

Pass In Review

Three-to-a-room conditions in some of the civilian dormitories have sent a good number of Aggies scurrying to bachelor apartments and rented houses in Bryan and College Station.

Result has been a lot of burned spuds and hard biscuits as the batchel-Ags take to the kitchen—for some, the first time in their lives.

Some warriors gave up after one try and are existing on hamburgers and sardines now. Others, like two of our acquaintances who managed to get a nice little house less than seven miles from the campus, are determined to succeed in the culinary art.

These two decided to cook a roast. So they bought one and took it home. Then they found out that neither knew how to cook the thing. And there wasn't a cookbook in the house.

So where would they get information on how to cook a roast? Why, dial "Information" on the phone. So they did. And it worked. It took some time, but between the two and the telephone company, they got the roast cooked.

... I like basketball, but what I like best about it is there's no yell practices, no signs and no bonfires!"

—Sound Off—

Owens Fan Feels Ags Second Fiddle

(Editor's note: The following letter appeared in the Seattle (Wash.) Post-Intelligencer Monday. It ran as a "Letter To Jim Owens" under this headline: "First-Fiddle Washington Beats 2nd-Fiddle Aggies." The clipping came to The Battalion with a note: "Thought you might be interested in seeing this. From a transplanted Texan." Dear Jim:

First, warm congratulations on winning a big one. Some of us Monday Morning QBs think the coaching job you and your fine staff did this year was every bit as brilliant at the two Rose Bowl wins.

But the subject we want to bring up, coach, is Texas A&M, and all those under-the-table offers they are making.

Everything is biggest in Texas, including the secret fringe benefits they use to bribe football coaches, even if they are already

under contract. That isn't your kind of a college, coach. Jim Owens deals 'em out in the open, with the cards on the table. What have those fellows got to offer except money?

Your charming wife, Martha, your coaching assistants, your players, close friends and admirers don't want you to fall for this kind of a deal. You're sitting on top of the world at Washington. Man, you're taller than the Space Needle. A wise old coach named Babe Hollingbery was telling me Saturday that a man is crazy to take a job with the Texas Aggies. Look what has happened to the last few coaches they have hired and fired.

Texas Aggies play second fiddle to Texas U, and they always will. Just let the new coach—any new coach—get belted a couple of years in succession by Darrell Royal's well-heeled Longhorns and the fair-weather Aggie alumni with those silly ten-gallon hats will desert the ship like rats.

Jim, I know of a way to end all this furore, right quick, in a 10-word telegram to College Station, wherever that is. (Or do they have a Western Union office there?)

Just send it like this—
"Dear Texas Aggies. I ain't

coming. Thanks and best regards. Jim."

P.S. — A hundred-thousand Owens boosters will chip in and pay for the wire.

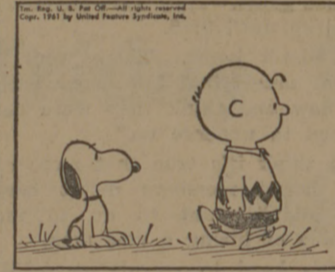

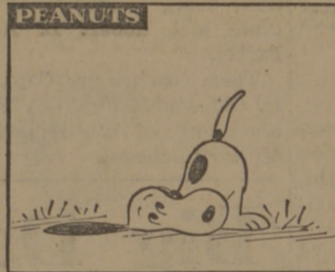

Your Old Neighbor,
R.B.

Job Calls

The following firms will interview seniors in the Placement Office in the YMCA Building:

Friday
Jet Propulsion Laboratory—Aeronautical, chemical, civil, electrical and mechanical engineering; chemistry, mathematics and physics (M.S. and Ph.D.).
Kendavis Industries Inc.—Electrical, industrial, mechanical and petroleum engineering and business administration.

PEANUTS

DATA-DESIGN LABORATORIES

of
Ontario, California

Will Interview January-Grads With BSEE (Electronics)
On Campus December 6th

ARE YOU INTERESTED IN THE PICTURE

... Or Just The Brush Marks?

You can see the whole picture (and help frame it) when you apply your engineering skills to any of the intriguing projects in which Data-Design Laboratories is now involved.

