

# THE BATTALION

Volume 60

COLLEGE STATION, TEXAS FRIDAY, APRIL 27, 1962

Number 107

## Junior Ball, Federal This Weekend

### Review Team On Campus

#### BULLETIN

As of 10 Friday morning, both the inspection and review were still planned in spite of rain. Lt. Col. T. A. Hotchkiss announced. If rain prevents the inspection, cadets will move inside to continue the proceedings. The review would be cancelled in case of continued rain, the colonel said.

A team of 12 inspecting officers from Fourth Army Headquarters at Fort Sam Houston has arrived on campus to conduct the annual Federal Inspection of Army units in the Corps of Cadets.

The group, headed by Lt. Col. Thomas F. Bienvenu, inspected facilities of the Department of Military Science and Tactics Friday, and will view the Corps Saturday morning.

An inspection in ranks of each Corps Army unit is scheduled from 7:45-8:45 a. m. Saturday, with a review of the units to follow at 9:15. The inspection will be held at the respective drill areas, with the review on the Main Drill Field in front of the Memorial Student Center.

Col. Bienvenu and two other members of the inspection team arrived here Thursday around 5 p. m., while the other nine inspectors reached campus around 3 Friday afternoon.

The official itinerary for the inspection begins Friday morning with a briefing with Col. Frank Elder, professor of military science. This was followed by a conference with Dean of Students James P. Hannigan and Commandant Col. Joe E. Davis, after which the visitors inspected administrative records in the Military Science Building.

They then inspected instruction and classroom facilities in the MS Building and lunched with the Corps in Duncan Dining Hall.

Friday afternoon they conferred again with Col. Elder, visited and were briefed by cadet officers and inspected ROTC property facilities, the motor pool and the rifle range.

In addition to the inspection and review Saturday morning, the inspectors are expected to offer a critique of their findings.

### Moore Banquet Speaker

Clyde Moore, refuted as the world's "greatest barber," will join the "Debonaires" from Houston at Saturday night's Junior Ball and Banquet in Sbis Hall.

Moore, from Hearne, will be the guest speaker, while the Debonaires will provide the music at the 9 p. m. dance.

The banquet will begin at 6:30 p. m. in the annex to Sbis Hall, with the dance scheduled at 9 in the main room.

Tickets, at \$1.50 per person for the banquet and \$3 per couple for the dance, are now on sale at the cashier's cage in the Memorial Student Center. They will also be sold at the door.

An added highlight will be the presentation of the Junior Sweetheart from five finalists. The finalists, and their escorts, are:

Nancy Jean Craddock from Austin, escorted by J. F. (Jeff) Brainerd.

Claude Ann Riggs from Beaumont, escorted by James R. Collins.

Cassandra Smith from San Antonio, escorted by Dan Scarborough.

Judith Ann Farmer from San Marcos, escorted by Paul Vilecoq.

Mary Ann Prejean from Nederland, escorted by Edward J. Bellow.

Committee chairmen for the festivities are Charles Blaschke, coordinator; Sheldon Best and Adrian de Graffenreid, program and guest; Frank Townsend and Dudley Griggs, tickets and finance; Al Weaver and Johnny Meyer, decorations; Shelby Traylor, sweetheart; and Bill Brashears and Bill Royal, publicity.

No theme has yet been decided for the dance, according to Brashears.

### Warning Issued By County Attorney

County attorney Brooks Cofer has requested that the citizens of the Bryan-College Station area be alerted to the fact that the Old Koppe Bridge is dangerous and has been condemned for vehicular traffic.

According to Cofer, vandals have attempted to burn the timber left in the bridge, and have been guilty of "promiscuous" shooting of firearms in the general area of the bridge.

Legal authorities have been alerted to arrest anyone engaging in such activities.

### The 'Cajun' Appears Tonight In G. Rollie

A man with some serious ideas and a usually serious job will turn over a new leaf in G. Rollie White Coliseum tonight at 8, as he steps on the stage with a hearty "I Gawr-On tee!"

Justin Wilson, a professional safety consultant in his usual role, will take on his comedy role of "The Cajun" in an appearance here.

"Ole' Joostan," as his Cajun friends call him, is a native of Denham Springs, La. It was through his work as a safety consultant that he has become known as a foremost American humorist. His first album was a recording of one of his many safety talks, but many people thought his performance was exceptional and brought his recording.

Wilson says he tells his famous Cajun tales and "when they ain't looking, I slip in a few things about safety."

This routine has met with the wholehearted approval of columnists and writers, who have commended his handling of the Cajun dialect, along with his ability to entertain and inform all kinds of people.

The doors will open at 7:15 p. m., with the price of admission either an activity ticket and identification card, or \$1. No seats have been reserved, according to Robert L. Boone, Town Hall adviser.

