

Trinity Offers Aggies Date, Dance-\$1

Kappa Psi Omega social club at Trinity University has invited all A&M students to Friday night's Homecoming Queen selection dance in the Student Union Building. Club Vice President Drewella Brown said today an attempt will also be made to furnish dates for those who desire them.

Ducats for the 8:30 p.m. dance will sell for \$1. Nominees for homecoming queen will be presented at the dance in evening dresses, suits and bathing suits. Miss Brown's address, for either ticket or date information, is 330 Bushnell, Box 42, San Antonio.

Single Students Can Apply For Hensel

Unmarried students will be allowed to apply for housing facilities in Hensel Apartments, Bennie A. Zinn, director of student affairs, announced today. The move, to ease crowded dormitory housing conditions, is designed to fill existing vacancies in the previously "for married students only" apartments. Applications for Hensel accommodations will be accepted beginning Monday in the Housing Office, Zinn said.

PetE Staff Preps For Advanced Drilling Course

The Department of Petroleum Engineering is preparing for the fifth session of the Advanced Drilling Engineering Shortcourse for personnel of the petroleum industry. When the session opens Monday, the classes will be held in the new W. T. Doherty Petroleum Engineering Building in the special "industry" classroom. The two-week course consists of eight hours lecture each day, five days a week.

The lectures will be presented by members of the faculty of the Department of Petroleum Engineering. It will be supplemented by lectures by outstanding men of the oil industry, most of whom have appeared before in sessions here.

Men of recognized ability and knowledge in specific areas of interest to the drilling engineer have been chosen as speakers.

Most of the enrollment for this session is made up of personnel from companies in the United States with the exception of several men from abroad.

Studies History

Shapely Gayle Southerland, of Harlingen, examines a cypress post used as piling in a bridge by General Zachary Taylor in 1846 to carry military supplies across Boca Chica inlet near the mouth of the Rio Grande. Gayle has been around only some seventeen years, but, she and the post seem to be holding up well. (AP Photo)

PROJECTS OF THE BELL SYSTEM

range from the reaches of space

Unretouched time exposure shows Echo 1 communications satellite (long line) crossing the heavens right to left. Shorter lines are stars "in motion."

to the depths of the sea

Actual undersea photo of telephone cable off coast of Florida.

Our job is providing communications of all kinds, wherever needed—whether in the northern snows to flash word of possible enemy missile attack, or in your home or college, or in serving the nation's business.

When we can't fill a need off the shelf, then we start fresh and create the answer to the problem. We've done that hundreds of times.

We began transatlantic radiotelephone service in 1927. Then we developed the

world's first undersea telephone cables to speed calls between continents.

We handled the world's first telephone conversation via satellite. And we have started development of an important world-wide communications system employing satellites.

When industry and government needed a way of gathering huge amounts of coded information from distant points, we were ready with our vast telephone network and Data-Phone, which can

transmit mountains of data at extremely high speeds.

And so it goes—Long Distance service, Direct Distance Dialing, the Transistor, the Solar Battery—a succession of firsts which goes back to the invention of the telephone itself.

Universal communications—the finest, most dependable anywhere—are what we deliver. Inside: for home, office, or plant. Outside: on land, under the sea, through the air.
