

Information Experts Win Five Citations

Information specialists here it, to receive five citations of students for publications and releases contained in the American College Public Relations Association's annual competition this week in Washington.

The winning entries from A&M were chosen from 165 publications published by major state-supported and private colleges in Texas, Oklahoma and New Mexico.

Projects earning honors, and authors, included citation of information merit to Doyle Gougler by the American College Public Relations Association for his story on Dr. R. D. Turk's earning citations of merit in news releases on the Convention, written by members of the Information Staff; the "1962 Council Report" and "Report for Progress" designed by the Buser of College Information, the "Faculty-Staff Handbook" written by Dean of Instruction W. Staff; and the "1962 Chancellor's Report" edited by Normandean, director of system information.

BSU Director To Lead Tour To Lebanon Youth Conference

Dr. Cliff Harris, director of the Baptist Student Union, has been named a tour director for the sixth Baptist Youth World Conference in Lebanon this summer.

The conference, which is included in the 1963 Certified Bible Lands

ALSO IN STATE SCHOOLS Enrollment Figures Rise In Land-Grant Institutions

(Special to The Battalion) WASHINGTON—Reflecting the national increase in enrollment, state universities and land-grant institutions enrolled 7.3 per cent more students in the fall of 1962 than they did the previous year.

According to figures compiled by the Joint Office of Institutional Research from U. S. Office of Education statistics, 94 state universities and land-grant institutions enrolled 1,126,639 degree-credit students, out of a national total of 4,206,672. These schools represent just under five per cent of the total of 2,034 institutions of higher education included in the Office of Education survey.

THE OVERALL national increase in enrollment from fall 1961 to fall 1962 was 8.1 per cent—moving up from 3,891,230. Enrollment at private institutions rose 4.6 per cent during the period. Slightly more than six out of every ten students—61 per cent—were enrolled in public institutions in the fall of 1962, and 43.3 per cent of this number were at state universities and land-grant institutions.

The Office of Education fall 1962 survey covered all resident and extension enrollments of full and part-time students taking work nor-

mally creditable to a bachelor's degree or higher. It included graduate and undergraduate institutions as well as junior colleges.

AN ANALYSIS by the Joint Office of enrollment trends during the past six years shows that while state universities and land-grant institutions have accounted for an increasing percentage of students in graduate and professional fields, their percentage of total enrollments has dropped slightly. While aggregate enrollment rose 42.7 per cent and enrollment in state universities and land-grant institutions rose 37.6 per cent since 1956, the percentage of students enrolled in these institutions has dropped by one per cent.

Graduate Program In Statistics To Be In Operation Next Year

The Graduate Institute of Statistics is developing the first program of its type in Texas, Associate Director R. J. Freund reported Thursday.

The institute is preparing to offer during the 1963-64 academic year the necessary courses for a master's degree and the first year of the doctoral program, Freund said.

Dean Wayne C. Hall of the Graduate School said that appointment of statistician as director of the institute will be announced this spring.

Freund has been here since August, and the institute gained a second faculty member this semester. The new teacher is Eugene Dayhoff, who expects to receive a doctorate later this year from the Iowa State University.

Three statistics courses are offered this semester.

Ace Soviet Spy Boiled By Woman

ANBERRA, Australia (AP)—nearly two years, Soviet diplomat Ivan Fedorovich Skripov maintained secret contact with an Australian woman.

They rendezvoused in a Sydney exchange messages in ink in a grave as a place for a Canadian passport and tapped out messages on a radio transmitter.

The Australian government announced this Thursday, accusing Skripov, first secretary of the Soviet Embassy, of elaborate espionage and that he and his wife seven days out of the country.

That Skripov didn't know, the woman said, was that the man was working for Australian intelligence.

Foreign Minister Sir Garfield Barwick announced that Skripov had been declared persona non grata. He released 25 photographs of the woman, the grave, and the man whose picture appeared on the Canadian passport and the radio transmitter.

Barwick said Skripov first met the woman April 4, 1961 at the Sydney Park Zoo in Sydney. She asked her for help and he gave her a sum of money, Barwick said. Over the 22-month period, the foreign minister said,

Skripov paid her \$952. The money was turned over to the Australian Security Intelligence Organization.

