculture; and Dr. E. D. McMurry, School of Veterinary Medicine.

The Battalion, a student newspaper at Texas A&M, is published in College Station, Texas, daily except Saturday, Sunday, and holiday periods, September through May, and once a week during summer school.

Entered as second-class matter at the Post Office in College Station, Texas, under the Act of Congress of March 3, 1879.

MEMBER: The Associated Press Texas Press Assn.
Represented nationally by National Advertising Services, Inc., New York City, Chicago, Los Angeles and San Francisco.
The Associated Press is entitled exclusively to the use for republication of all news dispatches credited to it or not otherwise credited in the paper and local news of spontaneous origin published herein. Rights of republication of all other matter herein are also reserved.

PEANUTS
By Charles M. Schulz
WE WERE SO HAPPY TO HEAR THAT YOU ARE GOING TO BE OUR MANAGER AGAIN THIS YEAR, CHARLIE BROWN!
AND WE THINK YOU SHOULD HAVE SORT OF A GOOD LUCK KISS FROM ONE OF YOUR PLAYERS TO HELP YOU START THE SEASON!
WELL, THAT'S VERY NICE, GIRLS...AH...I...I...
SMACK!
WHY DON'T YOU LET ME PLAY THIRD BASE THIS YEAR, CHARLIE BROWN?
I KNOW I COULD DO A GOOD JOB OUT THERE...I JUST FEEL THAT I'M CUT OUT TO BE A REAL GOOD THIRD BASEMAN!
ALL RIGHT...GO AHEAD...GIVE IT A TRY...
OH THANK YOU, CHARLIE BROWN! THANK YOU! YOU'LL NEVER REGRET IT!
NOW, JUST SHOW ME WHICH ONE IS THIRD BASE...