Appearing with Wilson will be June Terry, who has had recent engagement on television and in

Las Vegas Clubs. She is a popular singer and has songs out on the Dot label. Miss Terry is now appearing at the Boulevard Club in Houston.

### School Boards Set Meeting Here May 2

School board members and superintendents of schools from 18 counties will meet here for a one-day workshop May 2 to discuss vital issues and problems in Texas public school education.

Sponsored by the Department of Education and Psychology, the 1962 workshop is part of a statewide effort of the Texas Association of School Boards to determine ways of helping schools improve their programs.

Dr. Leon Graham, assistant commissioner of education, Texas Education Agency, will speak on "Crisis in Public Education" at the dinner session Wednesday evening. The concert choir of A&M Consolidated, under the director of Frank C. Coulter, will supply the entertainment.

The workshop will get underway at 3 p. m. with a welcoming address by J. B. Hervey, president of the A&M Consolidated School Board, followed by a panel discussion of "Quality Education—Achievement or Goal?"

### Travel Committee Requests Return Of Display Books

Due to an apparent misunderstanding on the part of some persons, 30 books and 58 pamphlets are missing from the MSC Travel Committee's display, which was set up in the MSC Fountain Room.

Reggie Richardson, chairman of the committee, said the persons apparently thought the books could be removed from the fountain room and the pamphlets kept. However, the committee had borrowed the books and pamphlets from Cushing Memorial Library, and face a heavy expense if they are not returned.

Richardson asked that if someone had mistakenly picked up a pamphlet or book, he would appreciate the return of it to either the Student Program Office in the MSC or to the second floor of Cushing Library.

"We will appreciate this help, and are sorry if there was some misunderstanding about the books and pamphlets," Richardson said.

### Annual Awards Talks Highlight MSC Banquet

James Ray officially took office as president of the Memorial Student Center Council last night at the annual council and directorate banquet held in the MSC Ballroom.

Program for the evening featured an exotic banquet meal, presentation of various MSC distinguished service, appreciation and special awards, the annual address by Michael M. Schneider, outgoing Council president, and the main address of the evening by Dr. Earl E. Harper, director of the Iowa Memorial Union, State University of Iowa.

In his address, Harper sought to portray the full image of the College-university union, in its many areas of service and activity. The noted college union authority presented basic ideals that are common with all unions, to include fostering personal fellowship between professors and students, and between students and other students.

He explained the responsibility of the union to the university family, which includes even much more than students, faculty and administration members, or others directly associated with the educational institution, but to the many guests visiting the "living room" of any campus as well.

"Recreation is important, and there are many fine products of it. After one is relaxed, an essentiality for anyone, he is ready to tackle the job at hand with much more enthusiasm and ability. The union provides for this in a number of ways," said Harper.

"But if we are not careful, the union can easily become considered a glorified fun palace and extended snack bar.

### Prof Sets Summer Study At Oak Ridge

Jack M. Inglis of the Department of Wildlife Management will study the effects of radiation on man's environment during a seven-week institute this summer at Oak Ridge, Tenn.

Inglis is one of 20 college and university teachers chosen to learn how to evaluate the effects of radiation on plants and animals in nature.

During the first phase of instruction, Inglis will hear discussion to set the stage for the study, followed by field trips and field experiments.

Later the professors will learn uses of radioisotopes and other new tools in teaching and conducting research for a better understanding of the impact of atomic energy on man's environment.

The last two weeks will involve independent research applying techniques learned with problems resulting from atomic waste disposal and fallout.

Following the summer project, Inglis hopes to begin research in radiation ecology here. He pointed out that further study is needed on effects of atomic waste disposal and fallout on plants and animals.

"Little research has been done," Inglis said, "regarding the effects of radiation in nature. Ecologists are about 50 years behind the physiologists in study of nuclear effects."

The Oak Ridge project is sponsored by the National Science Foundation and the U. S. Atomic Energy Commission, in cooperation with the Ecological Society of America.

Inglis emphasized that the very small quantities of radio active materials in nature are not dangerous and "no catastrophe is expected tomorrow."

"But," he added, "there is a need to understand the implications of releasing quantities of unnatural radio active materials into man's environment. How, for example, will low doses of radiation affect man through his environment. What effect will it have upon plants and animals consumed by man. What use can be made of radioisotopes to study natural processes."

### Underwood Given Top B. A. Award

Leonard E. Underwood, son of M. E. Underwood, 404 W. Commerce, Brownwood, has been awarded the Wall Street Journal Student Achievement Award as the outstanding business student.

