

Wayne Labar  
... runs like a duck

## Short, Squatty and Steady- Left Guard Wayne Labar

By LARRY SMITH  
One of the steadiest players on the Aggie team this season is short, squatty, senior left guard Wayne Labar.

Wayne, who stands a full 5-9½ and weighs 200 pounds played one of his best games of his fruitful career in the Aggies spirited tie with the TCU Horned Frogs.

**HS Fullback**  
A fullback in high school, in the valley town of Harlingen, Wayne came to the Aggies at this position. In his sophomore year he was moved to guard and later on shifted to blocking back in Coach Jim Myers' once used single wing. Labar relates that "I kind of liked blocking back, and even caught a few passes."

Through the Aggies first seven games, Wayne has started at the guard position and his No. 60 jersey is constantly coming up from the bottom of the pile.

One of the shortest men of the team, Wayne is always having height measurements with another Wayne — Wayne Freiling. Labar laughs, "We still haven't decided

on who is the tallest, one day I'll take the honors and the next, he will."

**Three Year Letterman**  
One of the seven three year lettermen on the squad this fall, Wayne could not decide between offense and defense, "I just guess I like them both about equally," he said.

Wayne, whose nickname is Leeper, is an education major and also one of many married players on the Aggie team. He and his pretty brunette wife, Janice were married last December.

**Runs Like Duck**  
Labar, with his very short legs, has one of the most unique running styles on the Aggie squad. When running to and from the bench during a game, he looks similar to a little duck waddling to the sidelines for a breather. Only teammate Babe Craig can compare with Wayne and his running style. A person can tell by talking to Wayne that the Aggies have really been fighting this season. The scratches on his face show signs of tough battle in the middle of the line.

## Unbeaten Iowa Remains Top Team in AP Football Poll

By The Associated Press  
The unbeaten Iowa Hawkeyes remain the No. 1 college football team of the nation for the third straight week of the Associated Press poll of sports writers and sportscasters.

With Syracuse and Baylor dropping from the ranks of the unbeaten and Mississippi being held to a 6-6 tie by Louisiana in other top 10 rankings.

The leaders with first-place votes, points figured on a 10-9-8-7-6-5-4-3-2-1 basis:

1. Iowa	46	476
2. Missouri	359	
3. Minnesota	1	350
4. Navy	324	
5. Ohio State	279	
6. Mississippi	265	
7. Washington	1	142
8. Tennessee	108	
9. Syracuse	91	
10. Rice	73	

Others receiving votes included  
Baylor 33, Auburn 31, Duke 29, Pittsburgh 19, UCLA 18, Arkansas 10, Michigan State 9, Colorado 6, Utah State 6, Ne Mexico State 5, Yale 3, Alabama 2, Texas Christian 1.

## Aggies Alley

By LARRY DANTZLER

It seems appropriate that the students of A&M should know the members of their bowling committee as well as their activities. Therefore, this will be the first of a series of articles featuring some of its interesting and outstanding members.

By far, the most prominent person connected with our committee is our good friend and faculty advisor, Mr. Marvin H. Butler, commonly known to most committeemen as "Pro." Mr. Butler, Assistant Professor of Economics, received his BA degree in 1940 from McKendree College in Illinois. After serving four years in the Army, he went out to obtain his MS degree from the University of Illinois in 1948, at which time he came to A&M where he has been teaching ever since. Among his many activities at present he holds the rank of Major in the Army reserves, is carrying a 191 average in the Classic League in Bryan and is working on his Ph.D. here at A&M.

Over and above his current responsibilities, he is now serving as our advisor for his eleventh year. During this time, he has watched us grow from a sparse number of 17 to the present 125. Meanwhile, he has been elected President of the Bryan-College Station Bowling Association three times and has served on the board of directors the remaining years. Last year, he was presented the highest award available by the M. S. C., that of an Achievement Award for truly outstanding service. However, he shyly admits that this thrill is second to the one he gets from watching the Match Team.

The Bowling Committee is proud

to have Mr. Butler as our advisor now and in the years to come, for one who has so tirelessly served us would be impossible to replace.

