

Former A&M Prof Seminar Speaker

Dr. F. C. Whitmore, a former professor at A&M, will speak at a seminar sponsored jointly by the Department of Nuclear Engineering and the Department of Physics on Friday at 3 p.m. in the Physics Building.

Whitmore's topic will be "Containment of Magnetic Fields in Super Conducting Material." He is now with the Jet Propulsion Lab in California.

Also speaking at this two-hour seminar will be Dr. H. J. Stein, of the Sandia Corporation in Albuquerque, N.M. His topic will

be "Radiation Damage in Crystal-line Solids."

All persons who have an active interest in the utilization of nuclear energy in science and engineering are invited to attend the meeting.

Report Of System Ready On Request

Copies of the Annual Report of the Chancellor are now available on request, according to the System Information and Publications Office.

Persons desiring copies of the report should direct their request to the System Information and Publications Office, 222 System Administration Building, or call VI 6-4915.

Head To Make Trip

Delbert M. McGuire, head of the Department of Journalism at A&M, will attend the meeting of the Accrediting Committee of the American Council on Education for Journalism to be held Saturday in Chicago.

McGuire will attend as alternate for the committee chairman, Dr. DeWitt C. Reddick, dean of the School of Journalism at the University of Texas.

Lady Meat Judge

Sue Diller, a Texas Tech senior from Albany, confers with Henry Elliott, manager of the Meats Industry Laboratory at Tech in Lubbock. Miss Diller is the first girl to make a Tech judging team, and one of the few ever to compete on any meats judging team. (AP Wirephoto)

Co-Ed Meat Judger Leads Texas Tech Contest Team

LUBBOCK, Tex., (AP) — Most co-eds and even housewives find trouble picking out the best cuts of meat at the supermarket. But Sue Diller has no difficulty.

She is the first co-ed to make the Texas Tech meat judging team. Coach Dale Zinn says she is leading the team in practice.

"She's particularly strong in writing reasons, a big part of the contest," Zinn says.

Miss Diller is one of the few women ever to compete on any meats judging team. She won the berth by placing in the top four in Tech's meats judging and grading course last semester.

The co-ed is a senior animal husbandry major with emphasis on the animal science option.

"I first enrolled in zoology when I entered college," she said. "I guess I was scared of all those boys in animal husbandry. There were just too many of them."

She was reared on a ranch near Albany. The ranch includes 960 acres in Texas and 3,470 acres at Deer Trail, Colo.

"During the winter we keep the cattle on the ranch at Albany, then move them to Colorado for the summer," Miss Diller explained.

"This makes the climate better for our feeder calves."

Sue has other talents that come in handy around Tech's animal husbandry department. For example, last year she edited the Block and Birdle Club's annual report covering the year's activities. It won fifth place in a national contest against 30 other reports.

"It's a lot like a scrapbook, and boys just don't enjoy working on such things as much as girls enjoy it," she said.

Miss Diller also is the club co-historian.

She isn't sure of her plans following graduation. "I might use

the training to work for the government in meat grading and inspection," she said. "But it also will be valuable to me as a housewife by helping me get the most and the best for my money."

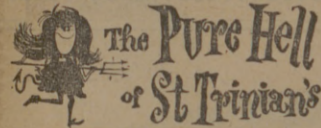

Miss Diller said her fiancee is a cotton farmer near Slaton.
