

Post-Grad Service Offered Overseas

Lars Hals-Hagen, career counselor of the American Institute for Foreign Trade, will be on campus Wednesday to speak on opportunities at the foreign trade school and interview students who may be interested in assignments overseas. The American Institute for Foreign Trade is a postgraduate school which prepares students for international commerce and related activities.

Twenty-nine A&M students and former students have taken the course at the institute. The COURSES of study prepare the students for international commerce and associated activities by providing trained personnel to serve business and government throughout the world, along with helping toward international understanding.

Over 1,400 graduates have been placed in posts aboard, and a larger number are in the services of American corporations in the United States having large foreign interests or affiliates. The curriculum emphasizes three major fields, language, area studies and international commerce. The course is rigorous with three to five hours a day on language work, and the balance of a very full schedule divided between the area studies and the technical side of foreign trade.

Over the years, from 75 to 90 per cent of the students have obtained positions before graduation. The scale of salaries received, together with special allowances in foreign service, is considerably above the average received by students with one year of graduate training, taking positions outside of the United States.

AS EXAMPLES of the kinds of posts Aggies have had and places they are now located include: Marvin Priske, '51, is with Toalheiro Brazil, S.A., in Sao Paulo, Brazil; Bernard F. Terrones, '53, is with Shellmar, Inc., in San Juan, Puerto Rico;

Edward Fernandez, '59, is with Associated Imports Corp., as resident manager in Tokyo; Thomas

Gale, '59, is with Canadian Academy, in Kobe, Japan; William Bennett, '61, is with the Department of Commerce in Rhodesia;

John C. Shultz, '61, is with Cerre de Pasco, in Peru; and Edward Charles Saeng, '63, is with U. S. Steel Imports.

Those students who are interested in going into the field of foreign commerce, have been urged to make an appointment for an interview with Hals-Hagen while he is on campus.

Cytologist Set For European Research Trip

Dr. Meta S. Brown, cytologist in the cotton improvement group, Department of Soil and Crops Sciences, will attend the 11th International Congress of Genetics at The Hague, Netherlands, September 2-10. She will serve as an official representative of the college and will report on recent investigations dealing with chromosomes of cotton.

While in Europe, Mrs. Brown will also visit the Institute of Agricultural Plant Breeding and Genetics of the Agricultural University of Wageningen; the institutes of plant breeding in Cologne and Bonn, Germany, and in Louvain and Gembloux, Belgium.

The internationally known research worker in cotton breeding has recently received an invitation from Dr. Ralph Riley, Plant Breeding Institute, Cambridge, England, to attend and appear on the program of the 10th International Botanical Congress to be held in Edinburgh, Scotland in August, 1964. She plans also to visit the Plant Breeding Institutes at Cambridge and Abersystwyth and the Botanical Gardens in Oxford and London while in the British Isles.

Don't You Dare Touch My Baby

Patty, a ring-tailed monkey who resides in a zoo in St. Petersburg, Florida, is pretty particular about her "youngster" who happens to be a white mouse by nature. Just how the two got together, nobody knows, but the mouse apparently enjoys the attention which his adopted mother gives him. She pets him, checks him regularly for fleas and keeps him in her shelter at night. Perhaps she is just lonesome. At any rate the two attract a lot of attention at the zoo. (AP Wirephoto)

Ragsdale Give Journalists \$2,550 For Department Use

A gift of approximately \$2,550 was made to the Department of Journalism this week by Mr. and Mrs. Silas Ragsdale of Houston. Ragsdale is director of the Gulf Publishing Co. and editorial director of Hydrocarbon Processing and Petroleum Refiner Magazine. A major portion of the fund, \$1,875, is currently available from the sale of stock shares and the remainder will be received when other shares are sold, according to Delbert McGuire, head of the department.

The Ragsdales have requested that \$2,000 of the bequest be added to the Silas Ragsdale Loan Fund, which has been in use in the department since 1957. The remain-

der of the fund will be used to benefit the department at a later date.

