

IBM Nuclear Coordinator Slates Speech Here Friday

Dr. H. P. Flatt, nuclear codes coordinator with International Business Machine Corporation, will be

the main speaker at a seminar Friday at 4 p. m. in Room 211 of the W. T. Doherty Petroleum Engineering Building.

Flatt is presently associated with IBM's western regional office in Los Angeles, Calif. He is responsible for the coordination of information on the use of digital computers to solve problems arising in nuclear reactor design problems.

He received a B. A. in physics from Rice University and went on to take graduate degrees in mathematics from Rice.

U. S. A. LECTURES RECORDED

'Life Science' Film Series Opens Tomorrow

A series of five films will be presented by the Graduate School and the Office of Agricultural Instruction on "Promise of the Life Sciences."

One film will be shown each week for the next five weeks in the Biological Sciences Lecture Room. Faculty, research, extension staff, graduates, undergraduates and the public are invited.

The film series is the result of the U. S. Department of Agriculture Graduate School 1960 lecture series.

"In order that this series of presentations by some of the greatest

biologists might be made available to people outside the vicinity of Washington, the USDA Graduate School secured a grant from the National Science Foundation to finance the preservation of the lectures on black and white film and video-tape," said Dr. G. M. Watkins, director of agricultural instruction.

The first film, "Biological Transformation of Energy," by A. Szent-Gyorgyi, Woods Hole Marine Biological Laboratory, will be shown tomorrow and Thursday.

The successive films are as follows: "Genetics", by George Beadle,

California Institute of Technology, Oct. 25-26.

"Nutrition—The Chemistry of Life," by Jean Mayer, School of Health, Harvard University, Nov. 1-2.

"Fine Structure and Pattern of Living Things," by Paul Weiss, The Rockefeller Institute, Nov. 8-9.

"The Organism and the Environment," by Arthur D. Hasler, University of Wisconsin, Nov. 15-16.

Two Oceanography Profs Given U. S. Citizenship Papers

Dr. Hugh McLellan and Pieter Groot of the Department of Oceanography and Meteorology received their United States citizenship papers Friday. McLellan is professor of oceanography and Groot is the assistant to the administrative scientist.

Groot first came to the United States in 1952 and worked in the Dutch Embassy in Washington. In 1953 he was transferred to Bryan Air Force Base as administrative assistant to the commanding officer of the Royal Netherlands Air Force. He worked at the air base until 1956, when he was employed by Dr. Dale Leipper, head of the Department of Oceanography and Meteorology.

McLellan was born in Nova Scotia and prior to coming to A&M worked with the Fisheries Research Board of Canada. He joined the oceanography staff in 1957.

LBJ Treats Camel-Driver At Spacious Texas Ranch

Bashir Ahmad, who drives a camel cart in Karachi, Pakistan, climbed into a western saddle on a beautiful palomino named Silver at Vice President Lyndon Johnson's ranch Monday.

"This is just like sitting on a davenport," said Bashir. "You don't feel the horse at all. You just feel leather."

Bashir, 48, sat erect. His ankles dangled a foot above the stirrups. His interpreter, Sahib Khan of Pakistan, explained that Bashir had ridden horses before but always without a saddle or bridle.

"He is a first class horse," Bashir said. A broad grin showed under his wide, black mustache.

Johnson, who helped boost Bashir into the saddle, asked if he would like to trade his camel for a horse.

"That is a fair trade," Bashir replied and grinned again.

Johnson then mounted another horse and the two rode briefly along the Pedernales River looking at irrigated pastures and purebred bulls on the vice president's LBJ Ranch, 65 miles west of Austin.

Occasionally Bashir's mount broke into a slow trot. The camel cart driver would hang on to the saddle horn and grin widely.

Johnson met Bashir during a visit to Karachi last spring. The vice president singled him out of a crowd to shake hands and casually invited Bashir to visit the United States. Some American businessmen made the trip possible.

Johnson and Bashir arrived by plane Sunday night from New York for a two-day Texas visit.

Monday morning Johnson gave his guest an alarm wrist watch and then hurried him to a television set carrying pictures of the camel driver's arrival in New York.

"How can it be here when we were there?" Bashir asked.

After the horseback ride, Johnson drove Bashir to Johnson City to visit the headquarters of the Pedernales Electric Co-operative.

En route the vice president pointed out a modest house on the edge of the ranch where he was born. They made an unscheduled stop at the Johnson City High School where Johnson received his diploma.

Bashir and Johnson visited the lunchroom and a seventh grade mathematics class.

