

Ex-Purdue Prof Joins Faculty

Dr. Norman Gay, formerly of Purdue University, has joined the Texas Engineering Experiment Station as a research engineer and the Department of Mechanical Engineering as a professor.

As research engineer with the Engineering Experiment Station, Gay will head the heat-power group.

The scientist recently received his doctorate at Purdue. He received his B.S. degree in 1941 at the University of Rochester and his M.S. degree in 1943 at Cornell University. He was an associate professor at Cornell from 1950 to 1955 and worked with Bendix-Westinghouse from 1955 until 1958.

Gay and his wife, Mary Barbara, live at 1112 Edgewood in

Eighteen of the 20 players on North Carolina State's baseball team are from the Tar Heel state.

109 Alien Students Enroll Second Term

A total of 109 foreign students are enrolled in the second summer semester.

Bennie Zinn, director of the Department of Student Affairs, said the total includes 18 freshmen students, 7 sophomores, 8 juniors, 7 seniors, 57 graduates and 12 special students.

The students represent 29 countries, including Afghanistan, Bolivia, Brazil, Britain, Canada, China, Colombia, Cuba, Ecuador, El Salvador, Germany, Greece, Guatemala, Honduras, India, Iraq, Iran, Japan, Korea, Mexico, Nicaragua, Pakistan, Panama, Peru, Philippines, Portugal, Thailand, United Arab Republic and Venezuela.

New MSC Music Head

Robert L. Boone, presently director of chorus and drama with the El Campo Independent School District, was named last week to replace Dr. William F. Turner, as Memorial Student Center music coordinator.

Isotopes Use Extensive Here

A&M ranks high in the use of radioisotopes, according to Dr. Aaron Rose, director of the Texas Engineering Experiment Station.

A&M uses 23 isotopes in 14 departments on projects involving 42 staff members.

In typical A&M research, Cobalt 60 and Phosphorus 32 are being used in boll weevil and cotton seedling studies. Carbon 14 is being used in absorption of organic acids on clay mineral surfaces. It also is being used by the Department of Biochemistry and Nutrition to study glycerols and fatty acids. The Department of Biology is using the same radioisotope to study the metabolism of bacteria. Sulfur 35 is being used to trace the incorporation of sulfur in the synthesis of sulfur amino acids in pea roots.

An A&M research project with large economic implications is that of Carbon 14 being used to study the absorption and metabolism of DDT in the pink boll worm. Another important subject is the

be given one day and the results discussed with students the next day.

Ransdell said this is unusually fast service for any college.

This service makes it possible for the college to provide several testing and counseling clinics during the summer months, where students take the tests one day and scores are interpreted the next.

At the present time, A&M will accept tests scores from the College Entrance Examination Board Tests of Advanced Standing, or the American College Testing Program, or its own placement battery for purposes of placement and counsel. In certain cases, the director of admissions will ask a

student who cannot meet admission requirements to take the placement battery as a part of the overall consideration for entrance, Ransdell said.

ACADEMY

thing new in view of the state's present financial situation.

The Galveston senator-elect said \$75,000 in matching federal funds are available for such a school and that cadets in the program would receive \$600 annually from the government.

The board Friday directed its staff to study the proposal and to make a budget recommendation in time for the January session of the Legislature.

If LBJ Wins: What's in Store For Congress?

By TEX EASLEY
WASHINGTON, (AP)—The selection of Texas' Sen. Lyndon Johnson for the Democratic vice presidential nomination has stirred speculation on what will be the extent of his role in Congress should the Democrats win in November.

Officially, the vice president has little to do except serve as presiding officer of the Senate. He only votes to break a tie.

Many vice presidents have been figureheads—especially those who arrived on the scene with no Washington background.

John Nance Garner, now 92, and living in retirement in Uvalde, Tex., was a notable exception to the figurehead role. Garner, as vice president, exerted undoubted influence because of his long service in the House in which he once was Speaker—the job now held by another Texan, Sam Rayburn of Bonham.

Johnson, if he is elected vice president, probably would wield even more power than did Garner. Senate Democrats undoubtedly would turn to their old majority leader for advice and counsel—if for no other reason than habit.

Again, should Johnson be elected, he would preside over a Democratic-controlled Senate for at least the next two years.

Regardless of the November balloting, the Senate's Democratic majority will prevail in the new Congress—the 87th—that convenes early in January because of the party's present strength and the fact that only a third of the membership is up for election this fall.

It is difficult to imagine the energetic, dynamic Johnson confining himself to the single job of presiding over the Senate. This possibility surely was considered by John F. Kennedy, the party's presidential candidate, in recommending Johnson for the No. 2 spot on the ticket.

SAFE...

A desperate run . . . a frantic slide . . . the feel of the bag against your cleats . . . the belated tag of the shortstop's glove. Then a voice, clear, certain . . . final!

And though the cheers may be laced with hoots and screams of disapproval, you're safe. And nothing can change that fact!

Equally dramatic — and far more important — is the adventure that brings earnest men and women into the Church.

There is a point when we realize the inertia of half-believing. We plunge forward desperately, leaving behind yesterday's skepticism, seeking frantically the Truth that promises meaning and purpose for our life.

Then there's the thrilling moment — the dust of worldly confusion still all around us — when we know in our hearts we have found our faith. And always, above the strains of the organ, even above the clamor of a world unconvinced, there is a Voice, clear, certain . . . final — confirming our Faith.
