

Rockefeller Leaves \$150 Million Estate

By The Associated Press
NEW YORK—John D. Rockefeller Jr., who gave away 450 million dollars during his lifetime, left an estate estimated at 150 million dollars.

The will of the philanthropist was filed and admitted to probate Thursday in Surrogates Court. The will was dated Jan. 8, 1958, with three codicils at later dates.

Rockefeller died May 11 at Tucson, Ariz., at the age of 86. The residue of the estate goes to his widow, Martha Baird Rockefeller, and the Rockefeller Brothers Fund, Inc., a philanthropic foundation.

The 59-page will made preliminary gifts of charitable nature, including 1,500 acres of Mount Desert Island, Maine, to the U.S. government. It also specified gifts of personal property and works of art.

Rockefeller's six children, a daughter and five sons, including New York Gov. Nelson A. Rockefeller, are wealthy in their own right. The will left various parcels of real estate to the sons.

The widow's portion of the residuary estate will be held in trust. She will receive a life income from the trust and will have the right to dispose of the principal of the trust in her will.

Mrs. Rockefeller also will receive her late husband's cooperative apartment at 740 Park Avenue.

Real estate owned by Rockefeller in the Tarrytown, N. Y., area of Westchester County will go to the sons.

Rockefeller left his J. Y. Ranch in Wyoming to his son Laurence. The will specified that his Harbor Club property in Maine go to his

Cortlandt House and adjacent property, all furnishings and antiques, plus a million dollars, be given to Sleepy Hollow Restoration, an organization devoted to preservation of historic buildings in the Tarrytown area.

Sons Nelson and Davis, but this property had been turned over to them prior to his death.

Another bequest, effected prior to his death, directed that the Van

statement in writing from the A&M College System Board of Directors that the women will not even be considered."

Barron said he did not agree that A&M was an all-male college operated under military rules.

"A&M is a university type school, not a military academy," he said. "People don't realize what a great institution A&M is. That school offers a diversity of degrees comparable to many of the greatest universities in the United States, including several degrees that aren't offered anywhere else in Texas," he added.

Barron said A&M was geared to 1900 standards and for that reason would continue to lose money, top faculty members and students.

"After the football season there is nothing to do but study," he said, "and it takes more than study to keep a great school great."

"Letting women into A&M would not only help the school scholastically, morally and financially, but would help to make greater the greatest school in the world," Barron said.

As to the status of the Corps of Cadets if women were admitted, Barron said he had talked to "the top ROTC man in the Pentagon," and "he wondered why A&M hadn't gone coeducational before."

Barron said he predicted the Class of '62 would take Aggie coeds to the Ring Dance that year.

"I think it would be safe to estimate there will be from 1,000 to 1,500 women going to school at A&M within," he added.

Mt. McKinley Rescue Effort Continues

By The Associated Press
ANCHORAGE, Alaska — Rescuers inched up the tortuous face of North America's mightiest mountain today toward a desperately sick woman and four injured men.

An Army jet helicopter, flying at more than twice its normal ceiling, failed twice Thursday to pluck the five climbers from the high reaches of 20,320-foot Mt. McKinley. The Army said it would try again today.

Concern mounted. The climb could take three days. Temperature on the mountain Thursday night was 15 below zero. Rescuers included 47 members of Seattle Mountain Rescue Council, shuttled by helicopter to a 10,000-foot high camp after flying 1,500 miles.

Members of the Class of '10 and their wives dinner in the Assembly Room of the Memorial Student Center last night.

ALSO FOR WEEK

Schedules For Weekend Released By Churches

Area churches have released the following schedules for this weekend:

A UTO Ingathering and Holy Communion will be held Thursday at 7:30 p.m.

Dixon Strips Rattlesnakes Without Blinking An Eye

By NELSON ANTOSH
Battalion Staff Writer

A former employee of the Ross Allen Reptile Institute in Florida, James R. Dixon can strip a five-foot rattlesnake of its venom without blinking an eye. His lectures on the characteristics and habits of poisonous snakes, climaxed by hourly milking of huge rattlers, were the main features of a Department of Wildlife Management exhibit recently.

However, you probably wouldn't guess that he is also working on a less illustrious project that is far more important, the detection of the carriers of the costly and sometimes deadly disease ornithosis. Commonly called parrot fever, the sickness hits domestic turkey flocks throughout the state, and even infects people working in poultry dressing plants.

Hunting Disease
Working as a biologist for the Department of Microbiology in the School of Veterinary Medicine, Dixon is attempting to discover what wildlife is carrying the disease to the turkeys, and what can be done about it.

The first phase of Dixon's work is to collect blood and tissue sam-

les from various wild birds and animals and determine if they are carriers of the disease. Most of his collecting work is concentrated along the Texas Gulf Coast, and during the bird nesting season he makes numerous trips to small is-

lands in the Gulf of Mexico. The second phase of his research involves collecting live specimens, innoculating them with the disease organism and then checking to see if or how long they will be active carriers.
