APPROXIMATELY 710 GRANTS

# Fulbright Scholarships Now Available For Study Abroad

Applications are now being received for Fulbright Scholarships and other U. S. Government grants under the Fulbright-Hays Act for study abroad in 1964-65. Dr. J. M. Nance, campus Fulbright adviser, has announced.

Approximately 710 Fulbright Grants, 45 Joint U. S.-Other Government Grants and 89 Travel-Only Grants will be available to scholars who wish to pursue graduate study in 50 foreign countries, Nance said.

A working knowledge of the language of the country is necessary for grants to study in many of the countries.

NANCE SAID a limited number of teaching assistantships will be available in 1964-65 in France, Italy and India.

"These assistantships in French schools provide an excellent opportunity for students to become acquainted with life in the French provinces and to carry on independent academic work of their own," he said.

Openings are available in Italy to students holding a master's degree in American studies, law, history or philosophy and who possess a good command of Italian. They would assist Italian professors at several universities.

Graduate students interested in teaching English as a foreign language may apply for tutorships in English available at Indian universities.

THE FULLBRIGHT Grants are primarily for first year graduate study although many advanced graduate students are given awards. These grants provide round-trip transportation, maintenance, language or orientation course where appropriate, tuition and books.

Joint-U. S.-Other Government

Grants provide travel and full or partial maintenance offered by the foreign government.

The U. S. Government Travel-Only Grants supplement the scholarship received by a student from a foreign government or university or private donor. Such grants are available for study in Austria, Brazil, Denmark, France, Germany, Israel, Italy and the Netherlands.

"Students in residence on the campus next fall will make their application through the Campus Fulbright Committee," Nance said. "Other students should apply directly to the Institute of International Education."

The completed applications for resident students are due not later than Oct. 25.

Book Records Faculty Work In Publications

A 128-page book listing significant publications of A&M faculty members during the years 1957 through 1961 is just off the press.

More than 2,000 listings of publications are contained in the selective list, and some 370 persons are listed as the author of one or more publications.

"Although the list is selective, not exhaustive, it does reflect the diversity and breadth of the faculty's service to citizens of this and other states and its dedication to the disinterested search for knowledge and truth," Graduate Dean Wayne C. Hall wrote in the foreword.

The list is mainly a record of scholarly and technical books, monographs and articles in professional journals.

Dr. Robert W. Barzak, assistant to the dean of graduate studies, compiled the list.

Plans call for a similar volume to be published every other year.

MARRYING MONEY INDIANOLA, Iowa (AP) — An Indianola woman just hasn't been able to get the monetary sound out of her name. She was Bessie Leona Nichols. Now it's Mrs. John V. Money.

PICTURE OF THE WEEK

PHYSICS PROF GETS RESEARCH GRANT FROM AIR FORCE

The Department of Physics has been awarded a \$61,576 grant by the Air Force Office of Aerospace Research.

The funds will be used to conduct research on "The Electronic Spectra of Simple Molecules."

Supervising the project is Dr. Jesse Coon, professor of physics.

Coon said the grant is a continuation of an AFOSR-sponsored program which began in 1952 at A&M.

The primary mission of AFOSR is to support basic research through grants or contracts in the United States and throughout the free world. Grants and contracts are generally based on unsolicited proposals.

Selection is based on originality of the proposed research, competence of the principal investigator, facilities available to the investigator, and relevance of the research to Air Force interests.

HE ENLISTED in the Army

SGT. FIRST CLASS E. V. HETZEL of the Department of Military Science retired from duty Tuesday after serving twenty years in the U. S. Army.

Hetzel took the voluntary retirement to enter missionary work in Europe and southern Asia.

An ordained Assembly of God minister, Hetzel departs from the United States July 15, for Frankfurt, Germany, where he will be stationed during his two-year mission duty.

HE ENLISTED in the Army

While serving as Sgt. Major of the 27th Transportation Battalion (truck) in 1954-56, he supplied for several chaplains and served as chairman of the Words of Truth Evangelistic Service, the Lutheran Youth Association and the Pentecostal Fellowship.

Hetzel is a member of the Bethel Temple Assembly of God Church in Bryan. During his stint at A&M, he has spoken at churches from California to Louisiana. Before July 15, he will appear in many other states, including Illinois, New York and New Jersey.

