

Dairy Conference To Begin Monday

Topics ranging from buttermilk and cheese problems to improved sherbets will be discussed at the annual Dairy Manufacturers' Conference Monday through Wednesday in the Memorial Student Center.

A. V. Moore, professor of dairy manufactures, and one of the program chairmen, said the meeting is designed to bring to the industry the best available information on current problems and developments.

Speaking activities start at 1:30 p.m. Monday with an address of welcome by R. E. Patterson, Dean of Agriculture. Other speakers and their subjects are W. S. Arbuckle, dairy professor, University of Maryland, "Weights and Measures Problems in Bulk Product Handling;" R. E. Leighton, Department of Dairy Science, "Production Problems Facing the Producer;" and C. Vanderzant, Department of Dairy Science, "Current and Near-Future Milk Product Analyses."

Judging Contest

Monday also will feature a milk judging contest conducted by James Bennett, Joel Gambrell, Jim Hagler and Alvin Novosad, senior dairy manufacturing students.

Speakers and their subject Tuesday will be R. E. Branson, Department of Agricultural Economics, "Consumer Attitudes and Buying Habits;" W. M. Roberts, North Carolina State College, "Status of Ultra-High Temperature Pasteurization;" and Arbuckle, "Fundamentals of Good Frozen Goods Manufacture."

Group discussions on milk plant and frozen foods problems will be conducted by Roberts, Moore, Arbuckle and Vanderzant.

Also heard Tuesday will be S. D. Fine, director of the Dallas District, Federal Food and Drug Administration, "Antibiotic and Pesticide Residues in Dairy Foods;" I. I. Peters, Department of Dairy Science, "Problems Related to Adding Solids to Milk and Milk Products;" Lewis Dodson, manager of Klenszade Southwest, Amarillo, and Durward Vickers of Dallas, Klenszade representative, "Lactic Starter Management."

Another Tuesday feature will be a 6:30 p.m. dinner. On the program are the Singing Cadets, an illustrated talk on European dairying by I. W. Rupel, Head of the Department of Dairy Science, and an address, "What's In the Sea" by Dale F. Leipper, Head of the Department of Oceanography and Meteorology.

New Telephone Supervisor Announced

Dewey Wayne Peterson has been named division traffic supervisor for The Southwestern States Telephone Co.'s South Texas Division which has its headquarters in Bryan.

G. M. Brennan, division manager, said Peterson was transferred from a similar position at Henderson and assumed his duties here Jan. 1.

A native of Stroud, Okla., Peterson is the son of Mr. and Mrs. Ira Peterson of Henderson. He graduated from Henderson High School in 1954, attending Tyler Junior College in 1954-55 and Henderson County Junior College at Athens in 1955-56.

Peterson was employed as shipping foreman for Henderson Clay Products Co., Henderson, from June, 1956 until he joined the telephone company as a student traffic supervisor in the general office at Brownwood on Mar. 4, 1957. He was named East Texas division traffic supervisor at Henderson on Oct. 16, 1957, and held that post until his transfer here.

Married to the former Mary Joyce Clark, Peterson has one son, Randall Wayne, 3. He is a member of the First Baptist Church.

Local Students, Teachers Invited To European Tour

Special to The Battalion

Students and teachers from College Station are invited to attend one of the most outstanding cultural programs of Europe in the eighteen years that Professor and Mrs. Joseph S. Werlin have been sponsoring international good-will through travel.

Dr. Werlin has been professor of Sociology at the University of Houston for 28 years and is holder of the Bronze Medal, Belgian Ministry of Education, and the Distinguished Visitors Diploma and Medal of the Mexican Government.

In addition to lectures at the Universities of Oxford and Sorbonne at SHAPE (Supreme Headquarters of Allied Powers in Europe) and in Bonn, the present capital of Free Germany, the All-Inclusive Package program, covering eleven countries, includes all visitations to museums, art galleries, castles and cathedrals.