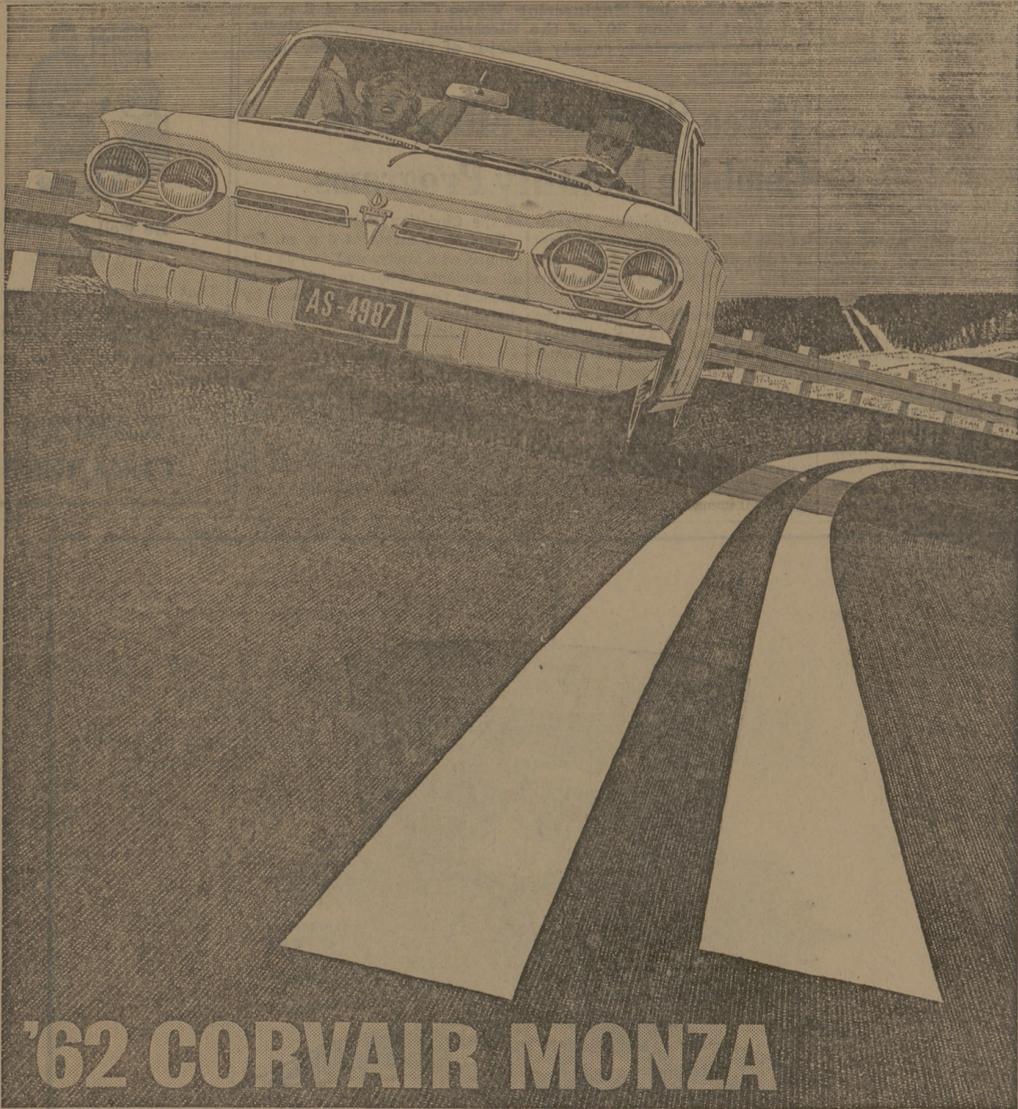

As they left the school building, students crowded windows for a glimpse of the visitors. Secret Service men waved for the students to come outside.

The students swarmed around Johnson and Bashir. The camel driver told them:

"I have a little advice for you. When I was young, I did not have an opportunity to go to school. You have the opportunity. Please make the most of it so you can make this a better world."

As the two men headed for their car, Bashir gave the children an invitation similar to the one Johnson extended him in Karachi:

"If you ever come to Pakistan, please look me up."

'62 CORVAIR MONZA

NEW FACE, SAME SPORTING HEART

We might as well tell you straight off: Corvair's the car for the driving enthusiast. Think that lets you out? Maybe. Maybe not.

Until you've driven one, you really can't say for sure, because Corvair's kind of driving is like no other in the land. The amazing air-cooled rear engine sees to that. You swing around curves flat as you please, in complete control. You whip through the sticky spots other cars should keep out of in the first place. (Especially this year, now that you can get Positraction as an extra-cost option.) You stop smoothly, levelly with Corvair's beautifully balanced, bigger brakes.

And Corvair's found other new ways to please you this year. A forced-air heater and defroster are standard equipment on all coupes, sedans and both Monza and 700 Station Wagons. So are dual sunshades and front-door armrests and some other goodies. You'll note some new styling, inside and out. Nice. And safety-belt installation is easier, too, and cheaper. Another extra-cost option well worth considering is the heavy-duty front and rear suspension; it turns a Corvair into a real tiger.

So you can see we haven't really done much to Corvair this year. Why on earth should we? If this car, just as she is, can't make a driving enthusiast out of you, better take a cab.

A New World of Worth

And here's America's only thoroughbred sports car, the '62 CORVETTE. We warn you: If you drive a Corvette after your first sampling of a Corvair, you may well end up a two-car man. And who could blame you?

See the '62 Corvair and Corvette at your local authorized Chevrolet dealer's

We all make mistakes...

ERASE WITHOUT A TRACE ON EATON'S CORRASABLE BOND

Don't meet your Waterloo at the typewriter—perfectly typed papers begin with Corrasable! You can rub out typing errors with just an ordinary pencil eraser. It's that simple to erase without a trace on Corrasable. Saves time, temper, and money!

Your choice of Corrasable in light, medium, heavy weights and Onion Skin in handy 100-sheet packets and 500-sheet boxes. Only Eaton makes Corrasable.

"Serving Texas Aggies"

EVERY COLLEGE STUDENT needs this book

to increase his ability to learn

An understanding of the truth contained in Science and Health with Key to the Scriptures by Mary Baker Eddy can remove the pressure which concerns today's college student upon whom increasing demands are being made for academic excellence.

Christian Science calms fear and gives to the student the full assurance he needs in order to learn easily and to evaluate what he has learned. It teaches that God is man's Mind—his only Mind—from which emanates all the intelligence he needs, when and as he needs it.

Science and Health, the textbook of Christian Science, may be read or examined, together with the Bible, in an atmosphere of quiet and peace, at any Christian Science Reading Room. Information about Science and Health may also be obtained on campus through the

Christian Science Organization at