As a Data-Design engineer, you will have an opportunity to pit your professional know-how against the most advanced weapons systems concepts—systems and equipment that continually strain the state of the electronics art. You will work with the scientists and engineers who originate today's equipment and systems to create technical data that interpret these complex equipments. You will be responsible for generating accurate data that will be used to set up, calibrate, and maintain complex equipment and to assure proper integration of the equipment and sub-systems into an overall operational system.

Data-Design is presently engaged in many projects that place our engineers in the vanguard of the electronics frontier—digital computers, solid-state devices, telemetering, celestial and inertial navigation systems, automatic electronic tests equipment, fire control system, and many others.

As a Data-Design engineer you will work in a friendly, professional environment with an opportunity to grow professionally and financially with a growing leader in a growing industry.

LIVING CONDITIONS

Data-Design is located in Ontario, California, at the base of the San Bernardino mountains, 35 miles east of Los Angeles. Southern California's famous climate is an ever present inducement to enjoy the myriad of recreational activities

—1-hour's drive to the warm sands of the Pacific Ocean beaches or the vast California deserts—or, if you will, to the ski lifts high in the snow-capped mountains.

Ontario, with its adjoining cities, offers all of the conveniences, goods, and services of a metropolitan area, yet retains the delightful air of "small town" living. New modern housing is available in abundance, at low cost, and with a wide selection of areas.

Educational facilities in the Ontario area, for graduate work or for refresher courses, are superb. Eight colleges of recognized standing are located within a 45-mile radius.

SALARIES

Data-Design's salaries are not limited by a predetermined structure. You will establish your own limits by your proven ability and willingness to grow with a growing young corporation. Our present engineering salaries are among the highest in the electronic industry.

COMPANY BENEFITS

Data-Design engineers enjoy pleasant, air-conditioned surroundings, plus company paid:

- * Hospitalization insurance plan
- * Life insurance plan
- * Sick leave
- * Vacations
- * Holidays and added year-end vacation

Hometown Clubs
The following hometown clubs will meet tonight in the Academic Building:

Shelby-Doches club will meet in Room 228 at 7:30 p.m. Officers will be elected and the Christmas party will be planned.

Borger club will meet in Room 411, at 7:30 p.m.

El Paso club will meet in Room 106 at 7:30 p.m.

The following hometown clubs will meet tonight in the YMCA Building:

South Plains-Lubbock clubs will meet in the Cashion Room at 7:30 p.m.

Matagorda club will meet in the Anderson Room at 7:30 p.m.

Denton club will meet in the lobby at 7:30 p.m.

These hometown clubs will meet tonight in the Memorial Student Center:

Midland club will meet in Room 2-C at 7:30 p.m. Members should bring dues and wear class "A" uniforms. Pictures will be taken.

Galveston club will meet in the main lounge at 7:30 p.m. Pictures will be taken.

South Louisiana club will meet in Room 3-C at 7:30 p.m. Officers will be elected, the party will be planned and the pictures will be scheduled.

Taylor-Smith club at 7:30 p.m. Laredo club will meet in the second floor lounge at 7:30 p.m. Pictures will be taken. Wear class "A" uniform or coat and tie.

Odessa club will meet in the cafeteria at 6:15 p.m. Bring pictures for club sweetheart selection.

Wives Clubs
Animal Husbandry Wives Club will meet at Pruitt's Fabric and Beauty Shop at 7:30 p.m.

THE BATTALION

Opinions expressed in The Battalion are those of the student writers only. The Battalion is a non-tax-supported, non-profit, self-supporting educational enterprise edited and operated by students as a journalism laboratory and community newspaper and is under the supervision of the director of Student Publications at Texas A&M College.

Members of the Student Publications Board are L. A. Dueswall, director of Student Publications, chairman; Allen Schrader, School of Arts and Sciences; Willard I. Trustner, School of Engineering; Otto R. Kunze, School of Agriculture; and Dr. E. D. McMurry, School of Veterinary Medicine.

The Battalion, a student newspaper at Texas A&M, is published in College Station, Texas, daily except Saturday, Sunday, and holiday periods, September through May, and once a week during summer school.

