**Frogs Invade Saturday Night**

Coach Buster Brannon's TCU Horned Frog cagers invade Aggie-land Saturday night in an attempt to salvage something out of the 1962-63 season.

And they have about as much of a chance to do that as does Texas to lose its remaining four games.

But the Frogs will be out for something to remember besides the lone SWC win they have to date. They have the material, but lack a little experience.

Probable starters for TCU will be Bobby McKinley, Archie Clayton, Jerry Wade, Johnny Fowler and Don Rosick. Fowler and Rosick at the forwards are the only seniors on the lineup.

At 6-7, Rosick is the second high rebounder for TCU behind 6-10 Clayton. McKinley and Clayton

lead the team in total points with 252 and 251, respectively. Wade is the third high man in pointage and Fowler is third in rebounding.

McKinley has pretty well been the "Bennie Lenox" of TCU this season. He has not, however, had quite the support. He leads the Frogs in all the stats columns except rebounds.

Feb. 9 at Fort Worth the Frogs were the lads that finally brought A&M back to life after a four-game losing streak. The Ags

**Fish Host Wogs Saturday 6 P. M.**

Shelby Metcalf's Fish basketball team entertains the TCU Wogs in a 6 p.m. prelin to the Aggie-Horned Frog contest Saturday night in G. Rollie White Coliseum.

The A&M frosh will be out for revenge for the 79-73 loss handed them by the Wogs in Ft. Worth. The loss broke a five-game Fish winning streak.

TCU's freshman go into the game with 4-7 record, while the Fish stand 7-2 on the season.

Probable starters for the Fish will be Dick Stringfellow and Joe Roberts at forward, Billy Atkinson and Dick Rector at guards and John Beasley at center.

The Wogs will go with Dale Abshire at center, Jim Terbert and Glenn Middlebrooks at forwards and Roger Potts and Jim Monroe at the guard slots.

trounced Brannon's lads, 85-69, and then ran through SMU and Arkansas in College Station in fine style before hitting immovable Texas Tuesday.

The Frogs have scored 67.8 points per game to their enemies' 75.6. A&M now has 71.8 per game to 66.9 for opponents.

TCU has collected 869 rebounds in 20 games to their foes 926. The

Cadets are 918-783 in that department.

With their 1-9 slate in the conference, the Froggies are at least beyond the worrying state in the SWC race. A&M, with 6-4, dangles in third place with little more to do than wait until it meets Rice in Houston.

Game time is 8 p.m. in G. Rollie White.

**Lenox Keeps 'Em Figuring, Is Nearing Other Records**

Even before he wrecked Carroll Broussard's game scoring record, people were feverishly figuring how many so-and-so's 6-2 Bennie Lenox needed to break such-and-such record.

Athletic department people now keep a separate set of statistics for the League City flash, as well as the set for the varsity team.

Now that he has dropped in the 43 counters to cop the most per game honors, he is nearing other Broussard marks. Lenox needs a 19.75 average in the remaining four games to set a record for most points in a season. He has 460, 78 short of Broussard's 538.

He'll have to hit 24.0 per contest to set the most points in a SWC season mark. The Broussard record is 339 and Lenox has 244.

If Lenox makes eight field goals per game, he will own the record in most from the floor in a season. He has 158, 31 shy of Broussard's 189. For the field-goals-in-conference mark, he is 42 short of Broussard's 119 and will have to hit 10.75 per game.

