

Drilling Course Plans Progressing

The Department of Petroleum Engineering is finalizing its plans for the presentation of the third session of the Advanced Drilling Engineering Course. It will be held Oct. 17-23.

The first week's courses will consist of a review of rocks and rock properties, circulating fluids in the bore hole, a study of drilling strings, rotary drilling bits, and a study of maintenance of the desired direction of the drilled bore hole.

The third session will be held on Monday evening of the first week of the third session, there will be a coffee held for the members of the petroleum engineering department and the attending students of this session of the Advanced Drilling Engineering Course.

The instructors include H. M. Moak, Drilco Oil Tools Inc., Midland; Ames Smith, Humble Oil and Refining Co., R.W. Ruhe Jr., Kinder Chambers, Magnet Cove Barium Corp., W. M. Koch, Reed Roller Bit Co., Frank Singletary, Houston Oil Field Material Co., all of Houston; H. G. Benson, Smith Tool Co., Compton, Calif. and R. L. Whiting, head, John R. Pedigo, Dan M. Bass, James W. Amyx, all of the Department of Petroleum Engineering.

Consolidated Band Small, Yet "They Really Blow"

"They're not very big, but they really blow!" That is the sentiment of Willard Johnson, band director at the A&M Consolidated School, beginning his first year in that capacity.

Director Johnson is a graduate of Oklahoma State University and a former member of the Oklahoma City Symphony.

He has had 20 years of experience in dance orchestra work, circus bands, a Shrine band in Tulsa, and Knights of Pythias band in Oklahoma City.

Two years ago he appeared with the Willard Dyer Trio on the Cactus Pryor television show over KTEC, Austin. He has had 15 years teaching experience.

The father of four children, he has one son, Willard, Jr., who is studying aeronautical engineering at the University of Texas; another son, Millard, who will enter the University for the spring semester; a married daughter living in Tulsa; and another daughter, Dorothea, who is a senior at Stephen F. Austin High School.

Aside from his musical vocation, Johnson has had several years of experience as a tool and die maker. "My first love is band work, though," avows the new director.

"I just hope everybody will turn out for the carnival Oct. 8 at Consolidated to show they are behind our band 100 percent."

Over \$500 was netted from last year's carnival. This money went toward expenses and purchases for the band, which included two French horns, two tenor saxophones, a bass horn and music.

This year's carnival, under the chairmanship of Dr. and Mrs. John Sperry, will begin at 5:30 p.m. At that time serving will begin of foods such as hamburgers, hot dogs, homemade pies, cakes and candy and cold drinks.

DISPLAY BOOTH

(Continued From Page 1) by as the Aggies set up the display.

The display booth is arranged in a U-shape, with a large seal of the college positioned on the back wall. It is bordered on each side by large placard pictures illustrating facets of student life and facilities available at A&M.

Three ROTC flags of different cadet units, relics of the "Old Army Days" are hanging on each of the side walls, and below the flags are models of various new buildings on the campus, on tables.

On another table are samples of all student publications, and brochures and pamphlets are available for interested persons who come to look at the display.

While the booth is open, a record player will be playing songs of Aggieland as background music for the display.

There will be two Waco Aggies in the booth at all times, and different members of the Home-town Club will alternate working in the booth during the week.

The booth is a joint effort between the Hometown Club and the Waco Former Students Assn., and men on each end of the project have been working steadily since the start of the semester.

Wayne Dickens, Class of '57, has personally been in charge of the Former Students Assn.'s work in Waco on the booth, and Bill James, senior from Waco, has been heading the work on the campus.

Other members of the Waco Hometown Club who will participate in working at the display booth include James Noack, Charles Brame, Jim McBride, David Callan, Charles Morse, Dave Dickens and John Prickett. Other members will periodically go up to help out during the week.

"This is the first time the Waco Hometown Club and Former Students Assn. has initiated a booth to represent A&M at the fair, and we hope it brings results through promoting interest in A&M among the general cross-section of the public who will have opportunity to see the display while at the fair.

Seeing Eye Dog Examined

A worried owner and two Dallas County veterinarians flew a German Shepherd dog from Dallas Friday for examination by doctors of the Veterinary Hospital. Eight-year-old "Christa," who is "the eyes" for M. W. Laroooy of Dallas, was feared the victim of a paralyzing disease. Results of the examination will be known in a few days. (AP Wirephoto.)

