

Dr. Knebel Attends AACTE Annual Meeting In Chicago

Dr. Earl H. Knebel, head of the Department of Agricultural Education, is attending the annual meeting of the American Association of Colleges for Teacher Education in Chicago this week.

Teacher Education composed of representatives of the four teacher education departments on campus. The departments are education and psychology, health and physical education, industrial education and agricultural education.

meeting is "The Structure of Electronically-Excited Species in the Gas Phase."

Dr. Donald W. Hood, professor of oceanography, has been chosen by the National Science Foundation to receive a senior postdoctoral fellowship for a year of study at the University of Nottingham in England. He plans to be in Nottingham Sept. 1.

Hood will work with W. David Evans, head of the Department of Geology at the university.

The scientists plan to investigate the influence of organic matter, biological debris fallen to the bottom of a body of water, on the diagenetic processes by which sediment is consolidated into rock.

Hood's approach will be that of a chemical oceanographer and Evans' that of an organic geochemist.

The A&M professor is one of approximately 100 persons chosen to receive National Science Foundation senior postdoctoral grants.

Mrs. Hood and their three daughters will accompany him.

Dr. C. H. Groneman, head of the Department of Industrial Education, is chairman of the Council on Teacher Education. Knebel serves as secretary.

A paper prepared by two A&M physics profs and a graduate student will be presented April 2-3 in Scotland by invitation of the Faraday Society. A&M will be one of three educational institutions in this nation represented on the program.

Co-authors of the paper are Dr. J. B. Coon, C. M. Loyd and graduate student F. A. Cesani, who is from Puerto Rico. Cesani is teaching this year in the Department of Physics of the College of Agriculture of Puerto Rico, Mayaguez.

Coon will read the paper at the meeting to be held at Queen's College, St. Andrews University, Dundee.

"Evidence for a Double-Minimum Potential in an Excited State of Chlorine Dioxide" is the title of the paper.

"We will present evidence," Coon said, "that in some excited electronic states of chlorine dioxide, one chlorine-oxygen bond of the molecule is shorter than the other." He said the evidence is based on ultraviolet absorption spectra of these molecules.

Papers from A&M physicists, the University of Illinois and Vanderbilt University are among the 23 to be presented during the discussion.

The topic for the international

A Fraternal Invitation

Shayne Schneider, a University of Wisconsin freshman from Mamaroneck, N. Y., received an invitation to rush Wisconsin's Psi Upsilon fraternity. She was the only rushee to turn up in spike heels and a sheath dress. "The brothers were wonderful to me," said Shayne. She tried pipe smoking "to establish rapport" with the fraternity men. She reported they offered her a pin, but Shayne said she decided not to accept any bids until she had seen some other fraternities. (AP Wirephoto)

BUSINESS ADMINISTRATION

Analytically inclined? You should investigate a career in our Marketing organization. You can evaluate both the fields of Sales and Systems Engineering by interviewing with IBM Feb. 14 & 15.

Be sure to get the full story on a career in Marketing with IBM. Campus interviews on Thurs. and Fri., Feb. 14 & 15, 1963.
