Baylor May Elect Coed Yell Leaders

Baylor students will vote next Thursday to decide if coeds will be eligible for election as school yell leaders. Baylor is the only Southwest Conference school other than A&M that doesn't have girl cheerleaders.

If students vote to have coed cheerleaders, girls will be allowed to compete in Baylor's May Day yell leader election.

Three reasons have been given for the vote:

1. The question has not received proper consideration in the past.
2. The last several votes on the issue have been very close.
3. Political manipulation have distorted the issue in the past.

late for the game and that ticket vendors "refused to sell any more tickets, standing room or otherwise, no matter what amount of money, wampum, chickens, hogs, cows and other farm animals were offered to them."

"Conduct like this could possibly be passed off, except for the fact that there were empty seats inside, and if allowed entrance, there were many exits through which a student could view the game," the irate students noted.

According to the letter writers, even people who had already purchased tickets and had left the coliseum to lock their cars were refused re-admission.

Tech Enrollment Hits Spring High

Spring enrollment at Texas Tech surpassed all previous records last week when 10,235 students signed up for classes. And late registration was still in progress when the record figure was announced.

The spring figure is second only to last fall's all-time record enrollment total.

Tech officials expressed little official surprise at the record number.

UT Students Claim 'Foul'

Four Texas University students, in a letter to the editor of the Daily Texan, claim that they were refused admittance to last week's Texas-A&M basketball game even though there were vacant seats in G. Rollie White Coliseum.

The students say they arrived

New Innovation To Old Twist...

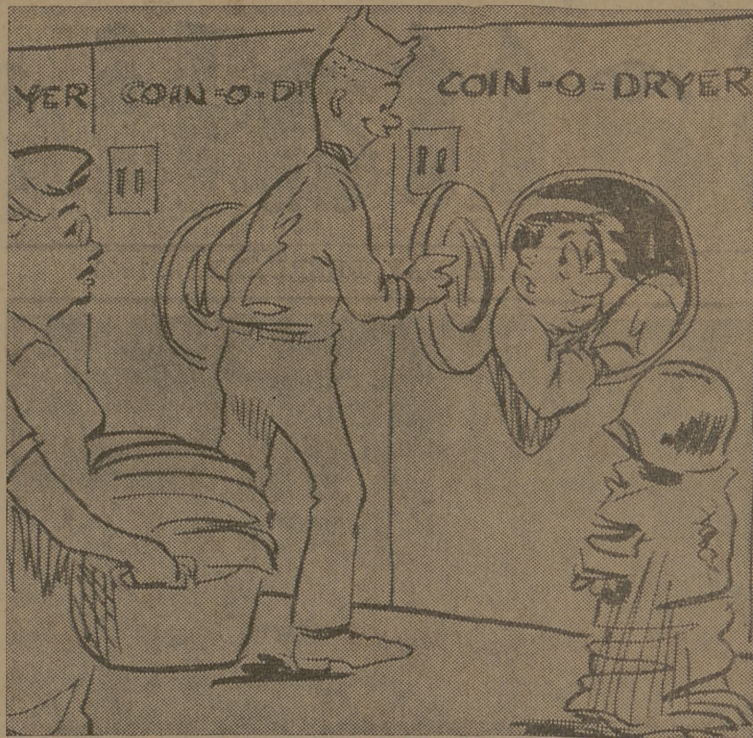

Free Advertising

Another gimmick has been devised to promote Texas' tourist industry.

Rep. Myra Banfield of Fort Bend County, representing District 30, has advocated that Texas vehicle license plates be imprinted with the words "vacation state" to focus attention on the state's tourist industry and attractions.

The representative commented: "My contention is that the vehicle plates offer an untapped potential as a cost-free medium of advertising which could be utilized to good advantage. Other states have long been using this medium of free advertising as their method of promotion."

She added that the highway department is being asked to order the imprinted plates.

... Are you guys sure this is part of President Kennedy's physical fitness program?

