

Local Churches Announce Schedule

The following church schedules have been announced for this weekend:

St. Thomas' Chapel The Sunday services for Oct. 30 are Holy Communion at 8 a.m., Offices of Instruction and Morning Prayer at 9:15 a.m., Church School at 9:45 a.m., Offices of Instruction and Morning Prayer at 11:00 a.m., YPSL at 6 p.m. and Evening Prayer at 7.

Bethel Lutheran Church Sunday morning worship at 8:15 and 10:45; the topic will be "Why Observe Reformation Day?" Sun-

day School and Bible classes will meet at 9:30 a.m.

A&M Presbyterian Church The Sunday morning services are the Aggie Welcome Coffee at 9:30, Sunday School at 9:45 and Morning Worship at 11. Sunday afternoon the Junior Choir will rehearse at 4 and the Leagues will meet at 5. The Chancel Choir will practice at 7 p.m. on Wednesday.

A&M Church of Christ The Sunday morning services are Bible School at 9:45, Worship Service at 10:45. The services Sunday afternoon are Young People's classes at 6:15, Aggie class

at 6:30 and the Worship Service at 7:15. At 9:30 a.m. on Tuesday the Ladies' Bible Class will meet and at 7:15 p.m. on Wednesday there will be the Mid-Week Services.

A&M Methodist Church The Morning Worship will be at 10:55 and the guest speaker will be Bishop Paul E. Martin of Houston.

First Baptist Church Miss Luwilda McKaig will speak at the Greater Council meeting of the BSU and at the Vespers in the Baptist Student Center at 7 p.m. Tuesday night.

Aggie Ex, '34 Finds Art Form

Special To The Battalion A new idea in art, based upon a combination of lights and lighting effects, metallic threads and mobiles, has been developed by a graduate of the Class of 1934.

Frank J. Malina, the developer of this art, first got his idea and opportunity to display his skill in making figures for books two A&M professors were writing at that time.

H. C. Spencer, Head of the Department of Engineering Drawing, and V. M. Faures of the Department of Mechanical Engineering at that time, employed young Malina, a native of Brenham, to draw the figures for their books, at 25 cents an hour. He did a good job—it helped pay his way through college.

Malina graduated high in his class with a BS in mechanical engineering—and he went to California Tech to do graduate work in aeronautical engineering. He received his degrees in mechanical and aeronautical engineering and his PhD degree.

While at Cal Tech, he studied and worked under Theo von Karman, internationally recognized leader in the field of aeronautical engineering and rocketry.

Malina and von Karman became fast friends—and he described as a protege of the world famous leader in this field.

Much of his work and research was done in the field of rocketry. Malina became recognized in this field and presented several papers in New York on rockets and similar subjects.

In the meantime Malina and four other men formed a small research corporation known as Aerojet with headquarters in Pasadena, Calif.

Here they contributed to the research project for the U. S. government which produced the WAAC CORPORAL, first operative rocket.

When UNESCO was formed, Malina, not content to work on machines, went with them to Paris where he became deputy director of the Science Division.

He held this post for several years during which time he devoted some time to his new idea in art. He gave up his post with UNESCO and now devotes most of his time to his art.

Von Karman never forgot his young friend—and last year he asked Malina to aid in organizing the International Academy of Astronautics—and today he heads several committees.

Malina, his wife and two sons, live in Paris, France. The company he helped form in Pasadena is paying off handsomely for him. He is financially able to pursue his art.

Not bad for a young man fresh from Brenham, who got his start at A&M.

PROFESSOR DECLARES Farm Management Lab One of Best

Three years ago the farm and ranch management laboratory was inadequate and in need of equipment, according to Dr. Vance W. Edmondson, an associate professor in the Department of Agricultural Economics and Sociology.

Today, he said, it is one of the best in the nation because of adequate equipment, advanced methods of teaching and a young, experienced teaching staff.

Twenty-nine calculating machines in the laboratory, valued at \$13,500, make up the new equipment. These machines, Edmondson said, are the "tractors" in learning and teaching farm and ranch management. They are used each semester by approximately 75 students taking production economics, farm and ranch records and accounts and farm and ranch management courses.

The laboratory is used for practice analysis in farm and ranch business programming. This practice consists of training in business analysis of farms and ranches in operation and planning their actual organization and operation.

The laboratory's central goal, Edmondson said, is to calculate different methods and find the highest net profit.

Training Procedures The procedure of the practice training, he said, is "(1) visiting actual farms and ranches to study their operating methods, (2) an-

alyzing the business results of the farms and ranches visited, (3) analyzing research data collected by the Department of Agricultural Economics and Sociology, (4) planning the actual organization and operation of farms and ranches and (5) other exercises for management practices."

Farm and ranch management graduate students have the advantage of the latest classroom and laboratory equipment and the latest ideas and techniques in business analysis and farm and ranch planning, according to Edmondson. The new laboratory machines are supplemented with the Data Processing Center's IBM machines for graduate student use.

"This department has one of the best young teaching staffs in farm and ranch management in the United States," Edmondson said. "And in addition to their varied experience, the men have degrees from different leading universities of the nation."

The teaching staff consists of A. C. McGee, chairman of the farm and ranch management section; Edmondson, Dr. Kenneth R. Tefertiller and Dr. Peter E. Hildebrand, assistant professors.

ACTIVITIES

(Continued from Page 1) morial Student Center will start bouncing. The music of four different bands will herald "Midnight in New Orleans."

This special feature of the MSC Dance Committee will start immediately after the game and last until 12:30 a. m. Benny Wadsworth is chairman of the special subcommittee in charge of the event.

Music will come from the Texas Western Playboys, Bo Lee and his Combo, Bill Nauralt and his orchestra and Silvester Munoz and the Stardusters.

Only couples will be admitted to the dance and tickets are \$2. Each band will hold forth in a different section of the MSC.

Mrs. Texas A&M To Be Selected During December

The Aggie Wives Council is sponsoring a contest to find Mrs. Texas A&M. The winner of the title will be named at a dance to be held by the council in December.

"We want all Aggie wives to enter the contest," said Mrs. Jean Vaught, chairman of the event.

"We also want all the clubs on the campus to sponsor entries. The only requirement is that the entry must be the wife of a current student at Texas A&M," she added.

The dance, to be held in the Ballroom of the Memorial Student Center Dec. 3, will last from 8 p. m. to 12 midnight. The Aggie-Land Combo will play for the affair. Tickets are \$2 per couple.

Mrs. Vaught emphasized that the council will not make anything on the dance. All funds are given to charity at the end of the year.

FIGHT BACK! Help preserve masculine prerogatives!

Help fight creeping matriarchy! Join SMK. No dues. No meetings. One obligation only. Smoke your Kaywoodie often—especially among women. Flaunt its manly grain. Tantalize them with the lush tobacco-and-briar aroma. But never let them savor a puff! Kaywoodie flavor, mildness, and relaxation—all without inhaling—are strictly male. Will this return women to bondage? Maybe not. But it will be a brave exercise of your male prerogative... and pleasurable to boot.

KAYWOODIE accents the male look

do girls go to your head? Or do they just go? If so try Vaseline Hair Tonic—made specially for men who use water with their hair tonic (and who doesn't!). Vaseline Hair Tonic's 100% pure, light grooming oil replaces oil that water removes. It will not evaporate—will stay clear and clean. Your hair looks great, stays neater longer. Just a little does a lot!
