LSO PHYSICS PROF

New Dean Named In Arts, Sciences

Dr. Charles F. Squire, noted contributor to research in low-temperature physics, has been appointed associate dean of the School of Arts and Sciences.

His former research director for the Standard Division of the Aircraft Corp. will assume his new post on Sept. 1.

Dr. Squire's particular assignment as associate dean will be in the field of research and development in the physical sciences," Dr. Squire said. "He will also serve as professor of physics."

Dr. Squire said Dr. Squire represents the School of Arts and Sciences in working with other administrative officers in encouraging and stimulating the research program in the physical sciences. G. W. Schlesselman will continue as associate dean of Arts and Sciences for student academic affairs.

Dr. Squire earned his Ph.D. in chemical physics at Johns Hopkins University in 1937 and a post-doctoral fellow at the University of Paris in 1937-38.

Before joining the United Aircraft Corp. in 1960, he was a professor of physics at Rice University from 1947 to 1960.

During World War II, Dr. Squire was a guided missile project advisor for the Office of Scientific Research and Development.

High Schoolers

We No Wheels

High school students doing work at A&M under the auspices of the National Science Foundation at the college are faced with a transportation problem, said J. Sperry, professor of biology and director of the program for talented students.

Some of these boys who live in Hart Hall are doing research work at various laboratories west of the railroad tracks," said Sperry.

One of these boys has transportation of their own, so Sperry has asked the aid of M students who own bicycles. Sperry guarantees proper care for the bikes and will personally see to it that they are not damaged by anyone and can be reached by phone at either VI 6-4144 or VI-41.

High School 'J' Students Hear Distinguished Speakers

The 310 high school journalism students attending the fourth annual Texas High School Journalism Workshop this week heard tips from distinguished people in their field, in a series of talks designed to broaden the scope of school publications.

One of the three scheduled speakers was Max Haddick, executive vice president of Newsday, Inc. Haddick told the students from all over Texas that there is no inherent right to freedom of the press.

"Freedom of the press is a privilege that must be earned anew with every word in the story you write," Haddick urged the students to look for stories with more substance. "Small talk, gossip, and catty remarks have no place in school publications, which have a serious duty to fulfill." He cited, for example, a survey of editorial content in recent editions of school newspapers.

The papers studied, he reported, had editorials calling for school spirit, 31 gave the student body "heck fire" for littering school grounds, 17 talked about Christmas becoming too commercial, 11 told the students to be harder and 4 exhorted boys to be more courteous to girls.

The second speaker was Paul Swennson, director of Newspaper

and was a scientific consultant to the U. S. Navy.

His principal fields of teaching in physics have been graduate studies in low temperature physics, statistical mechanics and thermodynamics, optics, vibration and sound, and spectroscopy.

Dr. Warren D. Evers, formerly of Racine, Wis., has been appointed to the School of Veterinary Medicine as an assistant professor in the Department of Veterinary Medicine in the Department of Veterinary Medicine and Surgery.

The veterinarian received his Doctor of Veterinary Medicine degree in 1945 from Michigan State University. He has been in private practice in Wisconsin since that time except for two years (1950-52) when he served in the U. S. Army Veterinary Corps.

Herman D. Brown has been named Instructor in the Department of Agricultural Education, according to Dr. Earl H. Knebel, Head of the Department. For the past year Brown has been a graduate assistant in the department.

Brown will work primarily with teaching, advising the Collegiate Chapter, F.F.A., and with first and second year agricultural education students.

Brown graduated from A&M in 1953. He served five years in the Army with sixteen months in Korea. He will receive the Master of Education degree from A&M in August.

Godwin Succeeds Smith On 'Batt'

Robbie D. Godwin, '61 from Robert Lee, takes over editorship of The Battalion with this issue.

Godwin, a graduate business administration student, will serve in the editor's chair for the remaining issues of the second summer session. He holds a bachelor's degree in journalism and boasts four previous years of experience on the editorial staff of The Battalion.

The new editor succeeds Larry B. Smith, '62 from Brady, who qualified for his bachelor's degree in journalism at the conclusion of the first summer session.