Also, as in the past, Werlin will continue to give historical and sociological analysis of each country

visited as they travel through the highways and byways in their own chartered motor-bus with its especially-equipped microphone.

Traveling cabin-class on the la-

Twin City Rifle Course Now Underway

The Twin City Junior Rifle Club started the 20th Basic Small Arms Training School Saturday with 17 members present.

Buddy Rabb, Roger Rabb, Richard Muzzy, and Bill Baker from Brenham are enrolled and Stan Carter, Bobby Marcotte, Mike Westberg, Joe Williams, Ronald Fair, Charles Ebner, Tommy Faver, Terry Brown, Richard Davis, Ricky Duncan, Jere Smith, David Riedel and Mark Riedel attended from the local area.

test ocean-going luxury liner, the S. S. United States, the limited number making up the Werlin party will sail from New York on June 8, following a get-together party at the Hotel Roosevelt. They will return July 18 in time for registration for second semester summer courses at most universities.

Also, Werlin has been invited to give special orientation lectures aboard the United States, open to all interested passengers.

VARIED DESIGNS PURSUED

Architecture Classes Hurry To Finish Semester Projects

By ROBERT DENNEY

The Architectural Design classes are working every night this week to finish their projects by semester's end. The reason for all the feverish activity on the fourth floor of the Academic Building is that all of the advanced classes are entering design competition with their projects.

Each year, a specific project is selected by the American Institute of Architects for the design classes, which work most of the first semester on them. This year, the project for the Design V classes is to design a rehabilitation center for the Houston Council for Retarded Children, while the fourth year students must design a portable theater. These must be complete to the last detail, with models and perspective drawings in color.

The third year design students must plan a pre-fabricated unit which can be set up as a hunting or ski lodge. These designs will be submitted to the Reynolds Aluminum Co., which sponsors a contest for Design III students every year.

To Dallas

The designs are sent to Dallas over the mid-semester holidays for judging, and, if the student wins, he can expect a \$200 check in the mail when he returns.

The classes started before Thanksgiving on the actual drawing of plans, and several weeks before this were spent in thought on what to design. The designs are on exhibit in the Academic Building.

The first and second year architecture majors spend their time in a course called "Design Drawing," and the results are very impressive. In this course, the students learn the use of drawing instruments, perspective and all the other components which go to make a good architectural drawing. Architectural drawing differs greatly from engineering drawing in that the drawing must not only be accurate in every detail, but must have appeal to the potential buyer.

Two-Color Work

Some of the Design I and II students are doing two-color draw-

ings in pencil and others are using on mosaics of their design. The making of mosaics is a very tedious but rewarding process; every piece must have the right tint of color, and be carefully put into place. Mosaics are also on display in the two-color drawings, as a "sight to behold."

In a few words, the architectural drawing department is as good as having our own art gallery on the campus. One interested in architectural art should make it a point to see all the work that has been done this year.

Vice-Chancellor J. C. Calhoun Named Distinguished Lecturer

Vice-Chancellor for Development, John C. Calhoun, Jr., will be one of the Society of Petroleum Engineers Distinguished Lecturers in 1961. SPE is a constituent member of the American Institute of Mining, Metallurgical, and Petroleum Engineers.

Calhoun will speak on "Petroleum Engineering in Perspective—covering petroleum engineering in relation to other engineering disciplines, to the basic sciences, to its history and growth and its potential to serve."

To assist some of the 45 local sections of the Society and the Institute, and to recognize the professional contributions of the persons selected as distinguished lecturers, the Distinguished Lecturers Program will extend to SPE meetings in Sumatra, Venezuela, Canada, The Netherlands and over the United States.

A petroleum consultant and author of articles for the petroleum literature, Calhoun has been of Engineering at A&M for years as head of petroleum engineering at Oklahoma University and five years in that capacity at Penn State. He also has served as a member of the Petroleum Branch Executive Committee and chairman of the AIME Committee on Education.
