'... not fictitious'

Editor, The Battalion: In regard to the letter published in The Battalion Feb. 22, we would like to present the following thoughts.

We quote from your column, "Sound Off:"

"A free society is characterized by the existence of individuals who publicly take positions on issues of the day—including unpopular, minority positions."

If this is an admission of representing a minority group, we are not questioning the point.

However, the letter and its theme might be questioned. The fact that this and thousands of other articles can appear in the newspapers of this free land indicates that this is still America. Should we be labeled a Communist State because there is a complete unanimity (with few exceptions) of opinion?

On the contrary, this opinion, which is the opposition against those who would subvert our very beliefs, is extremely detrimental to the Communist goal. We are thankful that the people of these United States are unanimous in their hatred for the "Red" movement. If "Operation Abolition" is not authentic, (documented evidence asserting otherwise), it has stimulated the minds of many Americans and agitated those in opposition.

This stimulus may have reached us even too late, but God is on our side. The Communists have admitted that this belief in God is what they fear in their attempt to undermine America. For the sake of truth we would encourage the academic community to see the film before criticizing something that is placing stumbling blocks in the path of our foe.

To state that various religious groups, journalists, labor groups and faculty members have opposed "Operation Abolition" only indicates that we have been lulled to sleep in the last 15 years just as millions were deceived by Castro.

The Communists are working

on all types of fronts and we the people need to awaken.

Lenin prophesied, "First we will take Eastern Europe, then the masses of Asia, then we will encircle the United States which will be the last bastion of Capitalism. We will not have to attack, it will fall like an over-ripe fruit into our hands."

Can you realize just how much of this statement has occurred and can be documented day after day in our newspapers?

J. Edgar Hoover says in "Masters of Deceit," "The Communists have already planned to move the Capitol from Washington to Chicago and they plan to put to death one out of every three Americans."

We ask the readers of this column, should we take our place in the grandstands and applaud the efforts of the enemy?

We say "No!" The game to be played between 1961 and the magic date of 1973 (when this over-ripe fruit is to fall) must be won by those who are yet free.

To state that individuals from various groups, members of several university staffs and several newspapers in California oppose the film proves nothing. It does show that some are misinformed.

Hoover said in "Communist Target—Youth," that "the party was in an advantageous position because as early as 1959 teachers' groups, church organizations, civil liberties groups, and a few newspapers in the San Francisco area were opposing the hearings."

If such things are in order, why worry over the findings of the HUAC? Why shouldn't we have some group to question the Browns, the Brodskys, the Mickey Limas and the other individuals who vow to destroy us. Let us know who we are fighting to keep America free!

We should not doubt the existence of Communist activity that is shown in "Operation Abolition." For further documentation read "Communist Target—Youth," which reveals that the demonstrations were skillfully

conducted by the Communists. Examples of typical Communist action are as follows:

The San Jose Club of the Santa Clara County Communist Party circulated petitions and published protests in the newspapers. Oakland Communist Party members arranged for radio broadcasts and advertisements in local papers. Fund drives were initiated in various clubs to provide financial support for the attack.

On the evening of May 6, 1960, party members held a meeting to assess their progress and plan further activity. Mickey Lima (self-professed boy Communist from the University of California) stated that activity on his

and other campuses was paying dividends. Merle Brodsky (an active leader in Communist Party affairs in California for more than 20 years), boasted that he was calling everyone he has ever known to support these demonstrations.

After reading "Communist Target—Youth," you too can see why the Communist Party of the United States was pleased

with the proceedings that took place in California.

Just as Lenin said that the United States could be taken without war, we now say that Communism can be conquered without war. We have started on a strong front with "Operation Abolition!"