"This grant will be of great value," McGuire said in announcing its receipt. "The loan fund will be used over and over to help students remain in school through periods of financial difficulty, and the remainder of the gift will serve to enlarge our holding of reference books or for other worthy projects."

Civil Service Commission Ends Political Snoopervision

Special to The Battalion
WASHINGTON—The U. S. Civil Service Commission has blocked attempts to turn summer government jobs for students into political patronage.

In a searing statement, the CSC said political clearance for part-time government jobs is "illegal and will not be tolerated."

The commission announced that competitive examinations would be held for the jobs, starting next year. The CSC notified heads of all federal departments and agencies against hiring student workers this summer because of political pressures.

The action came after the commission learned of a story in the

"National College Democrat," the publication of the National Federation of College Young Democrats. The story reportedly gave detailed information on how students could get political clearance from the White House for the summer jobs. It was reported that students were told to contact the

Campus Director of the Democratic National Committee about the

College democrats were advised to send their job applications to White House Aide Mrs. H. Davies. Mrs. Davies said, however, that the White House was merely coordinating the summer jobs program and, "making the good students don't get the shuffle."

The White House had government agencies request data sheets on students planned to hire for the summer jobs—specifically asking for the summer workers were recommended.

Repeated assurances by Administration officials that politics were involved among

didn't impress the CSC. "We were sorry to hear about it," said one commission man, "but we were placed in an impossible situation where honor and virtue and the integrity of the system were at stake."

To enforce the anti-political order, the commission retained authority of government agencies to make temporary appointments. The power won't be returned until the CSC is convinced that appointments are made without political clearances.

During the summer, the said its staff would make summer appointments comply with its rules and regulations.

Several government agencies reportedly told the CSC on a political basis despite the commission regulations.

The hard-hitting order was to President Kennedy and the simultaneously. The CSC will cancel commitments made hundreds of students for summer employment. The commission emphasized that agencies must present competitive lists of jobs this summer unless their hiring authority was restored.

Arizona Minister To Assume Duties At Local Church

The Rev. Thomas Seay of Tucson, Ariz. will assume duties as minister of the A&M Church of Christ on June 15.

Rev. Seay has been minister of the University Avenue Church of Christ in Tucson for several years. He has also been doing graduate work at the University of Arizona in the fields of counseling and psychology.

Rev. Seay also teaches Bible courses at the University of Arizona. Here he will devote full time to his pastorate.

A graduate of Abilene Christian College, he is married and has four children. They will live in College Station and his office will be in the Church of Christ Bible Chair.

Dean Hall Set For Paris Trip To Attend Meet

Dr. Wayne C. Hall, dean of graduate studies will present a technical paper to the Fifth International Conference on Natural Plant Growth Regulators to be held July 15-20 at Gif-sur-Yvette near Paris, France.

The international conference is held each three or four years with attendance restricted to those presenting papers.

Thirty-eight scientists from 13 nations around the world have been invited to participate in the conference this year.

Dr. Hall was invited by the executive committee of the International conference and the French Minister of Education and Science.

Dr. Hall's paper entitled, "Interrelations between Ethylene and Auxins," will be coauthored by Dr. Page W. Morgan, an assistant professor in the Department of Plant Sciences.

