

Architects' Plan Accepted

John W. Focke, William R. Do-reen, David Lee and Douglas S. Ogilvie third-year architecture students here, received first place Tuesday for the best preliminary

planning and design for a group municipal utility and maintenance buildings for the city of Bryan. The third-year design students, a total of 11 teams of four students

each, were given this problem one month ago. A council of four judges chose the best project they thought would best meet the city's expanding needs.

The present facilities, as they now exist, are hardly sufficient to meet the expected population increase for 1980. Serving on the panel were Fred Sandlin, city manager of Bryan; Robert W. Harris, San Antonio architect; Ray Downey, Bryan city engineer; and C. R. Watson, Bryan architect.

Watson commented that the work presented by the students was "remarkable for third-year level, in brochure, program, and final presentation."

OFFICIAL NOTICES
Official notices must be brought, mailed or telephoned so as to arrive in the Office of Student Publications (Ground Floor YMCA, VI 6-6415, hours 8-12, 1-5, daily Monday through Friday) at or before the deadline of 1 p. m. of the day preceding publication - Director of Student Publications.

Persons desiring to apply for senior class concessionaire to sell pennants and trays should contact either Charles Blaschke or Chuck Nichols or leave their name at the secretary's desk in the Student Program's Office. The person selected as concessionaire will operate on a commission basis and will be in charge of management and sales. Names and addresses should be turned in before Friday, Dec. 14, 4444

Those undergraduate students who have 95 semester hours of credit may purchase the A and M ring. The hours passing at the time of the preliminary grade report on November 13, 1982, may be used in satisfying the 95 hour requirement. Those students qualifying under this regulation may leave their name with the ring clerk in the Registrar's office in order that she may check their records to determine eligibility to order the ring. Orders for the rings will be taken between November 27 and January 4. The rings will be returned for delivery on or about February 1, 1983. The ring clerk is on duty from 8:00 a. m. to 12:00 noon, MONDAY THROUGH FRIDAY OF EACH WEEK ONLY.

Transcripts Prove Life-Long Friends

A college transcript is for life — longer than a person's lifetime in fact. A&M has the official records of the academic careers of its earliest students.

"And we have men 60 years of age or older occasionally calling for copies of their transcripts," Registrar H. L. Heaton said.

The value of the official transcript — nothing more really than a completed form 8½ by 11 inches in size — may be unrecognized by some students. But the registrar's office provided approximately 15,000 copies of transcripts during the past fiscal year.

A transcript contains a variety of information about a student's academic career, plus personal details.

A&M follows the uniform transcript guide prepared by the American Association of Collegiate Registrars and Admissions Officers.

"Drops for deficient scholarship and discipline are permanent entries on the academic record and show on the transcript," Heaton said.

Requests for copies of transcripts come from geographical areas around the world — wherever Aggies are located.

Some men request as many as 10 copies of their transcript at one time.

"Transcripts can usually be furnished in a day unless they are requested at the end of a semester or during registration," Mrs. Edith S. Graham, transcript clerk, said.

One type of request received with regularity, but which cannot be granted, goes as follows, "Please mail my transcript to Col-

lege (or university) without my last semester's grades." A transcript must show all of the courses and grades for a student's academic career.

A&M has a complete file of academic records for all students since the college opened except for "a few records" destroyed when the Main Academic Building burned in 1912.

The transcript department provides various services in addition to supplying requests of former students for copies of their academic record. Filling out forms requested by various agencies and businesses is among other services of the department.

SHULTS HONORED ... by Planthaber (right)

Shults Wins Senior Award In Accounting

A senior from Fort Worth, William T. (Tommy) Shults, has been chosen the outstanding senior majoring in accounting and the recipient of a \$500 scholarship award from the Haskins and Sells Foundation, Inc., of New York City. Haskins and Sells is a national accounting firm.

Presentation of the check and a letter of commendation was made this week in the office of President Earl Rudder by William J. Planthaber, a partner in the Houston office of Haskins and Sells. He acted on behalf of another partner in the Houston office, Daniel N. Sheehan.

Shults has an overall grade point ratio for his college career of 2.84 points, and has an even higher average grade in accounting courses.

He was chosen from approximately 100 A&M seniors who are majoring in accounting, Dr. Robert M. Stevenson, professor and acting head of the Division of Business Administration, said.

Selection of the winner is based upon a number of factors, with scholarship being most important, Associate Professor Walter S. Manning said. He heads the accounting section of the Division of Business Administration. The other factors considered by the selection committee were leadership, student activities and classroom participation.

Lecture Set Here On Lunar Analysis

An A&M engineer, Morris B. Lee, will lecture next Tuesday on "Development of a Means for Lunar Soil Analysis." Lee's lecture is being sponsored by the Institute of Aerospace Sciences and will be open to the public.

The lecture is scheduled at 7:30 p.m. in Room 228 of the Chemistry Building.

Lee, a veteran of missile launchings at Cape Canaveral, is the project engineer for the Activation Analysis Laboratory and an assistant professor in the Department of Aerospace Engineering.

Most cheer indicate approval or acclaim, but at least one is derogatory—the famous Bronx cheer.

Engineering, Science Contests Scheduled For JETS Meeting

Contests in engineering and science subjects will test the brainpower of Junior Engineering Technical Society high school members from throughout Texas at the annual JETS Conference here March 15.

A series of four contests have been announced by JETS conference chairman J. G. McGuire, assistant dean of engineering.

The March 15 meeting is the day before the annual Career Day held here for high school students.

High school members of JETS may compete in two of four contests in mathematics, drawing, slide rule and engineering science, McGuire said.

The mathematics contest will in-

clude progressively more difficult problems in algebra, plane geometry, trigonometry and solid geometry. The contest in drawing will combine freehand and instrument work, including perspectives and projections.

Problems in the slide rule contest will be divided into multiplication and division, squares and square roots, cubes and cube roots, trigonometric evaluations, common logarithmic and natural logarithmic computations. Problems in chemistry and physics will be part of the engineering science contest.

Participants are expected from many of the 66 active JETS high school chapters in Texas.
