

Breazeale Heads Personnel Group

W. G. Breazeale, a veteran staff member, is the new president of the Texas Association of Student Personnel Administrators. The organization held its annual meeting recently at Lamar State College of Technology in Beaumont.

Breazeale, a civilian student counselor, has been on the A&M staff for 15 years.

All colleges in Texas are eligible to join the association, which considers college student and campus life. The 1963 conference will be held in Austin.

Breazeale, a native of Crockett, was graduated from A&M in 1935.

He also holds a Master of Science in Industrial Education degree from the college. Prior to military service in World War II he taught school and coached in athletics.

Breazeale is active in the southwestern association of student administrators.

Dean of Student James P. Hannigan and Breazeale represented A&M at the Beaumont Conference.

Automotive Society Schedules Movie For Tuesday Night

A film on "Modern Well Logging" will be shown Tuesday night at a meeting of the Society of Automotive Engineers.

The meeting will begin at 7:30 p.m. in Room 228 of the Chemistry Building. Schlumberger Well Surveying Corp. representatives are presenting the film program.

The film should be of general interest to students in geological, petroleum and electrical engineering, said Warren Walker, president of the S.A.E. student chapter at A&M.

On hand to answer questions will be Schlumberger representatives James A. Cowan Jr. and Wayne Leverkuhn of Houston. Both were graduated from A&M in 1956.

Aggie Becomes A King

Steve Hammack of Ferris, a member of A&M's prize-winning meat judging team, is crowned king of the lamb graders at the American Royal Livestock Show in Kansas City. Crowning Hammack is Carolyn Barre of Yoakum, Miss Wool of 1962.

PUBLIC INVITED THURSDAY

Canadian Engineer To Speak In Graduate Lecture Series

Dr. Robert F. Legget, a civil engineer from the Canadian National Research Council, will speak on "Engineering in Canada Today," Thursday at 8 p.m. in Room 231 of the Chemistry Building as part of the Graduate Lecture series.

Since 1947, Legget has served as director of the Division of Building Research of the National Research Center, Ottawa.

Legget has been elected to serve as secretary-general for the Sixth International Soil Mechanics Conference at Montreal in the summer of 1965. This is described as "a position of great international significance" because advances in the fields of soil mechanics and foundation engineering are paced by such conferences.

His most recent book, "Geology and Engineering," is just off the press. It already has gained recognition as one of the best three books on the subject.

The Canadian engineer is a member of various professional organizations. He holds his master's degree from the University of Liverpool and the LL.D. degree from McMaster University, Hamilton, Ontario.

Legget came to Canada in 1929 after four years' practice in Scotland and London and engaged in heavy construction work until 1936. He then joined the staff of Queen's University. In 1938 he moved to the University of Toronto, remaining there as teacher and consultant on soil and foundation problems

Religious Emphasis Program Outlined

Dean of Students James P. Hannigan outlined Tuesday what was termed a "streamlined program" for this year's Religious Emphasis week.

"This new concept for Religious Emphasis Week, recently approved by the college executive committee, will take full advantage of the excellent speakers and counselors in our local churches," the dean said. He noted that in past years speakers and counselors had been "imported" for Religious Emphasis Week, a practice begun when there were few churches adjacent to the campus.

"The central speaker in Guion Hall will be replaced this year with off-campus programs in each of the local churches," Hannigan said. "This will allow the men who know our students best to conduct programs over the entire week emphasizing the need for religion in their daily life."

To encourage attendance, Hannigan said that evening rather than morning meetings will be scheduled and would be held off-campus. Call to quarters will be changed from 7:30 to 8:30 p. m. for the entire week so that military students may attend.

To provide continuing emphasis on religion throughout the year, Hannigan said the college would continue the series of speakers in the All-Faiths Chapel.

"In the future, however, these speakers will be scheduled on a weeknight other than Wednesday to avoid conflicts with established mid-week services in local churches," he said.

Date for Religious Emphasis Week is Feb. 17-22. He said that conferences with all local ministers and denominational student workers would be scheduled soon to make detailed plans for the event.

According to Texas Press Association outdoor writer Vern Sanford every ounce of boating water in Texas is behind a dam that has been built to impound it. There is no natural lake among the 400 in the state.

Pest Control, Aviation Course Scheduled Here

The 12th annual Texas Agricultural Aviation Conference and Pest Control Short Course will be held here Feb. 24-26.

