

Livestock Surveys Due In Post Office

A number of patrons of the College Station Post Office will find livestock survey cards in their post office boxes Nov. 16. These cards are distributed at random among persons having livestock and poultry.

"Information reported on these cards is used to set the yearly inventory of livestock and poultry on Texas farms," said Postmaster Ernest Gregg.

Facts and figures secured in this survey are the basis for the Texas and National pig crop report and inventories of the livestock and poultry on farms the first of the year. Stockmen and many others use this information in making business decisions.

Survey results will be widely distributed through Texas crop and livestock reporting service releases, newspapers, farm magazines, radio and television.

"This annual survey has been a joint undertaking of the post office and the agriculture departments since 1924," Gregg added. In concluding, Gregg stressed

the importance of everyone who gets a card returning it filled out so that USDA can get a true sample of the state's livestock holdings.

Bryan Freshman Wins National Wildlife Award

Buddy Francis, '65, has been named winner of the State's 1961 4-H Wildlife Conservation Awards Program, and will receive a \$1,200 college scholarship.

Francis is the son of Mr. and Mrs. W. G. Francis of Rt. 1, Bryan. He became interested in wildlife conservation after hearing a county agent's program on game management.

After a population survey of the wildlife on the Francis farm, he started a program to provide food and cover for birds and animals. He also solved the problem of white-tail deer eating truck crops by putting out food and minerals for them. He then stocked the farm's ponds with several species of fish.

"4-H work has been a great benefit to me because it has prepared me to lead a useful and productive life," Francis said.

Doggie With A Sulky

Greta, a nine-year-old Dachshund, is sort of half dog and half wagon, with her hind quarters paralyzed by a slipped disc. Gerta gets around with the aid of a contraption that looks like a sulky used in harness racing. She is the pet of Mr. and Mrs. George C. Doherty of Jacksonville, Fla. (AP Wire-photo)

In the 1959 Tournament of Champions at Las Vegas, Gary Player shot a 301 to finish 22nd in a field of 26.

AMONG THE PROFS

Cochran Attends Chicago Meeting

Dr. Robert G. Cochran, head of the Department of Nuclear Engineering, met today with the research reactor sub-committee of the National Academy of Sciences in Chicago, Ill.

As chairman of the subcommittee, a part of the National Research Council and National Academy of Sciences, Cochran will also serve on a panel that will discuss "Operation of Research Reactors on University Campuses."

This panel is part of the American Nuclear Society winter meeting currently in session in Chicago.

Dr. Roy A. Axford, associate professor of nuclear engineering, will discuss "Photon Penetration Theory" at the weekly nuclear engineering seminar Friday in the W. T. Doherty Petroleum Engineering Building.

The meeting will begin at 4 p.m. in Room 211 and is open to all interested students and faculty.

Axford came to A&M in 1960 after heading the theoretical reactor physics group for Atomic International in California.

He holds bachelor degrees from William College and Massachu-

setts Institute of Technology and SM and ScD degrees from MIT.

"Food and the Future" will be the subject of an address Friday in Dallas by Dr. A. V. Moore, professor in the Department of Dairy Science.

Moore will speak to the Dallas-Fort Worth Dairy Technology Society.

Dr. I. I. Peters, associate professor in the Department of Dairy Science, has been elected president of the Texas Branch of the American Society for Microbiology for 1962.

The scientist was named to the post during the society's recent fall meeting at Austin. He is a past vice-president.

Dr. I. W. Rupel and Dr. M. A. Brown, both of the Department of Dairy Science, participated in a recent joint meeting at Beltsville, Md., of the S-49 and NC-2 Regional Research Technical Committees.

One of the main speakers was Dr. J. L. Lush of Iowa State University and formerly an early animal geneticist with the Texas Agricultural Experiment Station.

New Economics Professor Acts As Foreign Consultant

A new member of the Department of Economics faculty, I. O. Linger, is acting as a consultant for the Office of Foreign Programs this year to A&M's technical personnel who are to leave for work overseas.

Another new member of the economics faculty, J. J. Treacy, is completing research in the field of national income analysis.

Linger, a specialist in international trade and money and banking, will try to promote a better understanding of the economic problems of the foreign countries to which technicians are being sent, Dr. A. F. Chalk, head of the Department, said today.

As a part of a Ford Foundation project, Linger will spend next summer in India and Pakistan in a five-year program related to economic problems of these coun-
