

# Aggies To Attend Medical Schools

Former students at A&M have been accepted for dental and medical studies at nine institutions throughout the United States for the 1962-63 school year.

Among the 25 admitted to the schools are three scholarship winners.

Luis A. Bernhardt Jr. of Fort Worth is cashing in on a \$1,500 grant at the School of Osteopathy at Kirksville, Mo.

Other Aggies awarded grants were David Carter, \$300 to study at the University of Texas Medical Branch at Galveston; and William M. Pederson of Lufkin, \$1,500 to study at the University of Texas Southwestern Medical School at Dallas.

A&M students and their new schools are:

Charles Burg and Clifton Smith—University of Texas Medical Branch at Galveston.

Charles G. Briseno, John Hall, William L. Hutton, George E. Lowke and Charles F. Skripa—

University of Texas Southwestern Medical College at Dallas.

Ogden Baur, John N. Harrington and Harry H. Pendery—University of Tennessee Medical School at Memphis.

Doyle G. Graham—Duke University College of Medicine at Durham, N.C.

Robert T. Solis—Yale University College of Medicine at New Haven, Conn.

Edward L. Bowden—School of Osteopathy at Kirksville, Mo.

Tommy J. Davidson and Carlton Lee Sage—Baylor University Dental College at Dallas.

Richard A. Box, David C. Chapa, Robert L. Donahue, Bernard J. Haegelin, Robert P. Korth and Gerald L. Ray—University of Texas Dental Branch at Houston.

James E. McGregor—University of Tennessee Dental Branch at Memphis, Tenn.

## MSC Dances Feature Girls

Registration for the annual MSC dance classes will begin Tuesday night in the Ballroom of the Memorial Student Center.

Interested pupils may enroll between 7:30 and 10:30 for three consecutive Tuesday nights. Admission will be \$5 per person for the semester, with classes to be instructed by Manning Smith, a dance instructor in Bryan.

A dance party will be held at the end of the semester.

## Ag Fish Plan First Meeting

The Freshman Agricultural Society will hold its first meeting in the Animal Industries lecture room Tuesday at 7:30 p.m., according to Dr. Richard C. Potts, assistant director of agricultural instruction. He said all freshman agricultural students are automatically members of the organization.

Potts said purposes of the society are to inform its members of the many occupations in agriculture, to aid them in choosing an agricultural major and profession, to promote better relationships among freshman students in the School of Agriculture and to give freshman students an opportunity to become acquainted with members of the teaching staff in the School of Agriculture.

## Conservative Club Calls First Meeting

The A&M Conservative Club will hold its first meeting of the year in Rooms 2-A and 2-B of the Memorial Student Center at 7:30 p.m. Tuesday.

"The Red Myth," a documentary film on Communism, will be shown. All students interested in joining should attend this meeting.

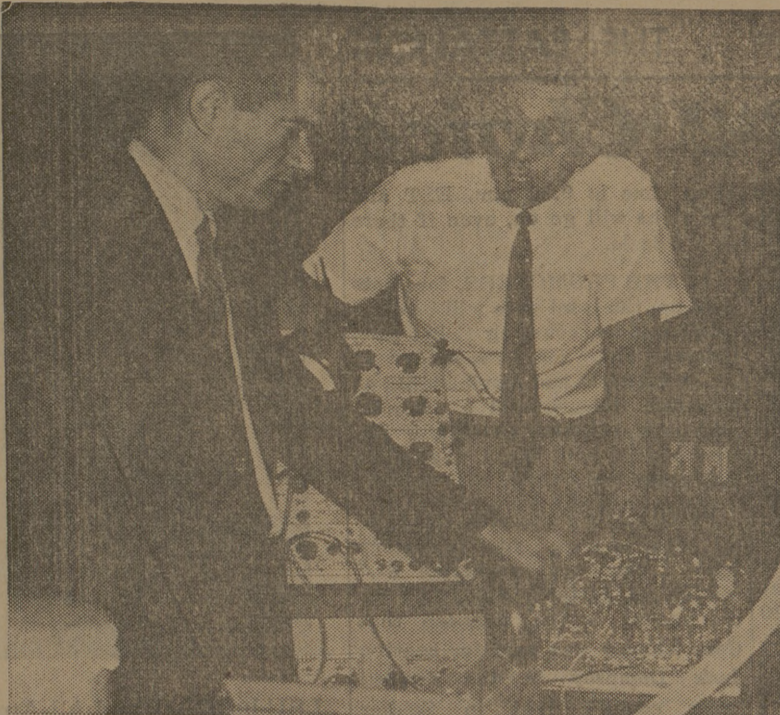

## SHSTC Offers Night Classes To Residents

The Women's Auxiliary to the Texas Student Chapter of the American Veterinary Medical Association is promoting extension classes from Sam Houston State Teachers College as a service to its members.

A representative from SHSTC, W. C. Perkins, will meet with those interested Tuesday at 7:30 p.m. in the auditorium of the A&M Consolidated Junior High School. Perkins will discuss courses which can be offered and make final arrangements for the courses.

The classes will meet one night a week for sixteen weeks in the Bryan area. The courses will be for either undergraduate or graduate credit.

Classes will start the week after the discussion meeting. The fee is usually \$30.00 for a three hour course. In the past, history, government, education, art and library service courses have been offered by extension here.