— Job Calls —

The following firms will interview graduating seniors in the Placement Office of the YMCA Building:

- Thursday**
- General Tire and Rubber Co. — Chemical engineering, industrial technology, mechanical engineering and business administration.
 - Natural Gas Pipeline Co. of America — Chemical engineering, civil engineering, electrical engineering, mechanical engineering and petroleum engineering.
- Thursday and Friday**
- Argonne National Laboratory — Chemical engineering, electrical engineering, mechanical engineering, nuclear engineering, chemistry, physics and biology, BS, MS, PhD; mathematics, BA, MA, PhD; biochemistry and nutrition, PhD; veterinary medicine, DVM.
 - Bell Telephone Laboratories, Inc. — Electrical engineering, and mechanical engineering, BS, MS; physics, MS.
 - Dow Chemical Co. — Chemical engineering, chemistry, mechanical engineering, industrial distribution and agricultural economics, BS, MS; business administration, BBA, MBA.
 - IBM — Accounting, business administration, agricultural economics, chemistry, mathematics, physics, data processing, electrical engineering, industrial distribution, industrial engineering, mechanical engineering and economics.
 - International Paper Co. — Chemical engineering, BS, MS; electrical engineering and mechanical engineering, BS; chemis-

try, and physics, MS; mathematics, MA.

Sandia Corp. — Electrical engineering and mechanical engineering, BS, MS, PhD; mathematics, MA PhD; physics, MS, PhD; chemistry, PhD.

Science Always Changing

(Second of a series)

A Beneficial Combination
In an age when science and morality are topics of daily discussion, it is well to have a clear understanding of each and of their relation to one another.

Where the nature of science is not properly understood, one may win many an argument simply by declaring, "It's a scientific fact!" This is a vague statement, generally unsupported, based on erroneous opinion that science is

fixed, absolute and certain. Nothing could be further from the truth.

For example, at one time a Swedish chemist named Arrhenius received the Nobel Prize for his electrolytic theory of dissociation. A few years later another scientist named Debye received the same prize for disproving the theory of Arrhenius! It is evident, therefore, that "scientific facts" have a habit of changing, sometimes overnight.

Science, then, may be defined as that human activity which with man's control of nature observes, he experiments, and arrives at an hypothesis, a supposition based on his observations and experiments. He continually discards theories and arrives at new conclusions. Science is always on the move, always reaching upward and outward. It is never perfect, absolute or final. It is a means to an end, an end in itself.

Morality functions in the field of the spiritual rather than the material. It involves the people of right and wrong in general behavior. While science delves into the "How?", morality delves into the "Why?"

When science and morality combined, all mankind benefits materially and spiritually.

Committee Approval May Point To Fate Of Poll Tax

(Special to The Battalion)

AUSTIN—If the rest of the Senate feels like the Senate committee on constitutional amendments, the poll tax may be on its way to extinction.

The committee gave a nine-to-two approval of Laredo Sen. Abraham Kazen's bill to submit to the people a constitutional amendment that would kill the poll tax as of Feb. 1, 1965.

The two "no" votes in committee came from Sen. George Parkhouse of Dallas and Sen. Galloway Calhoun Jr. of Tyler.

"Ayes" came from Sens. Kazen, Charles Herring of Austin, Roy Harrington of Port Arthur, Don Kennard of Fort Worth, Culp Krueger of El Campo, Walter Richter of Gonzales, Aaron Schwartz of Galveston, Franklin Spears of San Antonio and Jack Strong of Longview.

If Kazen's bill passes the full legislature, voters would make the final decision in the 1964 general election. So far, every state that has voted on the federal constitutional amendment to do away with poll taxes, except Mississippi, has voted to drop it.

SYSTEMS ENGINEERING

Outstanding career possibilities are available for Bachelor's or Master's in Mathematics, Business, Engineering, or the Physical Sciences. Why so diverse? Computers are used today for problem solving in all fields. Systems Engineering Trainees enter a training program designed to develop an outstanding consulting force in all uses of computers. To find out more, interview IBM on Feb. 14 and 15.

Be sure to get the full story on a career in Systems Engineering from IBM. Campus interviews on Thursday and Friday, Feb. 14 & 15, 1963.
