

Nehru Denounces Russian Testing

WASHINGTON (AP)—Indian Prime Minister Nehru denounced testing yesterday as "a very

harmful, disastrous thing that brings about a war psychosis."

Differences over such matters as nuclear testing and other major cold war problems still exist between Nehru and his host.

But at the same time the neutralist leader, who has spoken out numerous times before against nuclear testing by the Soviets or any other nation, said he thinks "Russia today aims at and desires peace."

He said further that the downgrading of the late dictator Joseph Stalin "raises my hopes for world peace."

Nehru stated those views in a question-and-answer period after an address to the National Press Club.

The meeting with newsmen came just ahead of a final talk with President Kennedy closing out the business sessions of Nehru's four days of consultations on an official visit to Washington.

Saturday, November 11, 1961, being a Legal Holiday, in observance of Veterans Day, the undersigned will observe that date as a Legal Holiday and not be open for business.

DISCOVERY

Maybe it seems odd to think that anyone has to "discover" the Bible. Yet stop and think how few of us really know this Book of books.

Time was when families read the Bible together, and most youngsters could quote their Scriptures. Biblical allusions were commonplace and understood by one and all.

Then somehow, over the years, a lot of people forgot about the Bible. Or they reserved it exclusively for Sundays in church.

Now, there is a great and blessed resurgence of Bible reading in our land—thanks to the great work of the American Bible Society. Youngsters like these are learning new truths for themselves. They are putting God's word not just into Sunday, but into every day.

THE CHURCH FOR ALL ... ALL FOR THE CHURCH.

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake, (2) For his children's sake, (3) For the sake of his community and nation, (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Sunday Romans 10:1-10	Monday Proverbs 2:1-8	Tuesday John 17:1-11	Wednesday Hebrews 2:1-10
Thursday Psalms 119:33-40	Friday Psalms 119:105-112	Saturday Matthew 13:18-23

Cushing Books Approved By Notable Books Council

By DAVID JONES
Battalion Staff Writer
Twenty thousand new volumes added each year to the Cushing Memorial Library include those publications chosen by the Notable Books Council as making a contribution to literature and general knowledge, according to Robert A. Houze, library director.

Books ranging from the Pulitzer Prize-winning "To Kill A Mockingbird" by Harper Lee—the story of a young girl's growth in tolerance and understanding in an Alabama town of the 1930's—to a comprehensive account of the "History of Western Music" by Donald Grout are included in this year's list.

Other selections chosen by the Notable Books Council include "Dr. Schweitzer of Lamarene" by Norman Charles, an intimate view into the work and spirit of the humanitarian that includes his attitude toward atomic war. "Jon Hersey's 'The Child Buyer' an unfolding of an attempt to purchase a 10-year-old genius for exploitation cast in the form of Senate hearings, is another.

Chemistry Expert To Speak Monday

An authority in the relatively new field of fluorine chemistry will lecture here Monday before the A&M-Baylor University section of the American Chemistry Society.

Dr. George H. Cady, University of Washington chemistry professor, will discuss "Chemistry of Compounds Containing the -O-F Bond." The meeting will begin

at 7:45 p.m. in Room 231 of the Chemistry Building.

He has been a principal researcher in the fields of fluorine chemistry, preparation of hypochlorites and rare gas analysis. Cady is the inventor of a process for the manufacture of calcium hypochlorite.

A native of Kansas, Cady earned bachelor and master degrees in chemistry at the University of Kansas and then attended the University of California, Berkeley, where he was awarded a PhD degree in 1930.

Herman Kahn discusses the prospect of nuclear war and the methods of escaping total destruction in his book "On Thermonuclear War."

"The Intelligent Man's Guide to Science" by Isaac Asimov, is a two-volume survey which moves from history to the newest discoveries. Another scientific work, "The Forest and the Sea" by Maston Bates, relates the interdependence of man and nature by a scientist and philosopher.

Jordan Student Explains Switch To Christianity

David Amad, a student from Jordan, will explain his conversion from a Moslem to a Christian tonight in the Baptist Student Center at 7.

Amad, a sophomore transfer from East Texas Baptist College in Marshall, will speak on "The Earmarks of a New Faith."

He came to the United States in 1957 because Dr. Thomas A. Patterson, pastor of the First Baptist Church in Beaumont, became interested in his search for an education. Patterson met him on a trip to Jordan.

After teaching and industrial research positions at the Massachusetts Institute of Technology and the U.S. Rubber Co., Cady joined the University of Washington chemistry faculty in 1938.

His teaching field is in the areas of general and inorganic chemistry. During 1942 and part of 1943 he was on leave from the University of Washington while working on the Manhattan Project at Columbia University.

"Grant Moves South" is the story of the emergence of U.S. Grant as a military leader by Bruce Catton. Robert Brown and Gustave Weigel undertake a salutary exchange in their book "An American Dialogue" as a Protestant looks at Catholicism and a Catholic looks at Protestantism.

"The Firmament of Time" by Loren C. Eiseley is the story of how a man can comprehend himself as a part of nature and product of evolution. Candidly expressed opinions on a wide variety of topics are discussed in Felix Frankfurter's "Felix Frankfurter Reminisces."

Baptists Schedule After-Game Fete

The First Baptist Church will hold an open house after the A&M-SMU football game Saturday from 5-8 p.m. in the Baptist Student Center.

Chairman of the social committee, Johnny Winder, said refreshments will be served and all Aggies and their guests are invited to the come-and-go affair.

An illuminating portrait of the Scottish farm boy and founder of scientific surgery, against a background of 18th-century London, is presented in "Reluctant Surgeon: A Biography of John Hunter" by John Kohler.

"Goodbye to a River" by John Graves is the story of a contemplative journey down the Brazos River, and "This is the American Earth" by Ansel Adams and Nancy Newhall tells in rhythmic prose and photographs the cause of conserving our national resources.

"Born Free: A Lioness of Two Worlds" by Joy Adamson tells the story of how Elsa, an orphaned lion cub, was raised as a pet then re-educated to return to the African jungle. Sensitive and informed observations from diaries of a noted art critic on a postwar trip through Italy are told in "Sculpture of this Century" by Ferdinand L. Berckelaers.

"Thomas Wolfe" by Elizabeth Nowell, the penetrating biography by Wolfe's literary agent, is an outstanding contribution to literary history.
