

# Students Allowed To Bring Cars, Security Chief Says

Through the combined efforts of students and Campus Security forces, A&M has a safe campus, according to Fred Hickman, chief of Campus Security.

"Students are welcome to bring their cars to the campus but certain procedures have to be observed and certain regulations abided by," Hickman added.

Under college regulations students must register their vehicles (including motor scooters and mo-

torcycles) at the Campus Security Office in the basement of the YMCA within 48 hours after their arrival on the campus.

This regulation applies only to cars that a student plans to keep on the campus.

After payment of a registration fee for \$3 per semester, a student will be issued a parking permit decal to be placed in the lower left hand corner of his windshield. This decal will have a particular

number, depending in which dormitory area a student lives. This number will indicate the parking lot in which the student may park his car.

During business hours campus streets are adequate only for handling of traffic necessary to college business.

These hours are from 8 a.m. until 5 p.m. Students' cars must be parked in their proper parking area by 2 a.m. Thus, between 5 p.m. and 2 a.m., Monday through Saturday mornings, students can park their cars in areas usually reserved for business. Twelve noon Saturday until 2 a.m. Monday are also free parking periods. Students cannot drive cars to classes. They may use them for off-campus trips during classroom hours provided no stops are made on the campus.

#### State Laws Rule

Texas laws governing traffic are effective on the campus. Speed limits are 20 and 30 m.p.h. and are posted. Pedestrians shall at all times have the right of way, and at intervals between classes, vehicular traffic is expected to stop for a sufficient period of time to allow pedestrians to cross drives and streets.

With the discussion of basic traffic regulations, next comes a discussion of what happens when a regulation is violated.

Under an authorization granted by the A&M Board of Directors, a

fee may be levied for regaining college driving rights taken from violators of college traffic laws.

The maximum fee authorized was \$2 for parking violations, \$3 for moving car violations and \$5 for violations of driving cars on campus after the permit has been withdrawn.

Under new regulations any student receiving five violation notices in one semester will have his parking privileges restricted for three months while in school. A thirty day period will be added for each unpaid notice.

Each violator has 72 hours to redeem the driving privileges without an additional fine being added.

At the bottom of every ticket issued will be instructions on how a violator may go about getting his car reinstated and the procedure and place to go. If the driver thinks the ticket is unwarranted, he should report to the Office of Campus Security where notice of appeal may be prepared.

In addition to regular tickets Campus Security patrolmen will issue some courtesy notices for the purpose of notifying and warning the driver of the vehicle. This notice is used because the patrolman believes that the driver will drive and park properly in the future.

A record of all notices will be maintained.

Guion Hall ... site of New Student Week meetings

### Films Shown on Weekends

## Guion Fills Varied Role: Auditorium and Theater

New students will find Guion Hall to be not only a place where meetings are held during New Student Week, but also a main source of enjoyment and relaxation here on the campus.

It has the distinction not only of being the largest, but also one of the few theaters located on a college campus.

Located between the Memorial Student Center and the Military Science Building, the theater, with a seating capacity of 1,925, is open Friday, Saturday and Sunday for the convenience of the students. A ticket costs only 40 cents as the theater is not set up to operate for a profit.

The films shown there are the newest available and of the variety desired most by the students. The only drawback is that the films may not be shown here for at least 30 days after they have been in Bryan and College Station theaters.

Built in 1917 and put into use in 1919, Guion Hall was originally used only for meetings, speeches and plays. Not until 1941 was it converted into a theater for the students.

Previous to World War II, pictures were shown on Wednesday and Saturday nights in the old Assembly Hall. This was located on the site now occupied by the All-Faiths Chapel. In 1941 all of the equipment and facilities were moved to Guion and started operation daily.

Services Include Grove Remodeling has been done recently which included the repairing and sand-blasting of the outside of the building and the remodeling and complete addition of a new men's rest room.

Wide screen viewing, stereophonic sound and the use of new projectors make inside the show very pleasant and modern. Also included for the students' convenience are soft drinks, popcorn and

confections which are sold at the concession stand.

Any profit from the operation of the theater will go into new equipment, improving the present facilities and back to the student in the form of entertainment.

Many important speeches and

presentations have taken place in Guion Hall. One of the many, which may be worthy of mention, was the presentation of an Honorary Doctor of Law degree to President Eisenhower. This was in April, 1946, on the Saturday before Easter Sunday.

## Corps Adjusts To Meet Demands

The Cadet Corps at Aggieland has taken on a new look.

The School of Military Science has made changes and progress is being made in the training of students to prepare them for the atomic and "jetonic" age.

The military training prepares the cadet for the future and provides him with a foundation for solving the complexities of life after graduation. The objective of the Corps of Cadets is fourfold:

a. To produce officers who have the qualities and attributes essential to their progressive and continued development as officers in a component of the Armed Forces of the United States of America.

b. To lay the foundation of intelligent citizenship for the cadet through a training program designed to be of benefit to him, to the State of Texas and to the nation whether in military or civilian life.

c. To provide strong training in basic principles of leadership including promptness, honesty, fairness, intelligence and common sense.

d. To develop a deep sense of responsibility, honor and integrity and to cultivate habits of cheerful obedience and precision in the maintenance of high standards of performance whatever the task.

The Army (ROTC) is teaching new pentomic army organization,

operations and tactics. The latest developments in equipment that is not classified are used; new concepts in logistic support to fast moving tactical units, made possible by automatic data processing systems, developed under the supervision of the Army Signal Corps, new trainfire techniques, a method of improving marksmanship quicker and more effectively or realistically are being taught.

The Department of Air Science is dedicated to training young men for the "jetonic" age. AFROTC cadets are given the latest up-to-date material, constant research is conducted by Headquarters, Air Force Base, Ala., and the various college detachments. Cadets (freshman) are offered a comprehensive picture of the total American air power and the places of military forces as instruments of national security; cadets (sophomores) become familiar with the elements of aerial warfare; cadets (junior) are given a comprehensive picture of the Air Force Base, its organization and distribution of responsibilities; during the senior year the preparation of a young man is concluded in a study of the principles of warfare and how they have evolved; his four years in the AFROTC program prepare him for a future career as an Air Force officer.