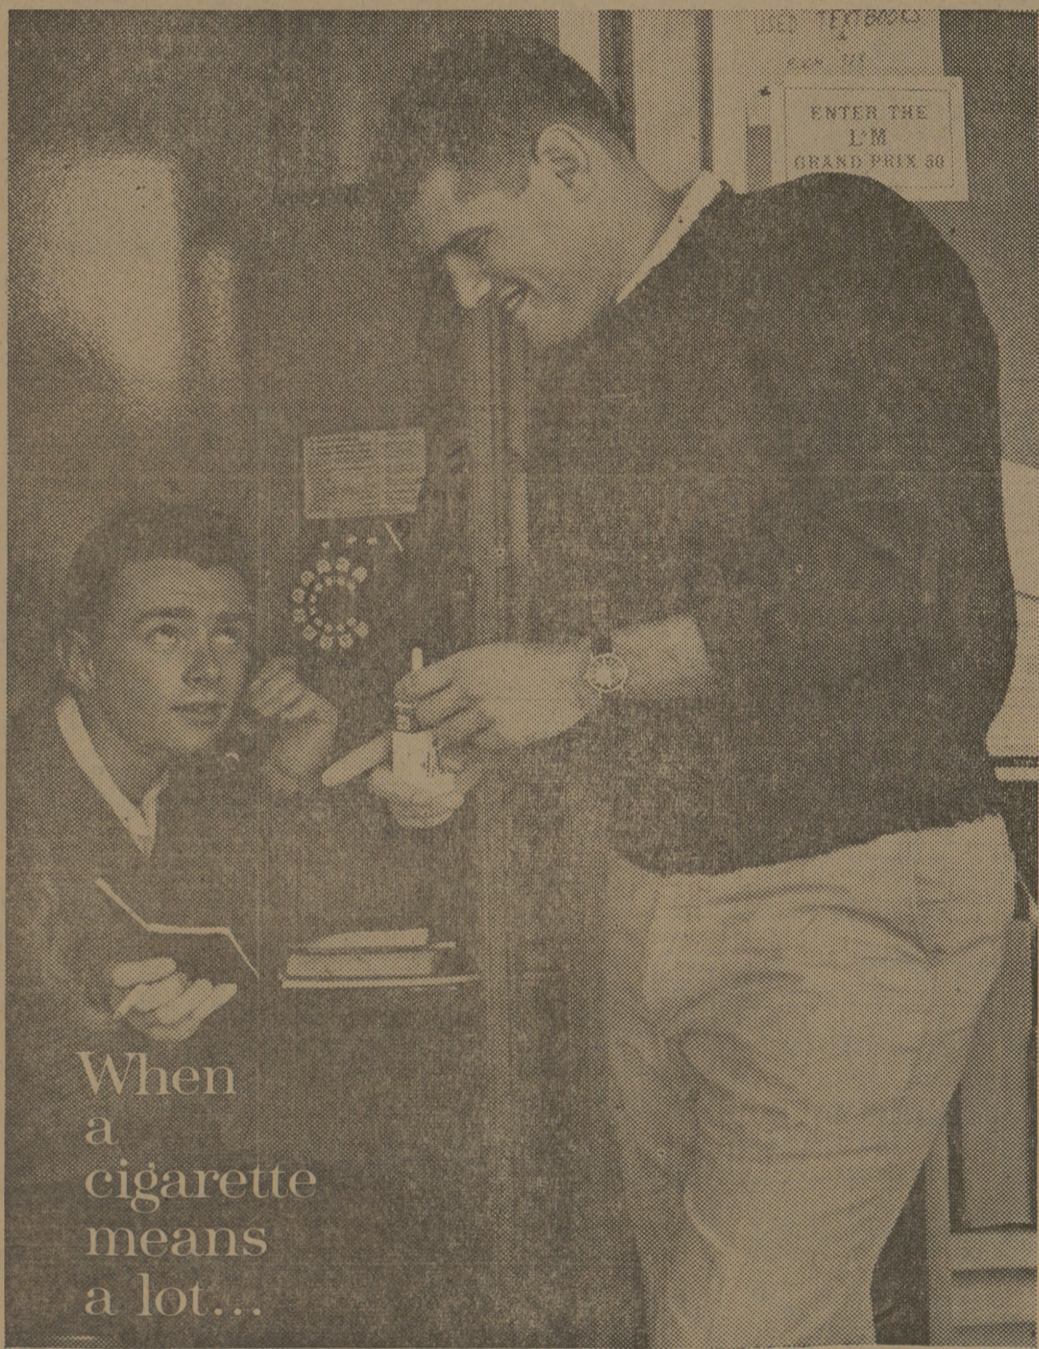

Lenox is almost a sure pick to equal Broussard in free throws for season on SWC play. He has 144 in season play, 14 shy of the 160 record, and will have to hit only 4.25 a contest. He needs only three per game to measure up to Broussard's conference mark of 101.

As an offensive terror over the last few games, the jump-shooting ace has built up some impressive figures. Lenox has averaged 31.8 points in the last five contests (26 vs. Texas, 18 vs. TCU, 35 vs. SMU, 37 vs. Arkansas and 43 vs. Texas).

He has hit 33.3 points in the last four games. Lenox hit 37 consecutive free throws, including 17 of 17 against Arkansas, before missing against Texas after nine straight.

He has made 48 of his last 54 free throw attempts. Lenox is hitting 47 per cent of his field goal tries over the season and 80 per cent of his free shots. His efforts have produced 460 points and a 20-game norm of 23.0.

In the SWC Lenox has hit 44 per cent from the floor (77 of 174 in 10 games), and 83 per cent of his charity shots (90 of 108). He has 244 points in the conference and a 24.4 average.

**get Lots More from L&M**

more body in the blend  
more flavor in the smoke  
more taste through the filter

It's the rich-flavor leaf that does it! Among L&M's choice tobaccos there's more longer-aged, extra-cured leaf than even in some unfiltered cigarettes. And L&M's filter is the modern filter—all white, inside and outside—so only pure white touches your lips. L&M's the filter cigarette for people who really like to smoke.

We'll be on the campus on the dates listed below, ready to give engineering and science seniors information on space-age careers in a dynamic industry.

If you are looking for a company offering assignments on programs of unique interest and career potential, you'll be interested in the advantages Boeing can offer you.

Boeing, for instance, is a major contractor on such advanced programs as the Saturn S-IC first-stage rocket booster, the X-20 Dyna-Soar manned space glider, the solid-fuel Minuteman ICBM, and the Bomarc defense missile system. Boeing is also the world's foremost designer and builder of multi-jet aircraft, including the eight-jet B-52H missile bomber, the KC-135 tanker-transport, the C-135 cargo-jet, and the famous Boeing 707, 720 and 727 jetliners. In addition, Boeing's Vertol Division is one of America's leading designers and builders of helicopters.

Research projects at Boeing are under way in such advanced fields as celestial mechanics, solid state physics, nuclear and plasma physics, flight sciences, space flight and propulsion.

Expanding Boeing programs offer exceptional opportunities to holders of B.S., M.S. and Ph.D. degrees in aeronautical, mechanical, civil, electrical-electronic and industrial engineering, and in engineering mechanics, engineering physics as well as in mathematics and physics. Assignments are available in Washington, Pennsylvania, Kansas, Louisiana, Alabama, California and Florida.

You'll work in a small group where individual ability and initiative get plenty of visibility. You'll enjoy many other advantages, including an opportunity to take graduate studies at company expense to help you get ahead faster. Drop in to your Placement Office and arrange for an interview. We're looking forward to meeting you!