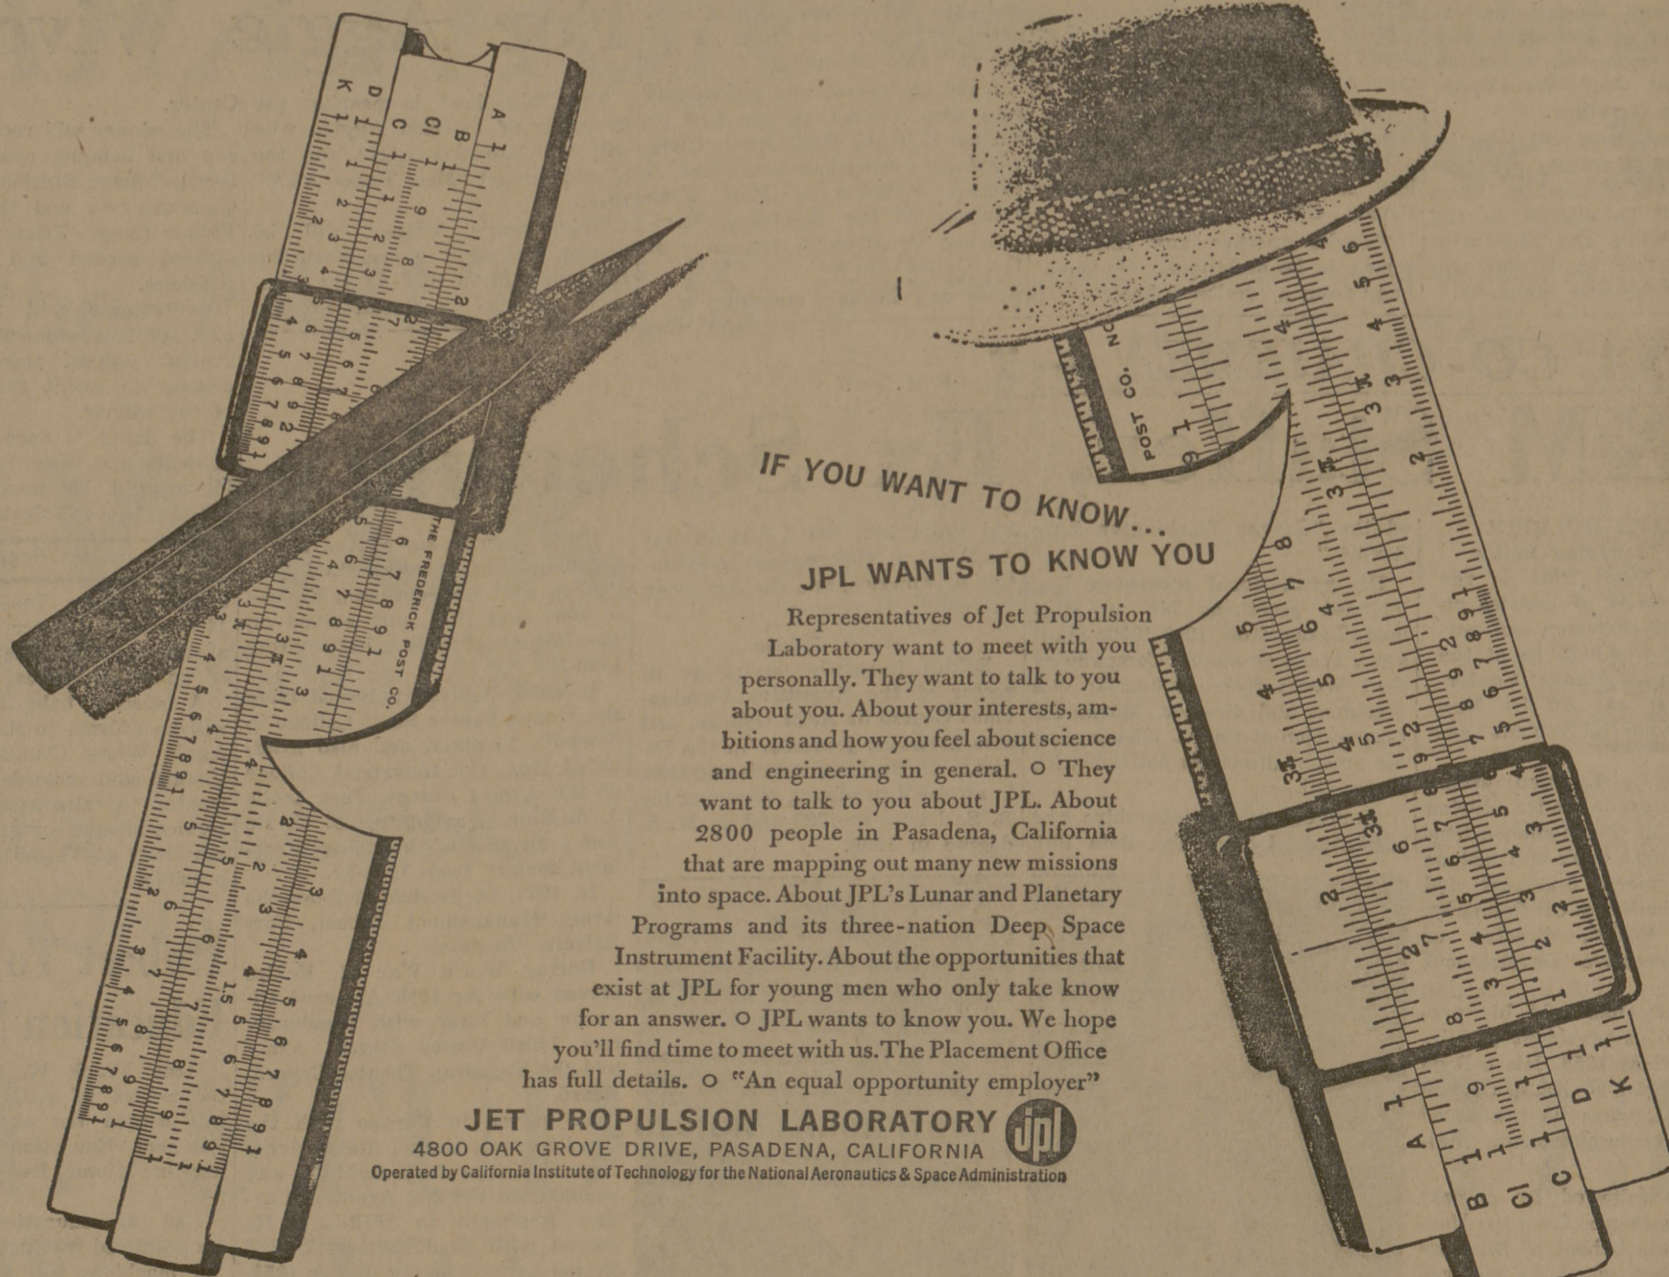

The Associated Press is entitled exclusively to the use for republication of all news dispatches credited to it or not otherwise credited in the paper and local news of spontaneous origin published herein. Rights of republication of all other matter herein are also reserved.

Entered as second-class matter at the Post Office in College Station, Texas, under the Act of Congress of March 3, 1879.

Mail subscriptions are \$3.50 per semester; \$6 per school year, \$6.50 per full year. All subscriptions subject to 2% sales tax. Advertising rate furnished on request. Address: The Battalion, Room 4, YMCA Building, College Station, Texas.

News contributions may be made by telephoning VI 6-6618 or VI 6-4910 or at the editorial office, Room 4, YMCA Building. For advertising or delivery call VI 6-6415.

IF YOU WANT TO KNOW...

JPL WANTS TO KNOW YOU

Representatives of Jet Propulsion Laboratory want to meet with you personally. They want to talk to you about you. About your interests, ambitions and how you feel about science and engineering in general. They want to talk to you about JPL. About 2800 people in Pasadena, California that are mapping out many new missions into space. About JPL's Lunar and Planetary Programs and its three-nation Deep Space Instrument Facility. About the opportunities that exist at JPL for young men who only take know for an answer. JPL wants to know you. We hope you'll find time to meet with us. The Placement Office has full details. "An equal opportunity employer"