### Activation Analysis Lab Visitor

Dr. Robert A. Dudley (left), physicist with the International Atomic Energy Agency, Vienna, Austria, is shown some of the equipment in the Activation Analysis Research Laboratory by Dr. Edgar L. Steele, chief scientist at the laboratory. Dudley, who is interested in medical isotope procedures, visited the facility to learn about possible applications of activation analysis techniques.

### AMONG THE PROFS

## Dairy Science Professor Returns From World Trip

Dr. I. W. Rupel, head of the Department of Dairy Science, and Mrs. Rupel, have just returned from an around-the-world trip that took them to 15 countries and capital cities.

The main purpose of the trip was to attend the 16th International Dairy Congress Sept. 2-7 at Copenhagen, Denmark. Rupel was appointed by the U.S. Department of State as one of 10 official delegates to represent the United States at the Congress. More than 3,000 dairy scientists, industry executives and government officials and wives attended.

Denmark's King and Queen opened the congress. The Rupels were guests at a reception given by King Frederik and Queen Ingrid Sept. 7 at their summer castle

## 100 Journalists Meet Here Soon

More than 100 journalists from 20 schools are expected to attend the 10th annual Texas Junior College Press Association here Oct. 7-9.

Among the speakers will be Dr. C. C. Colvert, acting dean of College of Education and consultant in junior college education at the University of Texas, and Jack Mohler, city editor of the Houston Press.

During the three-day meeting, the junior college journalism students will hear various news media speakers and attend yearbook and newspaper workshops.

The annual conference will begin with registration at 5 p.m. Oct. 7, Dr. John C. Merrill, journalism professor and director of the conference, announced.

Registration will be followed with a sponsors' meeting and get-acquainted sessions for student delegates, Merrill added.

Dr. Frank W. R. Hubert, dean of the School of Arts and Sciences,

## Retired General Appointed To Transportation Institute

Appointment of Maj. Gen. John P. Doyle, USAF, retired, as professor of the Thomas H. MacDonald Chair of Transportation has been announced by Dean Fred Benson of the School of Engineering.

The chair is the senior position in the Texas Transportation Institute. It was established in tribute to the memory of the late Thomas H. MacDonald by his friends and admirers.

"GEN. DOYLE is a nationally recognized authority in the field of transportation," Benson said. "He will provide outstanding leadership in broadening the scope of our studies of transportation."

Gen. Doyle retired in 1956 after 30 years of service with the U.S. Air Force. He was recalled to active duty in 1959 at the request of the Senate commerce committee and spent 18 months directing a study of national transportation policy.

Now with the Transportation Consultants, Inc., in Washington, D.C., Doyle will assume the MacDonald Chair next March or April after completing a seven-month assignment in Africa for the consulting firm.

A NATIVE OF Washington,

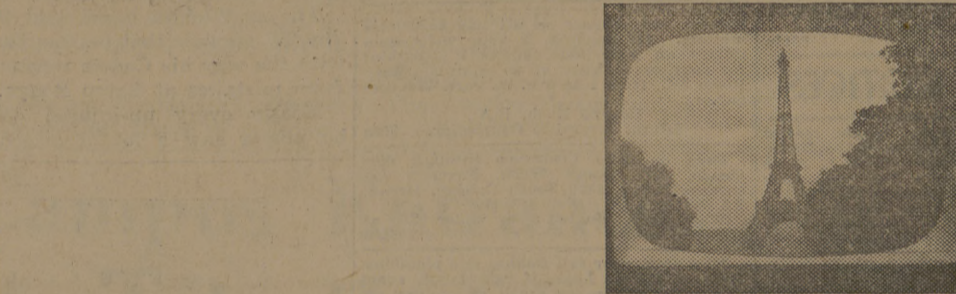

D.C., Doyle graduated from the United States Military Academy at West Point and was commissioned a second lieutenant in the cavalry in 1926.

Transferred to the Army Air Corps in 1932, the general has been credited with a major role in the growth of airpower as a powerful weapon of the United States. In World War II, he was commander of the famed "Martin Marauders" and saw service in the Pacific, North African and European campaigns.

During the Korean conflict, he commanded the Far East Air Materiel Command, responsible for logistical support of the air forces of the United Nations.

Four years prior to his retirement, Doyle served as director of transportation for the Air Force with worldwide policy responsibility. While assigned to this post in Washington, he was honorary president of the National Defense Transportation Association.

Gen. and Mrs. Doyle, the former Catherine LaMon, have a son, Capt. John P. Doyle Jr., assigned to the U.S. Army Transportation Corps.

## Reflections of Telstar

Remember the picture above? It flashed across your television screen on a hot night last July. Perhaps you remember that it originated from France. And that it reached the U.S. via Telstar, the world's first private enterprise communications satellite.

Since that summer night, the Bell System's Telstar has relayed electronic signals of many types—television broadcasts, telephone calls, news photographs, and others.

But there's one Telstar reflection you might have missed. Look into the faces of the Bell System people below and you'll see it. It is the reflection of Telstar's

success that glowed brightly on the faces of all who shared in the project.

Their engineering, administrative and operations skills created Telstar and are bringing its benefits down out of the clouds to your living room.

These Bell System people, through their talented, dedicated efforts, make your phone service still better, more economical, and more useful.

The reflections of Telstar are many.