The Soviet Embassy called the charges absolutely groundless and rejected an Australian protest note. The embassy warned that the accusations would inflict damage on relations between Russia and Australia.

Harris, a graduate of A&M, has been director of the BSU for 10 years. While a student here, he was the first Chaplain of the Cadet Corps.

Four thousand students and student workers are expected to attend the tour and conference. Texas schools with delegates registered now are Sam Houston State College, University of Texas, Arlington State College, Mary Hardin-Baylor, Odessa Junior College, Hardin-Simmons and Rice University.

Evangelist Urges Texas Prohibition

AUSTIN (AP)—A radio evangelist recommended Thursday that Texas return to statewide prohibition.

Sam Morris, San Antonio, appeared before the House Liquor Regulation Committee in protest of a proposal by Rep. V. E. Red Berry of San Antonio to allow beer to be sold two extra hours every day.

Berry's proposal had contained a provision which would allow liquor stores to remain open the same hours as beer taverns, but he agreed to have a subcommittee take this proposal out of the bill.

"AS A representative of the good mothers of the WCTU (Women's Christian Temperance Union) I am opposed to this because it will promote juvenile delinquency, increase teenage crime and discourage Sunday school and church attendance," Morris said.

Morris said he is a Baptist minister, rancher and advisor to the WCTU.

Berry described his bill as good for getting tourists to come to Texas and a revenue producer.

"PEOPLE DON'T come to Texas because there's not a dog-gone thing to do," Berry said. "This law close at midnight and 1 a. m. Sunday was passed in 1943 to get the war factory workers to bed early."

Berry's proposal would allow taverns to stay open until 2 a. m. and 3 a. m. on Sunday.

J. J. Hill, Austin law student, said the present law is a "nuisance." "This change won't make

people stay out later if they don't want to," he said.

Rep. Bill Hollowell, Grand Saline, cited Bexar County traffic death figures in which he said 53 of 76 automobile deaths were related to drinking.

Television Station In Bryan To Begin Air Force Series

Bryan's television channel 3, KBTX-TV, Saturday will begin a weekly television series on the history of air power in cooperation with the Department of Air Science. The program has been allocated a 30 minute period each Saturday afternoon at 12:30 for 15 weeks.

The series features the official production "The Air Force Story," which traces the development of military aviation from the Civil War and then the delivery of the first airplane to the Army by the Wright brothers all the way through the aerial combat of the Korean War. These films include many sequences from Air Force files never before publically shown.

The "Air Force Story" chapters to be shown Saturday depict the advance in aviation between World War I and Hitler's rise to power in Germany. This period included such events as Lindbergh's solo flight across the Atlantic.

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Fantastic?... Listen!
Last year in the United States one million pounds of sleeping tablets were manufactured.
Each night American people swallowed 12 million doses.
Each night the nervous tensions of millions of people were relaxed artificially and temporarily. No worry was banished; no fear disappeared. No problem came nearer to solution because of a pill... and sleep. Troubles were merely postponed.
Peace of mind and rest come, not through pills, but through power found in trusting God.
Then develop that power by going to church regularly. Find there a faith that grows and gives courage. And pray for "Whatsoever you shall ask in My name, believing, you shall receive."

Deadline Nearing for College Board Entrance Exams

High school students planning to apply for admission to A&M and who have not made arrangements to take the College Entrance Examination Board tests should act immediately, according to S. A. Kerby, director of the Counseling and Testing Center.

The deadline for applying for the March 2 test date is Feb. 16. The next test date after early entry is May 18. Applications to take the tests on that date must be completed not later than May 4. Test results are used for counseling and placement purposes.

SYSTEMS ENGINEERING

Outstanding career possibilities are available for Bachelor's or Master's in Mathematics, Business, Engineering, or the Physical Sciences. Why so diverse? Computers are used today for problem solving in all fields. Systems Engineering Trainees enter a training program designed to develop an outstanding consulting force in all uses of computers. To find out more, interview IBM on Feb. 14 and 15.

IBM
Be sure to get the full story on a career in Systems Engineering from IBM. Campus interviews on Thursday and Friday, Feb. 14 & 15, 1963.
