

Looking Back . . .

At This Week

Rent Increased In Apartments

Married students opened this week with the realization that rent in College View and Project House apartment areas will be increased next fall.

The System Board of Directors ruled last Saturday that rent in each student housing area will be increased \$10 a month beginning next September. The new rates will be \$40 and \$48 in College View and \$52.50 in Project House apartments.

President Earl Rudder, who asked for the increase, said the apartments had operated at a \$91,000 loss over the past three years.

Flu Scare Proves False

What was first believed to be a siege of influenza was later diagnosed as "Monday morning colds" early in the week by Dr. Charles R. Lyons, director of Student Health Service.

Lyons reported 150 cases of flu-type cases early Monday, but by Tuesday afternoon none of the cases had turned out to be influenza.

Thirty-five of the 150 patients were hospitalized, but only two registered abnormal temperatures 24 hours later. In the wake of the scare, Lyons reminded students that flu vaccine is still available for \$1 per student.

Senate Seeks New Fees For Parking

The Student Senate has approved a proposal calling for pro-rated parking permits. The proposal, presented originally by the student life committee, is now being studied by the college Executive Committee.

Parking fees are now set at \$3 per semester. The new system would initiate lower fees when a car is registered during, and not

Bulletin Board

Range and Wildlife Management Wives Club will meet at 7:30 p.m. Monday in the Brooks Room of the YMCA Building.

Petroleum Engineering Wives Club will meet at 8 p.m. at the Manor, 706 S. College.

Unitarian Fellowship will meet at 8 p.m. Sunday at 1206 Ashburn. Dr. Edwin Doran will speak.

Alpha Phi Omega will meet at 7:30 p.m. Monday in Room 3-C of the MSC.

Sound Off

Editor, The Battalion:

I don't know when I have heard of anything so asinine as when I read in the Houston Post of Feb. 21 that some Texas University student had written an editorial in The Daily Texan to the effect that A&M be abolished because of an aftermath at a basketball game.

Just because Texas University students can't be good sports and be a good winner as well as a good loser is no reason for such a statement. I don't exactly know what started the riot but from what I read in the paper I have a pretty good idea it all stemmed from the phrase "Poor Aggies," which I will concede did not origi-

at the beginning, of a semester.

The Executive Committee is expected to rule on the proposal within two weeks.

Graduation Invitation Deadline Extended

The deadline for ordering graduation invitations has been extended until next Friday because of poor response during initial sales in February.

Only 420 orders had been placed by noon Wednesday, only one day before the initial deadline expired. There are usually around 600 orders each year.

The invitations may be purchased between 8 a.m.-4 p.m. at the cashier's window in the lower level of the MSC.

SCIENCE AND MORALITY—12

GI Joe Was Surprised

(Last of a series)

Where Do We Go From Here?

When GI Joe came back from the war in 1945, he found a curious state of depression in the United States. The war years had provided excitement, jobs and money unrealized in the depression-ridden 1930's. What was ahead for Joe, his wife and small children?

He probably could not have foreseen that in a few short years America would boom ahead in science, transportation, medicine and commerce at a pace unthought of outside science-fiction stories. Within fifteen years jet planes would be crossing the continent and the Atlantic in less than six hours. Salk vaccine would be conquering the horrors of polio, while tranquilizers, antibiotics and miracle drugs would be available to all. A gadget called television in the popular science magazines would be claiming attention in the living room through some forty hours of a given week. Housing developments and shopping centers would give a new dimension to home living.

All these things we accept today in 1963 as commonplace and ordinary. Ask the average man today what the next fifteen years will bring, how we will be living in 1978, and you may get a variety of reactions.

Some will tend to conservatism and say that we have gone about

nate at Texas University.

I have predicted for several years that what happened in Austin would happen and before it was all over someone would be hurt. Unless things have changed in the last few years, everyone who visits A&M is treated as a guest and I wish I could say the same about all the other schools.

While I am prejudiced as far as A&M is concerned, I have never even thought of such a thing as abolishing Texas University. After all we have to have some place to send the "teasippers" and we sure don't want them at AggieLand.

Mrs. F. C. Cooper
Texas City

THE BATTALION

Opinions expressed in The Battalion are those of the student writers only. The Battalion is a non-tax-supported, non-profit, self-supporting educational enterprise edited and operated by students as a college and community newspaper and is under the supervision of the director of Student Publications at Texas A&M College.

Members of the Student Publications Board are James L. Lindsey, chairman; Delbert McGuire, School of Arts and Sciences; J. A. Orr, School of Engineering; J. M. Holcomb, School of Agriculture; and Dr. E. D. McMurry, School of Veterinary Medicine.

The Battalion, a student newspaper at Texas A&M, is published in College Station, Texas daily except Saturday, Sunday, and holiday periods, September through May, and once a week during summer school.

The Associated Press is entitled exclusively to the use for republication of all news dispatches credited to it or not otherwise credited in the paper and local news of spontaneous origin published herein. Rights of republication of all other matter herein are also reserved.