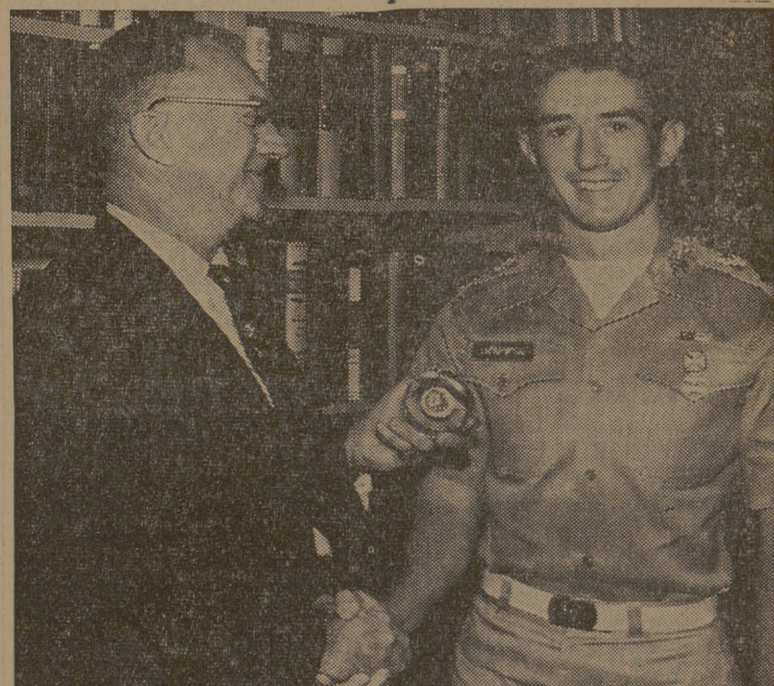

Underwood, who is a business partner with his father in the operation of Underwood's Barbecue and cafeteria of Brownwood, was selected for the honor by a faculty committee of the Division of Business Administration.

He has been a Distinguished Student for six semesters. He will receive his B.B.A. degree in May.

Underwood is married to the former Mary Jo Smith of Brownwood. He is a 1958 graduate of Brownwood High School where he was the highest ranking boy scholastically in the graduating class.

In high school he won the Math Award, was a Junior Rotarian, was voted the boy most likely to succeed, and was a member of the National Honor Society.

At A&M he is a member of Phi Kappa Phi, a national scholarship society made up of those in the top 10 per cent of their graduating class. He is a first lieutenant and scholarship officer for Company D-2.

Receives Journal Award

Leonard E. Underwood, right, of Brownwood, receives the Wall Street Journal Student Award as the outstanding business administration student at A&M. Presenting the award is Rollin L. Elkins, associate professor of business administration. Underwood was selected for the honor by a faculty committee of the A&M Division of Business Administration. (College Information Photo)

MOSCOW—Soviet scientists sent the fourth Sputnik of their Cosmos series chasing around the earth Thursday.

The launching of Cosmos IV, apparently an unmanned vehicle, was announced in the midst of a busy international day in space.

#### U.S. NEWS

NEW YORK—The nation's two largest steel producers, U.S. Steel and Bethlehem, were indicted Thursday with two smaller firms on federal charges of rigging bids and fixing prices on forgings. Sales involved were estimated at \$100 million a year.

The grand jury complaint had no connection with the \$6-a-ton increase in steel prices earlier this month, which was spearheaded by U.S. Steel. The increase later was

#### CAPE CANAVERAL, Fla.—

The United States and Great Britain teamed together Thursday and launched a scientific satellite.

This feat, coupled with a joint U.S.-Japanese rocket launching at Wallops Island, Va., signaled a new era in international space cooperation.

#### WASHINGTON—

Secretary of State Dean Rusk differed Thursday with Soviet Foreign Minister Andrei A. Gromyko about the ex-

tent of progress toward a Berlin settlement. Rusk said that there is no agreement yet on any particular point at issue in the current U.S.-Soviet talks.

He added, however, that a number of problems could be speedily resolved if the central points in dispute could be settled. Rusk emphasized that this would require Soviet acceptance of the continued presence of Western forces in West Berlin and guarantees of access to Berlin.

#### WASHINGTON—

Arthur S. Flemming protested Thursday he has been put in a position of seeming to withhold information from a Senate investigation of government stockpile contracts. Actually, he said, he is the victim of a faulty memory.

Flemming, a former director of the Office of Defense Mobilization, was questioned for the second day about orders he issued in 1955 which permitted copper producers to reap handsome profits which he himself had described as a "possible windfall."

#### TEXAS NEWS

DALLAS—Vice President Lyndon B. Johnson and his wife, Lady Bird, escaped injury Thursday when a twin-engine military jet aircraft slipped off a Love Field runway.