Funds, Inc., of the Wall Street Journal. Swenson told the students to dedicate their talents to the voice of democracy. He emphasized that the duty of journalists is to present only "the most sincere and correct news possible." He pointed out to student interviewers that there were many opportunities for both male and female journalists in the field.

"In fact," he said, "a recent study in California revealed that over 25% of those employed by newspapers in that state are female."

The field of journalism is becoming less and less a field for "Men Only," he said. "These new opportunities are not only in the newspaper area, but also trade and business publications, and in the field of public relations."

Last night, the high schoolers selected the finalists in the nominations for workshop queen and witnessed skits satirizing journalism, presented by various groups of the students.

Tonight, the finalists will be presented in the MSC Ballroom and selection of the queen of the workshop, "Miss Summertime, 1962," will be made.

Immediately following the pageant will be a dance which will also be held in the MSC Ballroom, with the facilities of the Terrace made available. The Aggiland Combo will provide the music.

Guest speaker for the final general assembly of the junior journalists tomorrow morning will be Walter Humphrey, editor of the Fort Worth Press.

Following the talk by Humphrey will be the presentation of awards to the delegates who have made exceptional contributions or done outstanding work in the workshop. Each participant in the workshop will receive certificate stating that he took part in the 1962 Texas High School Journalism Workshop at A&M.

DR. C. F. SQUIRE ... recent appointee

New Olympic Pool Named For Alumnus

A&M's popular new facility, its outdoor olympic style swimming pool, has been named in honor of one of the school's most distinguished alumni, Wofford Cain of Dallas.

The name was officially approved by recent action of the board of directors of the Texas T&M College System.

The huge L-shaped pool, first constructed at a cost of more than put to use this summer, was \$200,000. The project was initiated after a major contribution was made by the Former Students Association of the College. It is 165 feet by 60 feet in the main area, with a 75 by 45-foot leg. It has six diving boards and the most modern of filtering and purification equipment.

Cain is a 1913 graduate of A&M. He is now chairman of the Board of Southern Union Gas Company and of Aztec Oil Company. He has long been active in A&M affairs, having served as chairman of the board of the A&M Development Foundation Fund, trustee of the A&M Development Foundation and a member of the Century Council.

He has supplied many academic scholarships for boys attending the college under the Opportunity Awards program.

A native of Athens, Texas, Cain graduated from A&M in 1913. His business career has included service as President and Chairman of the Board of Southern Union Gas, President of Aztec Oil, chairman of the board of Delhi Oil corporation, and director of the Mercantile National Bank, Dallas.

INSPECTS AGGIES

Dean Of Students Tours ROTC Camp

Dean of Students, James P. Hannigan, speaking of his recent visit to Fort Sill, Oklahoma, where approximately 225 Aggies are currently undergoing training, said, "The Aggies are doing quite well, this year, as always."

A&M again has the largest number of cadets at the summer camp. The school with the next largest number of cadets is Oklahoma University with approximately 150.

While there he visited with the 225 Aggies who are undergoing summer training as a part of the advanced senior ROTC program. A&M has the largest group of cadets at the camp this year, according to Hannigan.

A&M's cadets are mixed with approximately 1325 other cadets from colleges and universities in the southwest to form the 1600-plus cadet corps.

Hannigan dined with the Aggies in a mess hall reserved for the occasion. He pointed out that

Firefighters Open Session Here Sunday

Firefighters representing 20 states and 425 cities open a five-day workshop here Sunday, with approximately 1,700 firemen expected to register for the 33rd Annual Texas Firemen's Training School.

The School, sponsored by the State Firemen's and Fire Marshals' Association of Texas, will be conducted by the Engineering Extension Service cooperating with the Industrial Education Division of the Texas Education Agency.

The basic firefighting course includes the burning and extinguishing of a five-room furnished house, training in sprinkler systems operations, and training in all types of fire extinguishers.

In addition, the advanced firefighting course will emphasize petroleum fires and the industrial firefighting course will concentrate on actual fire fighting of industrial fires.