Second-class postage paid at College Station, Texas.

MEMBER: The Associated Press Texas Press Assn.

Represented nationally by National Advertising Service, Inc., New York City, Chicago, Los Angeles and San Francisco.

Mail subscriptions are \$3.50 per semester; \$5 per school year, \$6.50 per full year. All subscriptions subject to 2% sales tax. Advertising rate furnished on request. Address: The Battalion, Room 4, YMCA Building, College Station, Texas.

News contributions may be made by telephoning VI 6-6618 or VI 6-4910 or at the editorial office, Room 4, YMCA Building. For advertising or delivery call VI 6-6415.

CADET SLOUCH

by Jim Earle

"... In an effort to help you progress with the honor system, I have spread you three seats apart for the quiz!"

as far as we can go. Others may soar into a world of fantasy, envisioning a world that would make Buck Rogers' Twenty-fifth Century look like the days of King Arthur.

The latter group would be nearer the truth. As population booms, everything else will bound forward. It will be a busy nation with a tremendous working force. Breakthroughs in science,

production, medicine and air travel will make our world of 1963 seem a quiet and rather awkward period of history.

At the center of all our progress — past, present, future — stands man, irreplaceable man with the same moral responsibilities, the same ideals, hopes and aspirations — for human nature will never be changed or replaced by a machine.

SCIENTISTS, ENGINEERS—GIVE YOUR FUTURE A FINAL EXAM

Put AC to the test, and you'll come up with the right answer to your future. AC Spark Plug, the Electronics Division of General Motors, is one of the leaders in the field of design, development and production of Inertial Guidance and Navigation Systems. Current projects include the APOLLO Navigation-Guidance System, TITAN II and THOR Inertial Guidance Systems, B-52 (C&D) Bombing Navigational System, POLARIS gyros and accelerometers.

Challenging projects are available in Milwaukee, Los Angeles and Boston for MS and PhD candidates with interests and academic backgrounds in the inertial guidance-navigation field.

Milwaukee—BSEE, ME, or Physics and Math graduates joining AC are offered a 32-week Career Acceleration Program which moves them rapidly into an actively productive position. The two-phase program consists of: PHASE I . . . Eight weeks of formal engineering classes in the areas of: Servo-Mechanisms • Semi-Conductor Technology • Theory of Inertial Guidance • Related Inertial Navigation Topics.

PHASE II . . . Actual work in the organization's three main technical areas: Engineering • Reliability • Operations. Following this training period you will be reassigned to

AC SPARK PLUG THE ELECTRONICS DIVISION OF GENERAL MOTORS MILWAUKEE • LOS ANGELES • BOSTON • FLINT • An Equal Opportunity Employer

your original department in Design, Development, Manufacturing or Reliability. Boston—Advanced Concepts Research and Development On-the-Job Training Program—AC's Boston Laboratory is engaged in development of navigational systems for manned aircraft, ballistic missiles, and space vehicles.

Los Angeles—Advanced Concepts Research and Development On-the-Job Training Program—AC's Los Angeles Laboratory is occupied with advanced guidance research for space vehicles and ballistic missiles, plus research in special purpose digital computers.

CONTACT your College Placement Officer regarding a General Motors-AC campus interview, and send for the informative brochure, "At AC, Navigation is Our Business."

Job Calls

Diamond Alkali Co. — Chemical engineering, agricultural economics, business administration and industrial education.

Ft. Worth First National Bank — Accounting, business administration and economics.

Sinclair Research, Inc.—Chemical engineering, BS, MS; organic chemistry, BS, MS, PhD.

Texas Employers' Insurance Assn. — Chemical engineering, civil engineering, electrical engineering, industrial engineering, mechanical engineering and petroleum engineering.

Union Carbide — Business administration and marketing.

U. S. Naval Ordnance Laboratory — Electrical engineering and physics, BS, MS, PhD; mechanical engineering, BS, MS.

Liberty Mutual Insurance Co. — Business administration, industrial technology and mechanical engineering.

U. S. Naval Ordnance Test Station — Electrical engineering, industrial engineering, mechanical engineering and physics, BS, MS, Ph.D.; mathematics, BA, MA, Ph.D.

Caterpillar Tractor Co.—Aeronautical engineering, chemical engineering, electrical engineering and mechanical engineering.

A total of 3,957 visitors on campus spent approximately \$83,097 during February.

P. L. (Pinkie) Downs Jr., official greeter of the college, said in making the report that visitors represented 21 different groups on campus for meetings, reunions and short courses.

BS, MS; agricultural engineering, civil engineering and industrial engineering, BS.

Burroughs Corp. — Business administration, BBA, MBA.

Rath Packing Co. — Agricultural economics, animal husbandry and business administration.

Standard Oil Co. of California — Chemical engineering, BS, MS, PhD; mathematics, BA, MA, PhD; electrical engineering, mechanical engineering and petroleum engineering, BS.
