

## DATING POLL

(Continued From Page 1)  
 not agree with the Aggies in their date selections. While 74 per cent of them looked for good moral character in a date, 73 per cent also looked for understanding.

Well-mannered and beauty were the selections of 65 per cent of these boys, and 58 per cent of them stressed compatible. Other percentages of date trait selections were faithful and intelligent (46 per cent), good sport (39 per cent), good dancer (15 per cent) and popular (13 per cent).

The high school and college men may not be looking for the

When a man says "no" to life insurance, one of three things will happen . . .

1. He will buy it later and pay a higher rate for it because he will be older.

2. He will never buy, and his family (or his old age) may pay for it in sacrifice.

3. He will wait too long, and find money alone will not buy life insurance for him.

Would you be sorry today . . . if you had bought more life insurance 10 years ago. Don't delay, see

BERNIE LEMMONS '52 today or phone VI 6-5800.

same traits in their dates; but when it comes to a wife image, they are in complete agreement.

They rate the ten traits listed in the same order. Here are their selections and the over-all percentages of each:

Good moral character (94 per cent), faithful and understanding (84 per cent each), intelligent (76 per cent), compatible (68 per cent), well-mannered (43 per cent), beauty (32 per cent), good sport (12 per cent), good dancer (4 per cent), and popular (1 per cent).

It appears, from the results of this survey, that girls are looking for the same traits in their dates as they are in a husband. This could conceivably indicate that their reason for dating is for the selection of a mate.

Not so with the males. While the men have very definite ideas about what it takes to make a desirable wife, they do not select their dates with this in mind.

### WHY SHE BLOWS

BATESVILLE, Ark. (AP) — Wind blows out of "Blowing Cave" on Sullivan Creek near here. It's a puzzle to geologists, who haven't been able to find where the wind comes from.

## Water, Waste Men Schedule Short Course

Texas water and waste disposal operators who hold the health of millions of persons in their hands will be on campus next week for the 45th Texas Water and Sewage Works Association's Short School.

Between 800 and 900 persons are expected to attend, according to J. H. Sorrels of the Department of Civil Engineering.

Several other states plus Texas are represented among speakers for the school.

Water and waste disposal plant operators take tests at the school to earn State Department of Health certificates. The school is sponsored by the state association in cooperation with the State Department of Health, Southwest Section of the American Water Works Association, Texas Association, Water Pollution Control Federation and the Texas Engineering Extension Service.

Instruction is planned to keep city and industrial plant personnel abreast of developments in water and sewage handling.

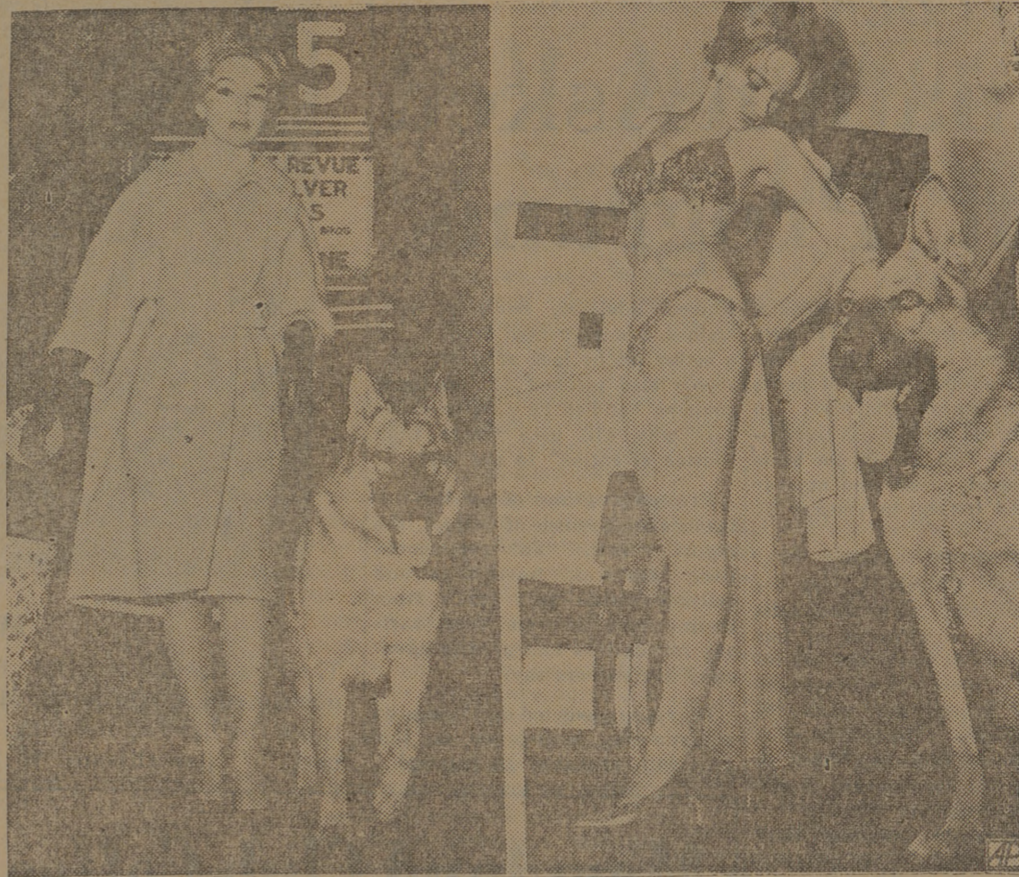

L. W. Smith of Temple heads the Texas Water and Sewage Works Association. The president-elect is A. H. Ullrich of Austin.

Marta Dane, an exotic dancer in a San Francisco night club, has a German shepherd police dog named Rex, who doubles as a companion and bodyguard. At left Rex escorts Marta home and at right, he stands guard in dressing room while she makes costume change. (AP Wirephoto)

## Lecture Series Hosts Chemist To Give Talk

Dr. Robert L. Burwell Jr., Northwestern University chemistry professor, will be heard at 4 p.m. Friday in the Graduate Lecture Series. The talk, to be given in Room 231 of the Chemistry Building will be about "The Interaction between Hydrogen, Ketones and Alcohols on Metallic Catalysts."

Burwell has done extensive research in the area of heterogeneous catalysis and physical organic chemistry. He was recently awarded a \$50,000 grant by the Petroleum Research Fund for fundamental studies in catalysis.

This is an unsolicited, unrestricted grant awarded on the basis of accomplishments in the area of fundamental research in the petroleum field.

Burwell joined the Northwestern faculty in 1939 and was chairman of the Department of Chemistry from 1952-57.

He was chairman of the Division of Physical Chemistry of the American Chemical Society in 1959, a member of the Petroleum Research Fund Advisory Board from 1958-61 and chairman of the Gordon Research Conference on Catalysis in 1957.