IF NECESSARY

TEMPE, Ariz. (AP) — The mailing label used by Arizona State University's Poisonous Animals Research Laboratory carries these legends in bold print: "Live Scorpions!"

"Postmaster: Parcel may be opened for inspection if necessary."

English Students Take Poll, Find Array Of Wart Cures

The students simply asked if they knew of folk medicine remedies," said Dr. John Q. Anderson, English professor and folklorist.

PERSONS FROM 45 counties, seven states and Mexico were interviewed.

The most commonly reported method of 'curing' warts involve applying or otherwise using physical objects.

Among the more bloody procedures is to cut off the tail of a cat at the second joint, rub the tail across the wart and bury the appendage.

Vegetables, cloth, stump water and oil, plants, wood fruits and other objects were involved in various ways in the different folk remedies.

A TOM GREEN County resident reported a treatment involving rubbing a grain of corn on the wart until the wart bleeds. Then the corn must be fed to a chicken, but the patients must not see the chicken eat the corn.

"Steal a neighbor's washrag," a Cherokee County source said, "and bury it under the back doorstep for three days." Nothing was said of touching the wart.

RUBBING THE wart with the milky juice of a fig tree stem is

a treatment known to a Mexico City resident.

Thirteen of the responses involved individuals with special powers.

Reported from Howard County was a belief in the ability of the seventh son to rub off warts. The same belief was told by a Brazos County resident, and he added money must not be accepted for the service.

Ritual was cited by six persons.

Space Official To Speak Here On Astronomy

The director of space vehicle development for Grumman Aircraft in New York will deliver a lecture on astronomy here Tuesday.

Saul Ferdman will discuss "The Orbiting Astronomical Observatory — The New Highway of Astronomy" at 7:30 p.m. in Room 228 of the Chemistry Building. The public has been invited.

The lecture is sponsored by the A&M Student Section of the Institute of Aerospace Sciences.

Ferdman's talk will be illustrated with slides, and he also will present a 30-minute color motion picture detailing the latest progress on the orbiting astronomical observatory.

The Grumman official began his career in the aerospace industry after graduating in 1948 from New York University with a BS degree in aeronautical engineering. He worked for two years at NACA, Langley Research Center, and then returned to New York University to receive his masters degree before joining Grumman.

Ferdman has been with Grumman Aircraft since 1951.

"I Just Can't Believe It!" Aggie C. K. Powers, J. S. Potts and R. K. Crowe discuss the co-ed situation over a cup of coffee in the snack bar of the Memorial Student Center. Most student reaction has been that of disapproval to the Saturday decision by the Board of Directors allowing women to enroll in A&M on a full-time basis.

# Dining Hall Chief Plans Retirement

J. G. Penniston, officially retires Tuesday to end a 36-year career in the college dining hall system. He has served since 1944 as director of subsistence.

He was honored Friday at an informal coffee and received certificates of appreciation from President Earl Rudder and Cadet Col. Bill Nix.

Succeeding Penniston is Frank P. Nugent, a retired navy officer and veteran food service specialist.

## Math Contests Set For Frosh, Sophs

The annual contest examinations in mathematics for freshman and sophomore students will be held Tuesday night from 7:30 to 9:30.

Freshman participants will meet in Room 223 of the Academic Building and sophomores will go to Room 225.

The contests feature gold watches and cash awards as prizes.

# Sergeant Retires To Be Missionary

Sgt. First Class E. V. Hetzel of the Department of Military Science retired from duty Tuesday after serving twenty years in the U. S. Army.

Hetzel took the voluntary retirement to enter missionary work in Europe and southern Asia.

An ordained Assembly of God minister, Hetzel departs from the United States July 15, for Frankfurt, Germany, where he will be stationed during his two-year mission duty.

IT'S A GAS!  
(and easy on it)

This is quite a car... the Rambler American 440-H Hardtop. Clean lines and a sporty flair. Looks that say "go." A power plant that has the message, plus saving ways with a tank of gas.

Plenty of people room. Buckets, console, and 138-hp engine standard. Twin-Stick Floor Shift adds lots of action at little cost.

Rambler prices are tagged to save you money. And you keep saving after you own one. More service-free. Muffler and tailpipe designed to last at least as many years as the original buyer owns the car. Double-Safety Brakes (self-adjusting, too) and a host of other solid Rambler features. Why not see and drive a Rambler soon—at your Rambler dealer.

You call the play with Twin-Stick Floor Shift — has Instant Overtake.
