## 4-H Club Members Close Annual Roundup Here Today

### 1,300 Boys, Girls Attend Meeting

Some 2,000 4-H club members, adult leaders and county extension agents closed out their annual State 4-H Roundup this morning on the campus after three days of education, recreation and competition.

Approximately 1,300 boys and girls, all members of 4-H clubs across the state, took part in the Roundup, one of the oldest annual state 4-H meetings in the nation.

The Roundup got under way Tuesday with registration during the day, an orientation meeting late Tuesday afternoon and a chuck wagon barbecue Tuesday night. The barbecue was sponsored by the Texas 4-H Recognition Committee. H. E. Burgess, College Station insurance man, is chairman of the committee. The 4-H club members also heard welcomes from Agricultural Extension Service Director John E. Hutchison. Hutchison also introduced members of Burgess' committee, members of the A&M College System Board of Directors and other officials of the A&M College System.

Tuesday night just prior to "lights out" in the college dorms in which the 4-H members were staying, Aggie Football Captain Gale Oliver spoke to the group and Stephen F. Austin Choir Director Jim Austin led the group in singing. The same program was held Wednesday morning.

Wednesday morning 25 different subject matter contests started. Each contest was held under the supervision of one or more of the specialists in agriculture or home economics at the Roundup.

The contests included all types of competition involving agriculture and home economics skills. Contest winners in the contests were announced Wednesday afternoon.

Wednesday afternoon programs were presented by the Department of Physics, the School of Veterinary Medicine, the School of Agriculture and the School of Engineering for conference attendees who were not taking part in the contests.

The Texas 4-H Recognition Committee sponsored an entertainment night Wednesday in Guion Hall. Activities this morning included meetings of the Texas 4-H council Roundup Committee and the directors of the Texas 4-H Club Recognition Committee, the executive committee and district agents of the Texas Agricultural Extension Service.

### Plan World Trips

Daniel Russell, standing, chairman of the rural sociology division, and Dan R. Davis, associate professor of rural sociology, both of the Department of Agricultural Economics and Rural Sociology, discuss areas they will visit this summer when they travel around the world on foreign service programs. Russell will be field program officer of the International Voluntary Services on contract with the International Co-Operation Association. The trip will be his eighth consecutive one in foreign service. Davis will work under the direction of the A&M College System's Office of Foreign Programs in conjunction with a recent five-year grant by the Ford Foundation.

## Sociology Profs Plan World Tours

Two professors in the Department of Agricultural Economics and Rural Sociology will make around-the-world trips this summer as participants in foreign service programs.

They are Daniel Russell, chairman of the rural sociology division, and Dan R. Davis, associate professor of rural sociology.

Russell left June 1 for his eighth consecutive summer in foreign service. His first tour was to Europe with a load of dairy cattle, food and clothing for refugees in West Germany, a trip sponsored by the Texas Christian Rural Overseas Program.

The next two summers were spent as an International Co-Operation Association technician and acting country director in Haiti. ICA is an aid program for underdeveloped areas in foreign lands.

### Worked With ICA

During the following two summers, Russell served as ICA community development consultant in El Salvador. And this summer, as he has for the past two summers, he will travel around the world as field program officer of the International Voluntary Services of Washington, D. C., on contract with ICA.

IVS is a group supported by various religious and civic organizations whose purpose is to recruit and service groups of young college graduates to work as technicians in underdeveloped countries.

Russell plans to work in Japan, Korea, Taiwan, Hong Kong, Viet Nam, Laos, Cambodia, Thailand, Indonesia, Singapore, India, Pakistan, Lebanon, Jordan and other areas where teams are requested.

Davis left Tuesday for three months of study in Pakistan, Ceylon, India and the Philippines and will then continue around the world. He will be under the direction of the A&M College System's Office of Foreign Programs in conjunction with a recent five-year grant by the Ford Foundation.

### Study Problems

The professor will study problems of adjustment of American technicians to foreign cultures and collect additional information in underdeveloped areas for a course in cultural anthropology offered by the Department of Agricultural Economics and Sociology.

### Returns in September

He will return in September to assist in orienting new staff members and families before they depart for foreign service in the Intercollegiate Exchange Program.

Dr. Tyrus R. Timm, head of the Department of Agricultural Economics and Rural Sociology Department, said the experience gained by the professors will enable the department to offer to undergraduate and graduate students strong courses in the fields of community development and social anthropology.

## Physicist Wins Scholarship For MIT Study

Matthew A. Nowak, assistant research physicist with the architectural research group of the Texas Engineering Experiment Station, has been granted a scholarship by Massachusetts Institute of Technology, to attend a special summer program on noise control, Aug. 22-Sept. 2.

Analyses of noise problems, measurement of noise, and application of modern techniques and materials to noise reduction will be studied. The program has been planned for teachers, researchers and engineers concerned with problems of controlling noises.

