

Computer Seminar Planned For Reserve Officer Group

Reserve officials in the navy, army and air force will attend a three-week training seminar in computer programming from Aug. 25 to Sept. 6, to be co-sponsored by A&M and the Naval Research Reserve Research Company 8-3.

The seminar chairman is Commander C. Moore, USNR, who is also a professor of mathematics at A&M. Another A&M faculty member, Capt. R. H. Ballinger, commanding officer of NRRC 8-3 and professor of English, will serve as seminar administrator.

Participants for the seminar are naval officers, 15 army officers and five air force officers.

Ballinger said the course co-ordinated by the School of Engineering will be primarily a working seminar. Participants will be given 12 hours of instruction of Fortran programming for a high speed computer and an additional 12 hours of workshop and program writing.

"No previous programming or computer experience is required, or even desired," Ballinger said.

Officers with previous programming experience who are selected for the seminar will be expected to assist in the workshop and laboratory.

ELEMENTARY computer programs utilizing the first two concepts will be written by the participants.

Other subjects covering military and scientific uses of computers will include inventory and supply applications, artillery warfare, and science and industry.

One field trip is scheduled to the NASA Manned Spacecraft Center Computer Unit in Houston, Ballinger said.

Scientists Prepare Findings From Cruise For Symposium

Oceanographers from four nations are preparing findings made during a cooperative research cruise from Argentina to Antarctica for presentation at the Symposium on Antarctic Ecology, to be held on the Stanford University campus, June 17-20.

The cruise is the latest of a series made in a cooperative program between A&M and the Argentine Navy Hydrographic Office. The National Science Foundation has made a two-year, \$64,000 grant for the research program.

"Learning more about the biological and chemical properties of the South Atlantic along the continental shelf off Argentina and southward to Antarctica is a basic goal of the studies," Dr. Sayed Z. El-Sayed, A & M oceanographer, said.

Aboard the Argentine research vessel, Capitan Canepa, during the

cruise were El-Sayed, Byung Lee, A&M graduate student from Korea, two Japanese scientists, Drs. Yukio Sugimura and Shigeru Fukase, and Argentinian oceanographers including Dr. Enrique Mandelli of the hydrographic office.

The Capitan Canepa followed a zigzag course during the 35-day cruise to observe the waters of the South Atlantic at 50 "stations."

The scientists paid special attention to the Antarctic Convergence, where the cold waters of Antarctica meet the warmer waters. Waters of this convergence area play a significant role in the distribution of the marine organisms and the water masses south of the convergence or meeting point are rich in these organisms. The phytoplankton, small organisms, are eaten by larger ones, the zooplankton, which in turn are devoured by still larger creatures.

Tura Satana, who says she's of Japanese and Apache Indian ancestry, puts on her most beguiling look as she models a costume she wears in "Who's Been Sleeping In My Bed?", a movie now being filmed in Hollywood. (AP Wirephoto)

IN MSC BALLROOM

Cattlemen's Ball Slated For Friday

The Saddle and Sirloin Club will conclude the year's activities with its Annual Awards Banquet and Cattlemen's Ball to be held Friday at 6:30 p.m. in the Ballroom of the Memorial Student Center.

An array of awards, which were displayed this week in the walk-in display case in the MSC, will be presented to members of the club.

Awards to be made include: the judging team awards, outstanding students awards, freshman-sophomore judging contest awards, officer awards, and honorary membership awards. Next years officers will be presented at the banquet.

THE CLUB sweetheart will be selected during the Cattlemen's Ball to follow the banquet.

Saturday at 7:00 a.m. activities will move to the Little Southwestern Livestock Showmanship Contest held at the livestock centers.

At noon the Annual Ham Luncheon is planned for the members, guests and friends of the Saddle and Sirloin Club. The luncheon will be held in the Animal Industries Lecture Room, and a Ham Sale will follow.

The weekend's activities will con-

clude Saturday afternoon with the showing of the Champion and Reserve Champion Showmen of the livestock show in the Animal Husbandry Pavilion.

Range, Forestry Students Schedule Hensel Barbecue

More than a 100 parents, students faculty members are expected to attend the annual Mother's Day barbecue sponsored by the Range and Forestry Club, Saturday at Hensel Park.

Dr. D. L. Huss, club sponsor, said that "the event is unique in that the students prepare and serve the food themselves."

Highlighting the barbecue will be the recognition of this year's outstanding freshman, sophomore, junior and senior in the department.

The event serves to enable staff members to become better acquainted with students and parents, Huss said.

Happy Mother's Day