Seeing Eye Dog Examined Here; Returned To Job

An ailing seeing eye dog, receiving the style of treatment usually reserved for humans, has been flown to and from the College Veterinary Hospital in one day.

The German Shepherd, owned by M. Laroooy of Dallas, was flown to the college Friday. Here the dog received a thorough radiographic examination to determine the nature of its aches and pains. After the examination by Dr. William C. Banks, Professor of Veterinary Medicine and Surgery, the animal was soon back on a plane headed for home.

The dog was accompanied on the plane by Dr. Herman Deiterich and Dr. F. D. Prater, two Dallas veterinarians.

FOR NEW YEAR

Effectiveness To Be Stressed By TYF

Special To The Battalion Texas Young Farmers will be concentrating efforts upon making their organizations more effective this fall, according to Dr. J. R. Jackson, State Associate Young Farmer Advisor and member of the Department of Agricultural Education.

Chapter officers across the state will work in area-wide meetings and in specific training programs to improve their own efficiency as officers. State Young Farmer officers believe the result will be more effective chapters in all parts of the state.

The Texas Young Farmers organization is made up of men under 36 years of age who work in agricultural occupations and who wish to see improvement of agriculture. They hold regular meetings, secure programs helpful to the efficient production and distribution of agricultural products, exchange information and in other ways improve agriculture in their communities.

Many chapter programs of work include assistance to livestock shows, fairs, conservation and safety programs and rural youth activities. They function through local school districts with the endorsement of the superintendent of schools and with the active assistance of the vocational agriculture teacher.

George Hurt, State Director of Agricultural Education for Texas

Education Agency, serves as State Advisor to the organization. E. L. Tiner, a member of the Texas Education Agency staff, has direct responsibility for assistance to the group. Each of the ten area supervisors of vocational agriculture in Texas serves as an area advisor.

The series of training programs for officers will begin in September and will run through December, according to Jackson. A&M will offer the training in cooperation with the organization and with Texas Education Agency.

Locations of the training programs include Burleson, Oct. 10; Livingston and Kirbyville, Oct. 25-27; A&M and Wharton, Nov. 1-2; Honey Grove, Nov. 7; Bellvue and Stephenville, Nov. 9-10; Sulphur Springs, Nov. 14, and Laredo, Dec. 2-3.

SWEETHEART

(Continued From Page 1) their first big caucus—two hours.

Sunday morning the Aggies and the Sweetheart finalists attended church at TWU's "Chapel in the Woods." Then they went to Hubbard Hall for breakfast, followed by still another caucus.

Miss Kuehn will be officially presented as the "Aggie Sweetheart for 1960" at the A&M-SMU game in Dallas Nov. 5. She will be presented to the A&M student body at a Yell Practice Thursday night, Nov. 3.

Large advertisement for Western Electric. Text: "8,000 Management Opportunities! That's right. There will be 8,000 supervisory jobs filled from within the Western Electric Company by college graduates in just the next ten years! How come? Because there's the kind of upward movement at Western Electric that spells executive opportunity. Young men in engineering and other professional work can choose between two paths of advancement—one within their own technical field and one within over-all management. Your progress up-the-ladder to executive positions will be aided by a number of special programs. The annual company-wide personnel survey helps select management prospects. This ties in with planned rotational development, including transfers between Bell Companies and experience in a wide variety of fields. Western Electric maintains its own full-time graduate engineering training program, and offers advanced courses, and a tuition refund plan for college study. After joining Western Electric, you'll be planning production of a steady stream of communications products—electronic switching, carrier, microwave and missile guidance systems and components such as transistors, diodes, ferrites, etc. Every day, engineers at our manufacturing plants are working to bring new developments of our associates at Bell Telephone Laboratories into practical reality. In short, 'the sky's your limit' at Western Electric. Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical scientists, liberal arts, and business majors. For more information, get your copy of Consider a Career at Western Electric from your Placement Officer. Or write College Relations, Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. Be sure to arrange for a Western Electric interview with the Bell System team visits your campus. Western Electric Manufacturing and Supply Unit of the Bell System."
