

U.S. Scientists Launch Into Manned Orbit Project Briskly

CAPE CANAVERAL, Fla. (AP)—U.S. space scientists went briskly back to work Thursday as is determined to hurl a man around the world by year's end despite only partial success of their chimp shoot.

No one connected with the Project Mercury space program would come right out and say so, however, but they wouldn't deny it flatly either.

Indeed, the spokesman for the program always held out the possibility that the next U.S. space passenger might be another chimpanzee like Enos.

Enos, a 37½-pound native of the French Cameroons, was rocketed twice around the world Wednesday but his planned third trip was canceled because of spacecraft troubles—and they were minor.

Everything else connected with the earth-girdling flight of the chimp worked perfectly—booster,

tracking and communications.

In any event, a new, 360,000-pound thrust Atlas booster, earmarked for the man-in-space project, arrived here Wednesday night and began undergoing hanger checks. It will be erected on the launch pad Saturday.

A "man-rated" space craft has been undergoing extensive checks at this vast missile complex for the past several weeks.

This space craft already has been modified in anticipation of one of the problems encountered on Enos' jaunt.

Certain parts of the electrical system on Enos' space ship were designed to be air-cooled, but in the absence of air in space they overheated.

The latest of the two-ton space capsules has had coolants provided to overcome the heat problem.

Project Mercury Director Robert R. Gilruth announced Wednesday that the pilot would be Marine Lt. Col. John H. Glenn Jr., who, at 40, is the oldest of the astronauts.

The backup pilot for Glenn is Navy Lt. Cmdr. Scott Carpenter, 36.

Civilian Photo Schedule Set

Civilian students will have their portraits made for the Aggieband '62 during the months of December and January, according to Aggieband Editor Raleigh E. Coppedge. The pictures will be made in coats and ties at Aggieband Studio, North Gate, between 8 and 5 p. m. on the days scheduled.

Schedule for freshmen, sophomores and juniors whose surnames begin with:

A-C	Dec. 4-5
D-H	5-6
I-M	6-7
N-Q	7-8
R-S	11-12
T-Z	12-13

Schedule for seniors and graduates whose surnames begin with:

A-B	Jan. 4-5
C-E	8-9
F-H	9-10
I-K	10-11
L-N	11-12
O-Q	15-16
R-S	16-17
T-V	17-18
W-Z	18-19

In grocery stores with no cross aisle, about 25 per cent of shoppers cover virtually the entire store. If there is a cross aisle, only about 5 per cent shop every aisle, reports the U.S. Department of Agriculture.

MANKATO, Minn. (AP)—Alfred Nelson hadn't ordered any soybeans—but he got 'em. A truck loaded with 75 bushels of beans crashed into his house, coming to rest entirely inside the living room, pouring beans by the bushel in an area Nelson had left a few minutes earlier.

DATA-DESIGN LABORATORIES

of
Ontario, California

**Will Interview January-Grads With BSEE (Electronics)
On Campus December 6th**

**ARE YOU INTERESTED IN THE PICTURE
... Or Just The Brush Marks?**

You can see the whole picture (and help frame it) when you apply your engineering skills to any of the intriguing projects in which Data-Design Laboratories is now involved.

As a Data-Design engineer, you will have an opportunity to pit your professional know-how against the most advanced weapons systems concepts—systems and equipment that continually strain the state of the electronics art. You will work with the scientists and engineers who originate today's equipment and systems to create technical data that interpret these complex equipments. You will be responsible for generating accurate data that will be used to set up, calibrate, and maintain complex equipment and to assure proper integration of the equipment and sub-systems into an overall operational system.

Data-Design is presently engaged in many projects that place our engineers in the vanguard of the electronics frontier—digital computers, solid-state devices, telemetering, celestial and inertial navigation systems, automatic electronic tests equipment, fire control system, and many others.

As a Data-Design engineer you will work in a friendly, professional environment with an opportunity to grow professionally and financially with a growing leader in a growing industry.

LIVING CONDITIONS
Data-Design is located in Ontario, California, at the base of the San Bernardino mountains, 35 miles east of Los Angeles. Southern California's famous climate is an ever present inducement to enjoy the myriad of recreational activities

—1-hour's drive to the warm sands of the Pacific Ocean beaches or the vast California deserts—or, if you will, to the ski lifts high in the snow-capped mountains.

Ontario, with its adjoining cities, offers all of the conveniences, goods, and services of a metropolitan area, yet retains the delightful air of "small town" living. New modern housing is available in abundance, at low cost, and with a wide selection of areas.

Educational facilities in the Ontario area, for graduate work or for refresher courses, are superb. Eight colleges of recognized standing are located within a 15-mile radius.

SALARIES
Data-Design's salaries are not limited by a predetermined structure. You will establish your own limits by your proven ability and willingness to grow with a growing young corporation. Our present engineering salaries are among the highest in the electronic industry.

COMPANY BENEFITS
Data-Design engineers enjoy pleasant, air-conditioned surroundings, plus company paid:

- Hospitalization insurance plan
- Life insurance plan
- Sick leave
- Vacations
- Holidays and added year-end vacation

**To Arrange Interview See Placement Office
Data Design Laboratories
An Equal Opportunities Employer Applicants Must Be U. S. Citizen**

Students Hang Alumni Head

An effigy of John (Jack) Fullen, secretary of the Ohio State Univ. alumni association, swings from a tree in the university area after an estimated 5,000 students demonstrated against the school's faculty council decision to reject a bid to the Rose Bowl. Fullen has been a long-time opponent of post-season games. (AP Wirephoto)

First Teaching Conference To Begin Here Tomorrow

A Conference on Effective Teaching will begin tomorrow as the first of the two sessions of the conference is held in the Civil Engineering lecture room.

Dr. Otis Lancaster of Pennsylvania State University is the main speaker.

Both sessions of the conference, the second to be held Dec. 9, are sponsored by the School of Engineering and the American Society

EE Prof Back From Ceylon

Martin C. Hughes, professor of electrical engineering, has returned to A&M after a four-year leave of absence in Ceylon.

Hughes served as an engineering consultant to the University of Ceylon in Peradeniya.

Head of the Department of Electrical Engineering from 1932-57, Hughes first joined the faculty in 1923.

BATTALION CLASSIFIED

<p>FOR RENT</p> <p>One bedroom apartment, near East Gate, in closets, garage, utilities paid, couple rate.
