## CORPS TRIP REVELRY

### Enormous Dallas Party Brewing: 'A Real Blast'

The largest and perhaps finest party in the annals of A&M Corps Trips is brewing in Dallas.

Being planned by the Dallas A&M Club as an aftermath of the Cadet-Southern Methodist University grid clash Nov. 5, the party has taken on enormous aspects.

All students of A&M, in addition to former students and students at Texas Women's University, have been invited to attend. The "blast," as it is called, will be held in the Dallas Memorial Auditorium with three orchestras playing to the expected massive audience on both floors of the spacious structure.

Charlie Howard of the Class of '48, who is head of the committee planning, said that the closed party will begin at 9 p.m. and continue to the convenience of those in attendance. Liquid refreshments will be served.

He also added that there will be

continuous music by three top bands—Ted Weems, Jimmy Palmer and the Dave Klein Trio. The Weems and the Palmer groups will appear on either the first and second floors with the Trio spelling one during intermission.

The Dallas Club has already committed themselves to \$5,000 for the festivities.

Overall planning for the party calls for some 75,000 square feet of space for dancing—something like 15 square feet per person. Also, the various units on campus will be seated according to outfits and dormitories, with an expected 1,700 couples occupying the first floor and 750 occupying the second floor.

That's almost 5,000 people. Tickets to the party will be sold by outfits in the Corps of Cadets and by dormitories in the civilians. Price for the dance is \$4, stag or drag.

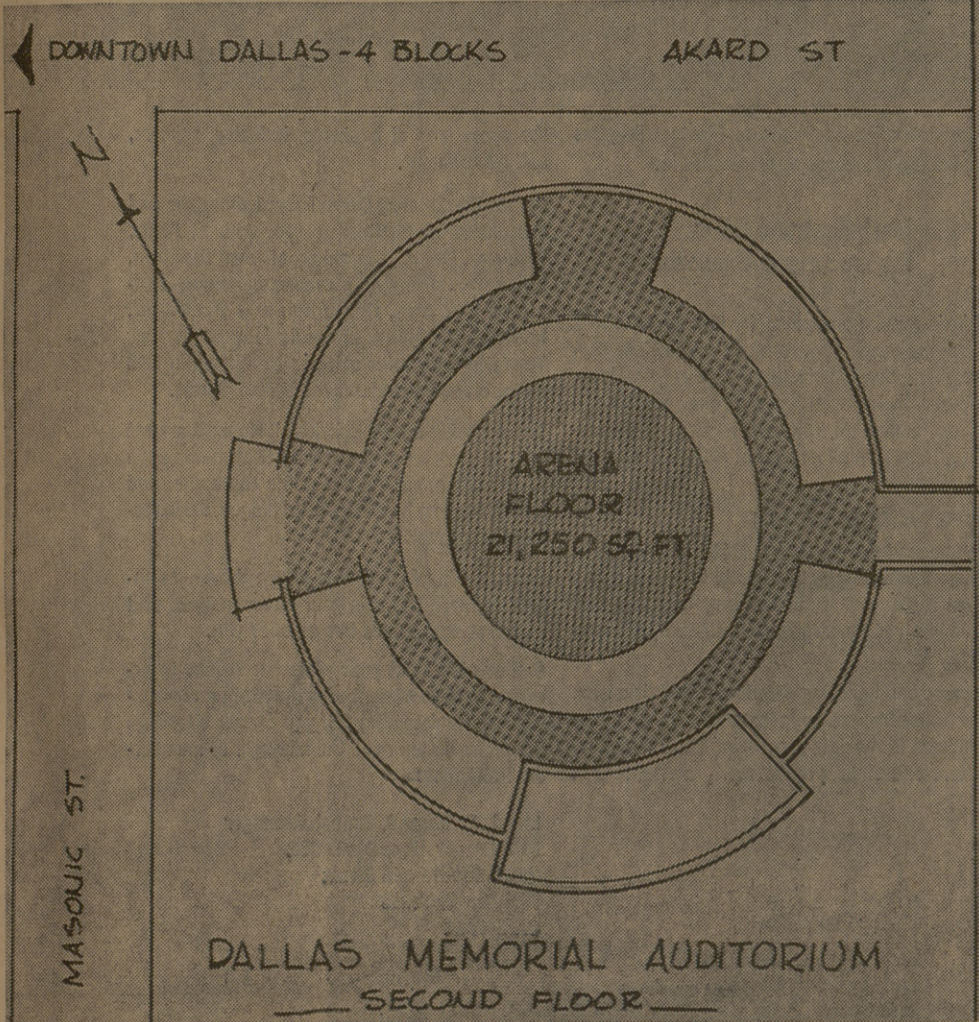

The Dallas Club suggests that those attending wear slacks and sports shirts or better. The Club also emphasized that there will be no tipping, as the Dallas Club plans to take care of that.

