Defense

This is just some of the defensive stamina displayed in the Fish-Kitten game last night as Dickie Kubecka (82) of Palacios and another unidentified Fish bring down Kitten Buzzy Poage (41) after a short gain.

American League Plans 10-Team League for 1961

By JACK HAND
Associated Press Sports Writer
NEW YORK — The American League pushed ahead Thursday plans to run a 10-team league in 1961 despite word that Commissioner Ford Frick wished they had waited until 1962.

Hank Greenberg and Bill Veeck reportedly were headed for Los Angeles where a new franchise will be established. Three groups were interested in the new Washington franchise, made possible by Calvin Griffith's decision to move the Senators to Minneapolis-St. Paul.

"I told American League President Joe Cronin that trying to get started in 1961 constituted quite a problem," said Frick.

"That it was doing things awfully fast and I wished they might have waited until 1962."

The National League last week voted to expand to 10 teams by adding Houston and New York in 1962. The American League beat the gun Wednesday by deciding to branch out next year.

Despite claims by Bill Shea, founder of the Continental League, that the American had "reneged" on its agreement and was "double crossing" the defunct circuit, Frick said he was satisfied that the American had met its commitments.

"At first I was concerned about any commitment that might have been made to the Continental League," said Frick. But I have

been assured that the American League's four-man expansion committee did in to the meeting and recommended the two clubs be added from the Continental but that it could not be passed."

Frick indicated this action had been taken, but not announced, at an earlier American League meeting. He refused to identify the clubs that the four-man group recommended but they were believed to have been Minneapolis-St. Paul and Dallas-Fort Worth.

The problem of stocking the two franchises with new owners, general managers, players, scouts and, in the case of Los Angeles, a ball park, remained to be settled before the next meeting Nov. 17 in New York.

Frick said several requirements would have to be met before the new clubs could participate in the minor league draft Nov. 28 at Louisville. It was expected the new National League cities as well as the new American cities would take part in the draft if the owners and stockholders had been approved and other problems solved.

'Weak Brother' Named 1960 Soph-of-Year

By The Associated Press
NEW YORK—Jim Perry, the one-time "weak brother," in a pitching family who became the ace of Cleveland's mound staff, Thursday was named American League sophomore-of-the-year for 1960.

The 6-foot-4 right-hander received 97 of the 188 votes cast by baseball writers in the annual Associated Press poll. Jack Fisher, Baltimore right-hander, was the runner-up with 57.

Perry tied rookie Chuck Estrada of the Orioles for most victories in the league the past season. He won 18, lost 10 and had an earned run average of 3-62 while posting four shutouts.

Perry, who will be 24 this Sunday, got a bonus estimated at \$4,000 for signing with the Indians in 1956.

Aggies One TD Underdog To Porkers

By HAROLD V. RATLIFF
Associated Press Sports Writer
Four games Saturday are expected to maintain the status quo in Southwest Conference football—Baylor and Rice tied for the lead, Arkansas next and Texas fourth.

But some upsets—and this is the time of the year for them—could throw the race into a mad jumble, that's how close it is.

Undefeated, untied Baylor tries for its sixth straight triumph and four conference victory in a battle with deadly enemy Texas Christian at Fort Worth.

Rice, the team that came from nowhere to co-favoritism, hosts Texas Tech as the two teams play a conference for the first time.

Arkansas journeys to College Station to swipe at the sullen Texas Aggies, needing a victory to stay in the race.

Texas and Southern Methodist, both already eliminated from championship contention, play a three out of six but has enough left to soundly beat the Methodists, Arkansas-A&M—Victory for Arkansas but it won't be easy.

Baylor is a touchdown favorite over TCU and will be delighted to make it. Frogs have always been Baylor's most painful thorn and it's a win-or-else affair. TCU can stay remotely in the race by taking the decision.

Rice is a two-touchdown choice over Tech and the records indicate it. The Owls walloped SMU 47-0 and SMU lost to Tech 28-7. Rice beat Texas 7-0 and Texas licked the Red Raiders 17-0. Arkansas is a touchdown favorite over A&M. Texas is a whopping 20-point selection over SMU.

Here's how they look:
Baylor-TCU—A weak vote for Baylor to continue on the unbeaten trail.
Rice-Texas Tech—Can't see less than a two-touchdown margin for Rice.
Texas-SMU—Texas has lost

Offense

And this is some of the Fish's powerful offense as Jim Farris of Austin High in Houston cuts around left end for a substantial gain.

Engineers!

Scientists!

WE'RE LOOKING FORWARD TO MEETING YOU

Last year we had the pleasure of meeting many engineering and science seniors during our visit to the campus. As a result of our discussions, a gratifying number chose to join our company.

We'll be back on the dates below, and this notice is your invitation to come in and see us.

If you're interested in joining a company that's a leader in fields-with-a-future, you'll be interested in the advantages Boeing can offer you. Boeing is a major contractor on the advanced solid-fuel ICBM, Minuteman; on the boost-glide vehicle, Dyna Soar, and on the BOMARC defense missile system. Boeing's Vertol Division is one of the country's foremost builders of helicopters.

Boeing is also the nation's foremost designer and builder of multi-jet aircraft. Production includes eight-jet B-52G missile bombers, KC-135 jet transport-tankers and the famous Boeing 707 and 720 jet airliners.

Research projects at Boeing include celestial mechanics, solid state physics, nuclear and plasma physics, advanced propulsion systems, and space flight.

Expanding programs offer exceptional career opportunities to holders of B.S., M.S. and Ph.D. degrees in aeronautical, mechanical, civil, electrical-electronic and industrial engineering, and in engineering mechanics, engineering physics as well as in mathematics and physics. At Boeing you'll work in a small group where individual ability and initiative get plenty of visibility. You'll enjoy many other advantages, including an opportunity to take graduate studies at company expense to help you get ahead faster.

We hope you'll arrange an interview through your Placement Office. We're looking forward to meeting you.