The techniques of instruction will be group problem-solving. Lectures in the conventional sense will not be presented. Student will work on an individual basis to analyze the given problem and then will join together as a group to compare notes and arrive at the best combined solution.

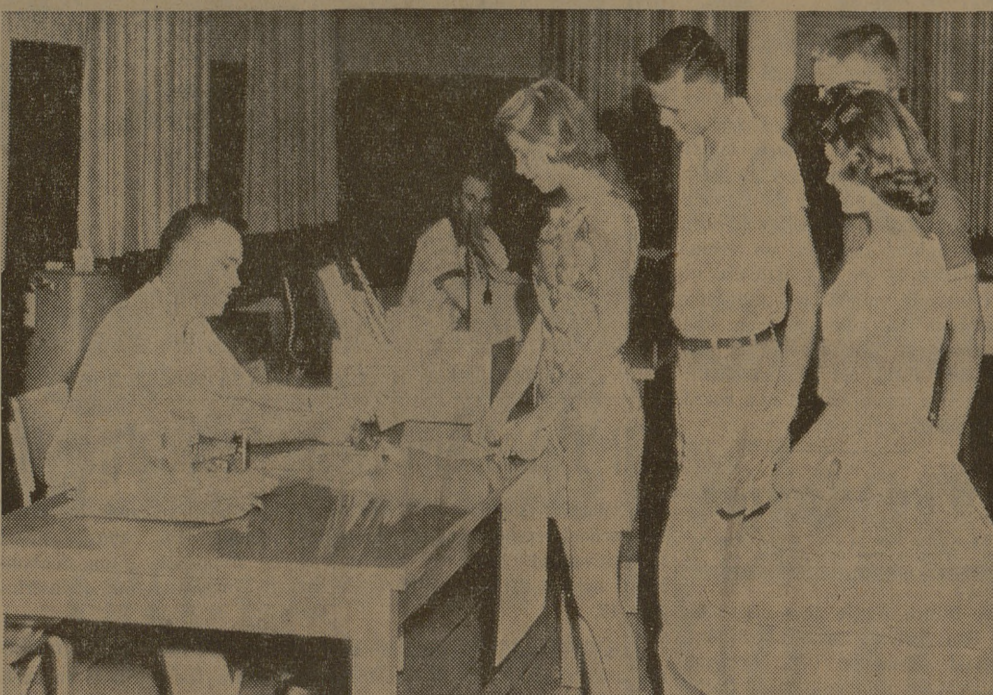

Of major interest will be problems involving the behavior of sound in buildings and the performance of sound absorbing and reflecting materials. The interfering of hearing, speech and comfort due to excessive noise levels will also be considered.

The program will be under the direction of Dr. Leo L. Beranek, lecturer on acoustics at M.I.T. Many other noted people in the field of acoustics will participate. Nowak is author of Research Report No. 64 entitled "A Sound Survey of the Geometric School," developed from architectural research by the Texas Engineering Experiment Station on the environmental factors—light, air, and sound.

## SA College Takes TJCPA Awards

San Antonio College was the sweepstakes winner in 1960 Texas Junior College Press Assn. school paper competition, according to Donald D. Burchard, head of the Department of Journalism and TJCPA advisor.

Amarillo Junior College came in second and Odessa Junior College in third place. Trophies will be awarded to sweepstakes winners, and certificates to individual winners, at the annual TJCPA conference on the A&M campus in November. Yearbook winners will compete in an additional contest in the fall.

### 4-H Club Registration

Lonnie Cole, farm management agent for the Agricultural Extension Service, seated, registers four of the more than 1,300 4-H boys and girls who registered Tuesday for their annual Roundup. The group concluded their Roundup on the campus this morning. Shown registering are, left to right, Julia Wendel, Adrew Kunze and Johnny Honea, all of Kerrville, and Shirley Secor of Ingram.

### Films Sunday; Dancer Tuesday

## Hawaiian Dancer, Films Begin MSC Activities

The first special entertainment program of the season, the first "Afternoon of Free Films" and the second summer dance are on the agenda for next week in the Memorial Student Center, topping a long list of attractions scheduled for the MSC's 1960 Summer Entertainment program.

The dance, tentatively set for the Starlight Terrace, will begin at 8:30 p.m. Monday and will feature music by a combo, according to the David Adams, summer dance chairman.

Mrs. J. L. Thurman, Hawaiian dance instructor, will open a series of six special entertainment programs planned for the summer, with a presentation of Hawaiian song and dance Tuesday at 8 p.m. in the Main Lounge. Assisted by her daughter, Dee, Mrs. Thurman will explain and give demonstrations of the dances, using authentic costumes and props.

A graduate of North Texas State College, Mrs. Thurman attended the Kahelelani Hawaiian Studio in Honolulu, Hawaii, while her husband was stationed in Honolulu.

## Methodist Church Gets New Associate, New Wesley Head

Two new men have been added to the A&M Methodist Church.