Howard said the Dallas Club wanted the party to be "for the students of Texas A&M."

"It's your party," he said, "and if it is successful, we plan to make it an annual affair. It could be held again next year following the A&M-Texas Christian University game in Fort Worth."

Howard also disclosed that the Former Students are being required to pay more than A&M students, \$5.

Tickets for the party go off sale this Friday at 5 p.m. at the Cashier's Cage in the Memorial Student Center. Ducats may be purchased at the door, but only with identification cards.

## Siege Of Flu, Minor Ills, Colds Bring Hospital Rush

### Flu Vaccine Now Available

"Right now, we are experiencing the worst onslaught of flu, colds, sore throats and other ailments of a similar nature than we have had in three years," said Dr. C. R. Lyons, director of student health services, yesterday.

Lyons said the siege of flu and colds started after the A&M-Texas Tech game a week ago, caused by the drenching received by the entire student body at the game.

During the first of the week, the hospital had a marked increase in patients, and a total count of cold and flu cases since Sept. 29 totals 532 Aggies treated at the hospital, in five days.

Averaging 150-300

"We are averaging from 150 to 300 patients a day, with about half of them colds and other respiratory congestion ailments. The number of colds has begun decreasing in the past day though," said Dr. Lyons.

Last night, there were 28 patients in the hospital, most being flu cases, with one case of pneumonia reported.

"We are not dealing with Asian flu this time; it is more of a virus variety," said Dr. Lyons. "The patients are usually in bed two or three days, until their fever comes down to normal temperature, and then we release them, making room for someone else," he added.

The doctor advised the best resistance builder is enough sleep, and said this explains why the majority of flu cases are freshmen. Not yet being totally adjusted to the active lives they have been leading these past two weeks is a determining factor, said Dr. Lyons.

"We have been able to handle the students with colds much better now that we have opened our cold clinic. We have hired another nurse, and have been treating a larger number of students as a result," said Dr. Lyons.

Vaccine Available  
Flu vaccine is available at the hospital, and Dr. Lyons has urged that all students get a flu shot as soon as possible since the disease has become a major problem. The one shot costs \$1, and will be followed by another in the spring.

"The situation is not a real emergency yet, but it is the worst we have had since three years ago when we had 2,000 students stricken with the Asian flu," said Dr. Lyons. "We are getting less cases, now, and with good weather and more sleep, the students should be able to resist catching flu or cold," he added.

The hospital staff urges that students desiring treatment come to the hospital between 8 a.m. and 5 p.m. during the day. With the (See SIEGE On Page 3)

Persons attending will hear also speeches on the role of railroads, utility companies, city governments, and chambers of commerce in industrial development in the 1960's. They will also be given a glimpse of the expected economy of the entire United States for the forthcoming decade.

At the end of the first day's sessions the conferees and speakers will be guests of the Bryan Industrial Foundation, Inc., for a social hour.

Speeches of the conference will be published by the college in the interest of industrial development.

## World Wrap-Up

By The Associated Press

### Chances for Ike-Khrushchev Meet Collapse

UNITED NATIONS, N. Y.—Chances for a new meeting of President Eisenhower and Premier Nikita S. Khrushchev collapsed Tuesday. The Soviet leader, shaken by a series of setbacks, was reported planning a new round of U.N. fireworks.

Khrushchev is considered by Western circles to have overplayed his hand badly and to have maneuvered himself into an awkward position. He is expected now to turn the major share of his attention to making things as hot as possible for U.N. Secretary-General Dag Hammarskjold in an attempt to force him out of office.

The Soviet leader's new fireworks, some sources said, would indicate Khrushchev's anxiety to salvage something from this session which could be presented as a victory to Soviet and Communist populations when he returns to Moscow.

### 36 Killed in Boston Plane Crash

BOSTON—An Eastern Airlines plane carrying 67 passengers and a crew of five flopped into Boston Harbor late Tuesday only moments after leaving the runway for a southbound flight.

Two hours later there were 13 known survivors and about 36 bodies recovered.

The turbo-prop Electra had just taken off from Logan International Airport for Philadelphia, the Carolinas and Georgia. It came down in muddy water about 200 yards offshore.

## Civilians Discuss School Government

The civilian side of student government here at A&M was reportedly thoroughly discussed over the weekend by 17 Aggies at the Civilian Student Leadership Retreat held at the Lakeview Methodist Assembly area south of Palestine.

