

# Agriculture Trainees Needed; Demand Higher, Says Russell

Recruiting efforts of the Peace Corps is graphically pointing out the shortage of agriculturally trained men now coming from American colleges and universities, an A&M sociologist said here.

Prof. Daniel Russell, chairman of sociology in the Department of Agricultural Economics and Sociology, and Peace Corps college and university contact man for the southwestern states, said few men were trained in agriculture during World War II. Since then, agricultural school enrollment generally has declined.

Domestic demand for graduating agricultural specialists has remained constant, or if any change, has increased, the professor said. There are not enough college graduates to meet domestic demand and all the Peace Corps demands.

"Some of the best agricultural graduates are joining the Peace Corps because of dedication, not because of lack of good job opportunities," the sociologist said.

The Peace Corps, he said, is encouraging former 4-H and Future Farmers of America members to apply for Peace Corps assignments.

He advised rural leaders, especially those working with rural youth, to write for a new bulletin, "Opportunities for Agricultural Specialists in the Peace Corps."

Among the skills mentioned in the bulletin are the following:

Agricultural economists, agricultural engineers, animal husbandmen, farm building specialists, dairymen, diesel engine mechanics, entomologists, machinery mechan-

ics, foresters, foundry technicians, horticulturists, hydrologists, land classification specialists, plant pathologists and physiologists, poultry husbandmen, recreation directors, rural youth organization specialists, road builders, soil chemists and physicists, welders and many others.

"There is still a big field open for rural youth who go to college and study agriculture. Even former 4-H and FFA members with good farm backgrounds may have a chance for travel and semi-professional employment and training and experience," the professor said.

## Portugal Quits United Nations Over Support

LISBON, Portugal (AP) — Premier Antonio de Oliveira Salazar smarting from lack of concrete support against India's conquest of Goa, said Wednesday Portugal plans to quit the United Nations -but set no date.

"I do not know whether we shall be the first country to abandon the United Nations, but surely we will be among the first," the gray-haired dictator, 72, told the National Assembly in a broadcast address read for him by the assembly's president.

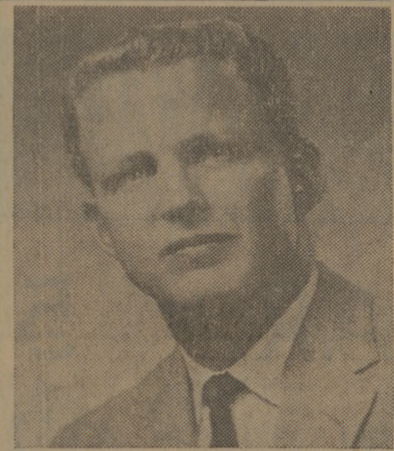

"Meanwhile, we shall refuse them our collaboration in everything that is not in our direct interest," he added.

He criticized the United States and Britain-Portugal's major allies-and the United Nations for their failure to give Portugal more than oral backing in the enclave war of Dec. 18-19.

"When small nations are defeated it is sad and afflicting," Salazar said, "but the inability of the great to defend the right is incomparably graver."

**Aubrey M. Jameson Jr.**  
A member of A&M's prize-winning wool judging team, Aubrey is a 2.12 student who was the first person of undergraduate level to be both coach and contestant on A&M's wool judging team. He also won individual honors in two national contests.

**Max Henry Rhinehart**  
For three years Max has been housemaster of Milner Hall, and is a junior in the School of Veterinary Medicine. He is working with the Century Study Committee, and is a member of the student chapter of AVMA.

### CORRECTION

The photo of Max Henry Rhinehart and photo and article on Aubrey M. Jameson Jr. were inadvertently switched in the Dec. 15 issue of the Battalion, with Jameson's picture appearing above Rhinehart's write-up, and Jameson's write-up and Rhinehart's picture omitted. Here they appear correctly.

## SMITH

(Continued From Page 1) who is recognized for his editorials in humanity and government.

Timberlake outlined some of the accomplishments each of the five young Texans has made to the people of Texas and to their profession.

Smith conceived and developed a mathematical technique for computing the pattern make by radium treatment needles. This produces an exact pattern of the amount of radiation, thereby giving the physician a constant check on treatments given to cancer victims.

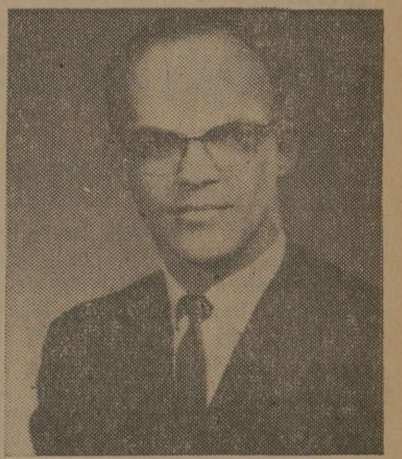

"I was very taken aback by this honor even though I knew I had been nominated," Smith said. "We started from scratch here and were very surprised to be recognized for our work."

Smith is presently working on a modification of his formula, but is most proud of the Data Processing Center that he has helped develop since 1948.

"To me, the establishing of this organization is more important than the formula," says Smith.

E. R. Gregg is now serving as president and director of the Texas Bank and Trust Company in Jacksonville. He has been a member of many local and national civic organizations, and is a captain in the US Army Reserve.

McCracken, while working his

way through Baylor University, began a company, which is today known as the Word Records, Inc., the world's largest producer of religious recordings. McCracken is an ordained minister and has devoted his life to telling the story of Christianity through recorded inspirational and devotional messages.

Thornton, at the age of 23, was elected to the office of District Attorney of the 27th Judicial District. At that time he was the youngest district attorney in Texas.

Woodson gained prominence as editor of the Brownwood Bulletin and his campaigns for social improvement in the Brownwood area.

### Aggie Confectioners

These Aggies are finishing up a 50-pound batch of pecan fudge, a class project in a horticulture fruit and vegetable processing course. Dr. E. E. Burns, associate professor of horticulture, said the purpose of the fudge making was to explore the fundamentals of working with saturated sugar solutions and utilizing pecans in confections. Welding the big paddle is Percie Lamar of College Station, a food technology senior. Pouring is Gerald Heddins of Freeport, horticulture senior. Holding the tray is James DeMont of Bryan, also a horticulture senior.