## Dallas, Fort Worth Won't Seek Major League Franchise

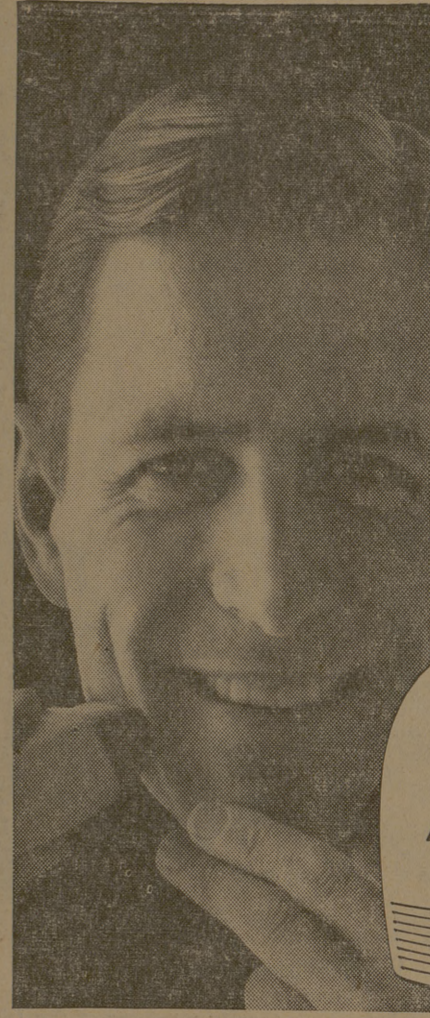

By The Associated Press

FORT WORTH—Owners of the Dallas-Fort Worth franchise in the American Association Tuesday announced they no longer will seek a major league berth and will get entirely out of baseball if a satisfactory purchase of their properties comes forward.

Rebuffed in their efforts to get into the American league last week, J. W. Bateson, Dallas and Amon Carter Jr. of Fort Worth issued the following statement:

"We are so disappointed over recent events that it is our area out of National American League expansion we have decided no good purpose will be served by continuing our efforts. We still believe this is the first big league territory outside the major leagues, as they we constituted during the 1960 season, and will give our enthusiastic blessings and support to anyone who comes in to reap its potential, but we believe the best interest of most people will be served by our

want-ad inded!

Mister...  
you're going to wear  
that shave all day!

START WITH THIS NEW FORMULA BEFORE-SHAVE LOTION, stop 4 o'clock stubble trouble! You can shave blade-close, all-day clean, without "tenderizing" your face, when you use Pro-Electric Before-Shave Lotion. It contains ISOPHYL® to give your shaver extra glide-power — refreshes you with that brisk, bracing Old Spice scent. 1.00 no federal tax.

## PIONEERING IN WORLDWIDE COMMUNICATION VIA SATELLITES

### PROJECT ECHO

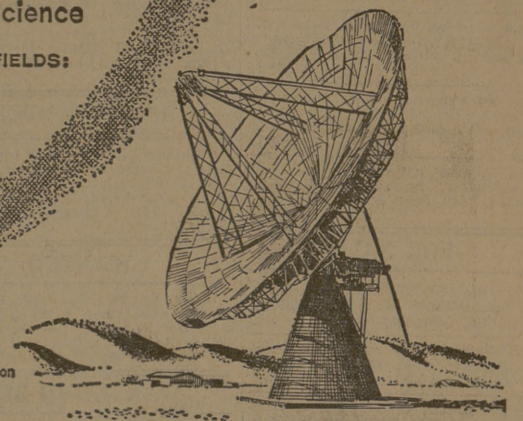

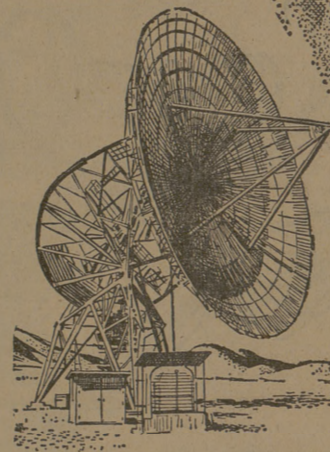

On August 12th, 1960, JPL scientists at Goldstone, California, radioed the world's first transcontinental microwave message to be relayed by a passive, artificial earth satellite. This satellite was the 14½ ft. plastic balloon Echo I orbiting around the Earth at an altitude of 1,000 miles, re-recorded statement by President Eisenhower was received 2,300 miles away by scientists of the Bell Telephone Laboratories at Holmdel, New Jersey, as clearly as any telephone call, in a fraction of a second.

In the course of the Echo experiment, the scientists at Goldstone and Holmdel conducted 2-way voice communication off the balloon satellite, Goldstone transmitting at 2,390 megacycles and Holmdel at 960 megacycles.

This successful experiment opens up vast new fields of development for worldwide communication and is typical of many pioneering achievements of the Jet Propulsion Laboratory.

**RECEPTION**  
The 85 foot parabolic antenna at Goldstone, California built in 1958 and used in tracking and recording telemetry from U.S. spacecraft.

**TRANSMISSION**  
This 85 foot antenna, 7 miles from the reception facility, has recently been put in operation to transmit signals to U.S. spacecraft.