The Rev. C. E. Isom, former pastor of the Thorndale Methodist Church, has been named associate pastor of the A&M Methodist Church.

The Rev. Mr. Isom was appointed to the new post at the Texas Conference of the Methodist Church meeting Friday in Houston.

The Rev. James Argue, pastor of the A&M Methodist Church, was re-appointed to his post by Bishop A. Frank Smith.

The Rev. John Comb, present director of the Wesley Foundation at Oklahoma State University, was named to replace the Rev. Bob Cooper as director of the A&M Wesley Foundation, effective July 1. The Rev. Mr. Cooper has been granted a leave for study at Drew University at Madison, N. J.

The Rev. Mr. Isom is the first associate pastor of the A&M Methodist Church.

band was stationed in Honolulu from 1952-1955. She received her teacher's certificate for the instruction of Hawaiian dancing there, and was president of the Kahelelani Language Club.

The "Afternoon of Free Films" to begin at 2 p.m. Sunday in Rooms 2A-B-C, is the first of nine to be shown on Sundays throughout the summer. Featured this Sunday will be "Brainwashing," a documentary film made for "The Twentieth Century" television program; "Grizzly Golfer," a cartoon starring Mr. Magoo; and "Honduras," a travel film. There is no admission charge for these presentations.

Following Mrs. Thurman in the list of special entertainment programs will be a number of outstanding local artists, as well as some well-known Texas and national attractions.

At 8 p.m. Tuesday, June 21, "The Gulf Coast Giants of Jazz," a fifteen-piece band styled in the vein of Count Basie, Stan Kenton and other popular jazz bands, will give a concert in the MSC Ballroom.

A duo-piano concert, presenting Mrs. A. B. Medlen and Mrs. H. A. Luther, is scheduled for the Main Lounge of the MSC at 8 p.m. Tuesday, June 28.

Frances Carr, mezzo-contralto from Austin will sing a program of light and semi-classical music

at 8 p.m. Thursday, July 7, in the Main Lounge; and Sarah Watts, Bryan piano teacher, will be the featured artist at the same hour and place on Tuesday, July 19.

Mr. and Mrs. Bill Routt, experienced in drama, will present dramatic readings and a short, one-act play in the Main Lounge Tuesday, July 26, at 8 p.m.

Combining a thorough musical background with a talent for comedy, Marshall Izen, pianist-humorist, will perform in the Ballroom at 8 p.m. Tuesday, Aug. 2, and concluding the summer's special programs will be a film lecture on Russia by Neil Douglas, author-explorer-lecturer, in the Ballroom at 8 p.m. Thursday, Aug. 11.

In addition to the special entertainment programs and free films, the MSC summer entertainment agenda will include nine more dances, to be staged in the Ballroom, Lower Level or terrace on Monday or Tuesday nights; week night films in The Grove; and free art lessons for A&M students.

## Biology Prof Gets Grant For \$1,710

Dr. William J. Clark, assistant professor in the Department of Biology, has received a research grant totaling \$1,710, to enable him to continue researches already under way, Dr. C. C. Doak, head of the department, has announced.

The grant is from the A&M organized research fund. At present Clark is carrying on experiments to ascertain the effects of low level radiation on the growth of algal cultures, "very little being known about the radiation effects on lower plants," Doak says.

As his source of radiation Clark will employ the cobalt 60 installation of the radiation biology laboratory operated under the Engineering Experiment Station. Later when the Nuclear Science Center, now under construction, has been completed, Clark's experiments in this field will be extended to include other types of radiation and higher levels of intensity.

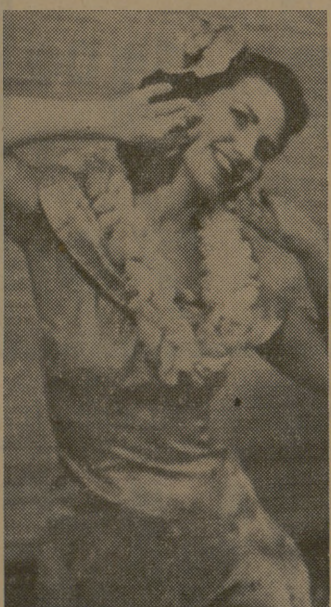

### First MSC Summer Dance

These students seemed to be enjoying themselves Tuesday night as the first of a series of weekly dances were held in the Memorial Student Center Lower Level. The dances will be held in the Lower Level, the MSC Ballroom and on the Starlight Terrace of the MSC. Gates Whiteley, Bryan junior, is chairman of the MSC Summer Directorate, which sponsors the dances. The dances will be held on Monday nights normally, with the exception of July 4, said Whiteley.

### The Long, Long, Long Line

Battalion Staff Photographer Jim Reed snapped this picture early Monday morning of the long line of students waiting to register for summer school at Sibisa Hall. Only a portion of the more than 2,000 who registered were in this shot. Official figures are expected next week. Final day for enrolling is today and students have until Friday to drop courses.