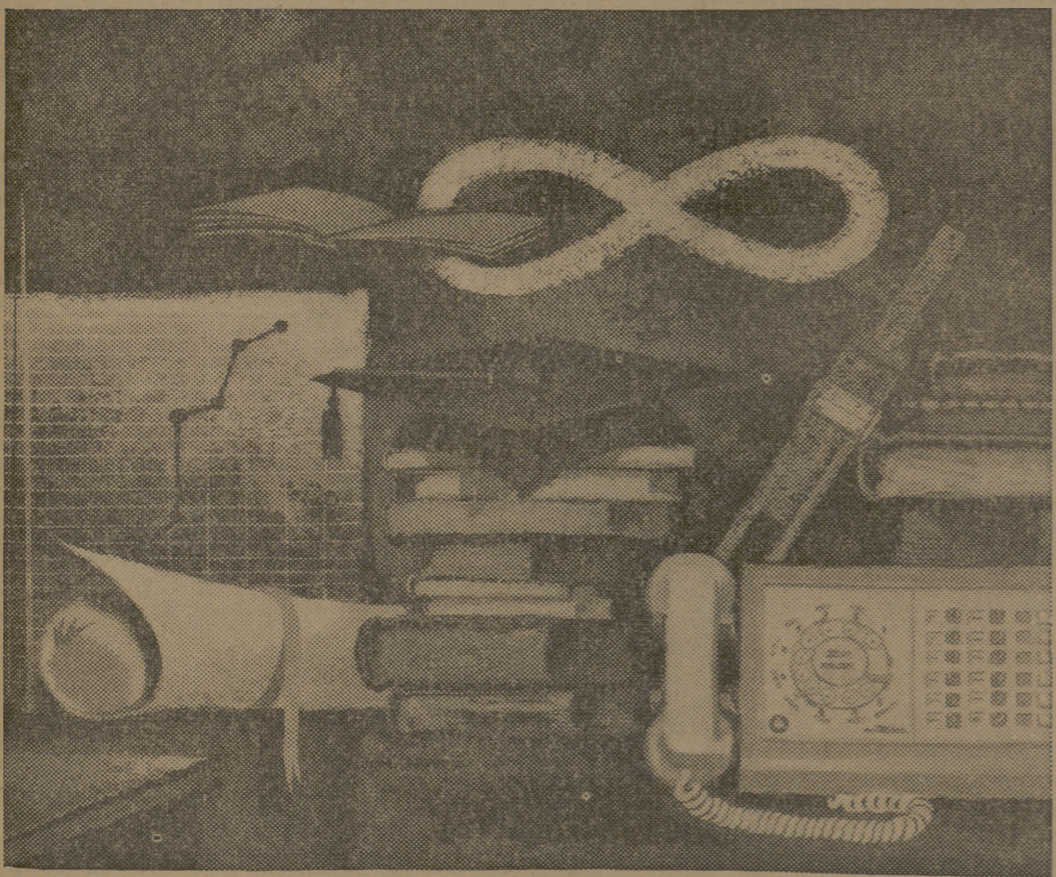

Joe Brusse of the Department of Aeronautical Engineering, the program chairman, said one of the main features of the conference will be a field demonstration of the latest agricultural aircraft and aerial spraying equipment.

The meeting is sponsored by A&M, the Texas Aerial Applicators Association, Texas Flying Farmers and Ranchers Association and the Texas Aeronautics Commission.

It is impossible to resign from the French Academy.

Learning never stops for engineers at Western Electric

There's no place at Western Electric for engineers who feel that college diplomas signify the end of their education. However, if a man can meet our quality standards and feels that he is really just beginning to learn... and if he is ready to launch his career where learning is an important part of the job and where graduate-level training on and off the job is encouraged - we want and need him.

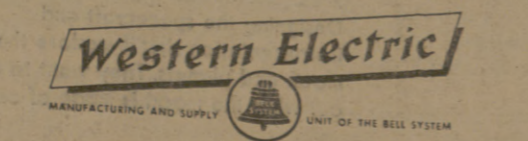

At Western Electric, in addition to the normal learning-while-doing, engineers are encouraged to move ahead in their fields by several types of educational programs. Western maintains its own full-time graduate engineering training program, seven formal management courses, and a tuition refund plan for out-of-hours college study.

This learning atmosphere is just one reason why a career at Western Electric is so stimulating. Of equal importance, however, is the nature of the work we do. Our new engineers are taking part in projects that implement the whole art of modern telephony, from high-speed sound transmission and solar cells to electronic telephone offices and computer-controlled production techniques.

Should you join us now, you will be coming

to Western Electric at one of the best times in the company's history. In the management area alone, several thousand supervisory jobs are expected to open up to W.E. people within the next 10 years. And our work of building communications equipment and systems becomes increasingly challenging and important as the communications needs of our nation and the world continue to increase.

Challenging opportunities exist now at Western Electric for electrical, mechanical, industrial, and chemical engineers, as well as physical science, liberal arts, and business majors. All qualified applicants will receive careful consideration for employment without regard to race, creed, color or national origin. For more information about Western Electric, write College Relations, Western Electric Company, Room 6206, 222 Broadway, New York 38, New York. And be sure to arrange for a Western Electric interview when our college representatives visit your campus.

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J.; Teletype Corporation, Skokie, Ill.; and Little Rock, Ark. Also Western Electric distribution centers in 33 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.

OFFICIAL NOTICES
Official notices must be brought, mailed or telephoned so as to arrive in the Office of Student Publications (Ground Floor YMCA, VI 6-6415, hours 8-12, 1-5, daily Monday through Friday) at or before the deadline of 1 p. m. of the day preceding publication - Director of Student Publications.

Those undergraduate students who have 95 semester hours of credit may purchase the A. and M. ring. The hours passing at the time of the preliminary grade report on November 12, 1962, may be used in satisfying the 95 hour requirement. Those students qualifying under this regulation may leave their name with the ring clerk in the Registrar's office in order that she may check their records to determine eligibility to order the ring. Orders for the rings will be taken between November 27 and January 4. The rings will be returned for delivery on or about February 1, 1963. The ring clerk is on duty from 8:00 a. m. to 12:00 noon, MONDAY THROUGH FRIDAY OF EACH WEEK ONLY.