The training school is conducted by 260 experienced instructors made available by municipalities, industries, manufacturers, state and federal agencies, and armed services. Equipment and supplies are loaned or donated.

Thirteen separate 30-hour training courses will be offered, and completion of the course with a grade of 70 or better results in a certificate for the department and the firemen.

The successful completion of the required courses by the visiting firemen will result in key rate insurance credit being awarded to Texas cities and towns represented by firemen at the school. Credits range from three to five per cent, depending upon the number of firemen in attendance.

The delegate firemen are engaged in fire prevention, control and safety for municipalities, industries and armed services. They will be housed during the five-day school in the cadet dormitories located in the north section of the campus. Feeding facilities will be provided by Sbis Dining Hall.

The training school, held annually on the A&M campus, is one of the largest of its kind in the nation. Chief Henry D. Smith of the firemen training program has played an important part in preparations for this year's school.

Cherry Named To Top Position

Tom D. Cherry, former management controls director of Trans World Airlines in New York, has been named Director of Business Affairs for A&M.

The appointment was announced today by President Earl Rudder. Rudder added that Cherry's extensive background and experience in management will add great strength to the college.

In his new position, Cherry will be responsible for the overall business affairs of the college. As such, his duties will involve personnel policies, budgets and other fiscal affairs.

He will serve on the academic council, research council and executive committee of the college.

TOM D. CHERRY ... new business director

Grid Priority Ticket Sale Nears End

The final deadline for purchasing priority tickets to this fall's three Aggie home football games is less than two weeks away—July 31.

Priority ticket sales began July 1 when more than 50,000 order blanks and ticket information leaflets went through the mails to students, former students, faculty and staff members, stadium option holders and the general public.

Appropriation To Cut Costs For Academy

Students who attend A&M's Texas Maritime Academy next fall can now expect to go as cheaply as a student enrolled on the main campus.

The reason is that the House Appropriations Committee recommended Tuesday that \$105,000 be appropriated in the fiscal year for the new academy.

Capt. B. M. Dodson, head of the academy, said \$30,000 of that amount would be given to the students of the academy at the rate of \$50 per month.

Rep. Clark W. Thompson of Galveston said yesterday he had "every expectation" that the House of Representatives and the Senate will approve the appropriation.

Capt. Dodson said a great step has been made and that he was pleased that this assistance would be given to the TMA students.

Capt. Dodson and a delegation of Texas people appeared before the committee in March to request the appropriation. It was for \$75,000 to be used by the academy under the State Maritime Academy Act of 1958, and \$30,000 for allowance for each student's textbooks, basic uniforms and subsistence.

The state Legislature had appropriated \$285,000 for a two-year period which began in September of 1961.

The new administrative official has experience in banking, manufacturing, college teaching, college business management and airline management controls. He has served on various committees of both state and federal agencies.

A native of New Waverly, Texas, and a former A&M faculty member, Cherry received his bachelor's degree from Sam Houston State College and his master's from A&M. He has done doctoral work at the University of Texas and Columbia University.

Following graduation from Sam Houston in 1932, Cherry served as business manager of the Huntsville school. He joined the economics faculty here in 1938 and became director of economic research with the Texas Engineering Experiment Station in 1941.

From 1943-45, Cherry was Director of Business Controls for the A. O. Smith Corp. in Houston. He joined TWA in 1945, as Director of Sales Research at Kansas City and moved in 1949 with the transfer of the executive offices to New York.

He has been active in many areas of TWA's management, including market analysis, office administration, budgetary costs, and management controls.

Cherry was married in 1940 to the former Minnie Pope St. Clair of Brownwood. The Cherrys have two children, Ann, a senior at Rice University, and Tom, a sophomore at the University of Texas.

Seagoing Lawyer

Louis Newman, first Bryan man to enroll in the Texas Maritime Academy, looks at a sextant as he talks to Capt. Bennett Dodson, superintendent of the TMA. Newman, who was graduated from Stephen F. Austin High School this spring, is interested in Maritime law. After completing his maritime schooling, he plans going to sea for a year or so as a marine transportation officer and then attending law school.

PAUL SWENNSON ... workshop speaker