Two special addresses, workshops covering four major civilian student government problems, a banquet and specially-provided recreation featured the informal gathering, which began Friday night and continued through 8 p.m. Saturday.

William G. Breazeale, a civilian student counselor and head of the civilian student affairs office, offered the keynote address opening the meeting Friday night.

First Assembly  
Breazeale's address followed the group's first assembly and registration proceedings. Louis Piazza offered the invocation at the initial assembly.

The four workshops were conducted Saturday, two in the morning and the others in the afternoon, stretching up until 6 p.m.

The morning sessions covered the questions "how to motivate the civilian student to take part in campus and dormitory activities" and "the scope and purpose of the civilian dormitory council."

In the first discussion Jimmy Kent discussed the question in regard to the dormitory council, Elmo Hunter followed with a discussion of the problem in regard to various civilian organizations and Harry Goss concluded with a discussion of the problem in regard to student government.

Second Workshop  
The second workshop, which began at 1 a.m., featured two workshop groups working on the problem, "the scope and purpose of the civilian dormitory council." Bill Flynt discussed the role of the dormitory council assistant to the housemaster and Paul Corder explained what new areas of work can be explored.

Following lunch at noon, the third workshop began with a discussion of student-administrative relations. Here John Malahik theorized how improvements in communication between administration and civilian students can

## Hannigan To Speak To Student Senate

The Student Senate will hold its second regular meeting of the year Thursday night at 7:30 in the Senate Chamber of the Memorial Student Center.

Dean of Students James P. Hannigan will be the guest speaker at the meeting. One aspect of his talk will be closer coordination between student clubs on the campus and how they can work closer with the Student Senate.

President of this year's Senate is Roland Dommert. Vice President is Norris Gilbreath, and Recording Secretary is Jack Spillman.

## Vet Checks Slated To Arrive Oct. 31

Reports indicate GI Bill checks from the Veterans Administration will be received here on or around Oct. 31.

Bennie A. Zinn, veterans advisor, said yesterday word has been received from the Administration indicating the checks will be dated Oct. 31 and probably will be released at the same time.

## Aggie Rodeo Events to Run Three Nights

The 39th Annual All-Aggie Rodeo opens Thursday night at 8 p.m. in the rodeo arena with performances scheduled for Thursday, Friday and Saturday nights.

The rodeo is sponsored by the Saddle and Siroloin Club. It will feature events such as calf roping, ribbon roping, bareback bronc riding, saddle bronc riding, steer dogging and bull riding.

In addition to these expected events, this year the All-Aggie Rodeo has added a girl's barrel race. Sanctioned by the Texas Barrel Racer's Assn., the event is expected to attract many of Texas' foremost cowgirls.

An intramural wild cow saddling contest and a calf scramble will also be featured. Any amateur cowboy in the Corps may enter these intramural events; the prize being intramural points for his outfit.

Judges for the rodeo will be Ken Dorris and A. G. Ollre.

Outstanding contestants entered in the rodeo include Kenneth Beasley and Lynn Turner, All-Around Cowboys in 1959 and Rodney Butler, bareback bronc riding champ.

Others include Phillip Cox, outstanding bull and bareback bronc rider and Joe Neff, president of the Rodeo Club.

The Aggie Rodeo drew a record crowd last year, with interest shown by local and distant fans. Observers of last year's rodeo rated it as one of the top collegiate rodeos in the nation. The 1960 show is to be bigger and more exciting.

Tickets for the All-Aggie Rodeo are available from any Saddle and Siroloin Club member, or they may be bought at the gate.

## Oceanography Prof In NY Discussion

"Oceanographic Requirements vs. Instrumentation Capabilities," were discussed by Roy D. Gaul, research scientist in the Department of Oceanography and Meteorology, and J. J. Schule Jr., head of the Applied Oceanography Branch of the U. S. Navy Hydrographic Office in Washington, D. C. at the 15th annual Instrumentation-Automation Conference in New York.

"The main argument presented in this paper," Gaul and Schule pointed out, "is that the physical study of the ocean, especially from the standpoint of short term dynamic interaction of natural phenomena, is crippled by standard measurement methods and cannot meet research demands without technological modernization.

"Manpower and money applied to instrumentation and data technique through the medium of missiles has blessed us with techniques and hardware which can and should find immediate application in many oceanographic research programs.

"If the recent industrial interest in oceanography as a potential market is to be kept alive oceanographers must light the day by defining their needs and promoting support for urgently needed ambitious programs.

"Long range telemetry must be considered as preferable to field recording. An automatic data reduction system must, at high speed, convert raw data to computer ready format with a maximum of control and flexibility.

"Digital or analog computer systems are highly developed and present the least problem for inte-