Rudder To Address West Texas Group

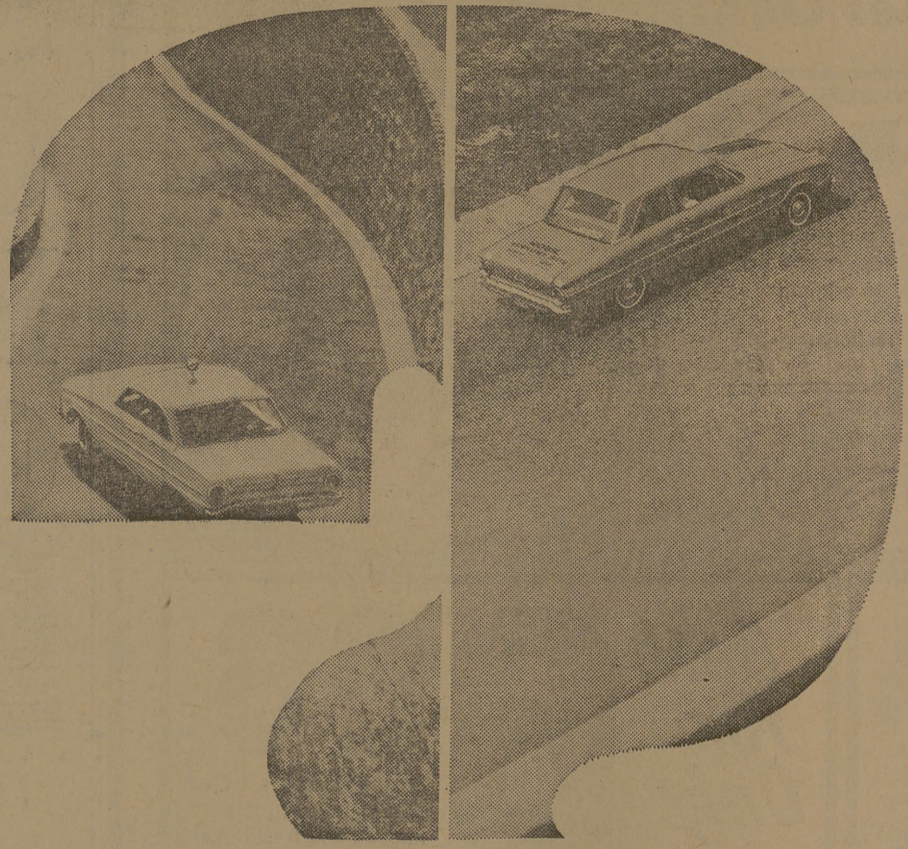

President Earl Rudder will be the featured speaker for the annual West Texas Boys Ranch field day Saturday.

The fourth annual livestock roundup for 1963 is scheduled at the boys ranch west of San Angelo.

Ranch officials expect more than 2,000 West Texans to visit the ranch during field day.

Rudder will speak at 12:30 p.m. following the noon barbecue.

WHAT'S HAPPENED TO FALCON

EVERYTHING! AND YET...

Early this year we put a 164-hp V-8 in a new kind of Falcon called the Sprint, and entered the stiffest winter road test we could find... the 2,500-mile Monte Carlo Rallye. We didn't know what would happen... but happen it did.

First, no one dreamed all the Rallye cars would have to experience the worst winter in decades. Snow, below zero temperatures, and the most demanding terrain in Europe took their toll. Two thirds of the 296 cars that started, failed to reach Monaco.

A lot of experts told us that the Falcon V-8's, untried as they were, could not hope to finish the Rallye with the best of weather. But not only did two Falcon Sprints finish, they placed first and second in their class. But there were more surprises (for

everyone) in store. Against all competition, regardless of class, the lead Sprint went on to take first in the final six performance legs.

We honestly didn't know the Falcon Sprint would do this well. But it showed us a Falcon with our new 164-hp V-8 is a car that can perform with the best of them. So a lot has happened to Falcon, and yet...

A six-cylinder Falcon has just finished the Mobil Economy Run and finished first in its class. It had to take a lot of punishment, too... 2,500 miles from Los Angeles to Detroit over mountains, deserts, and long stretches of superhighways. But the nickel-nursing ways of the all-time Economy Champ took all comers in its class.

So you see something has happened to the Falcon. It can be what you want it to be... a V-8 that travels in the same circle as Europe's performance kings... or a Six that can travel cross-country on a budget. There's something to put into your compact.
