

Highway Study Grant Awarded

A research contract to develop a method of determining value of travel time, comfort, convenience and uniform driving speed to commercial vehicle owners has been assigned to A&M.

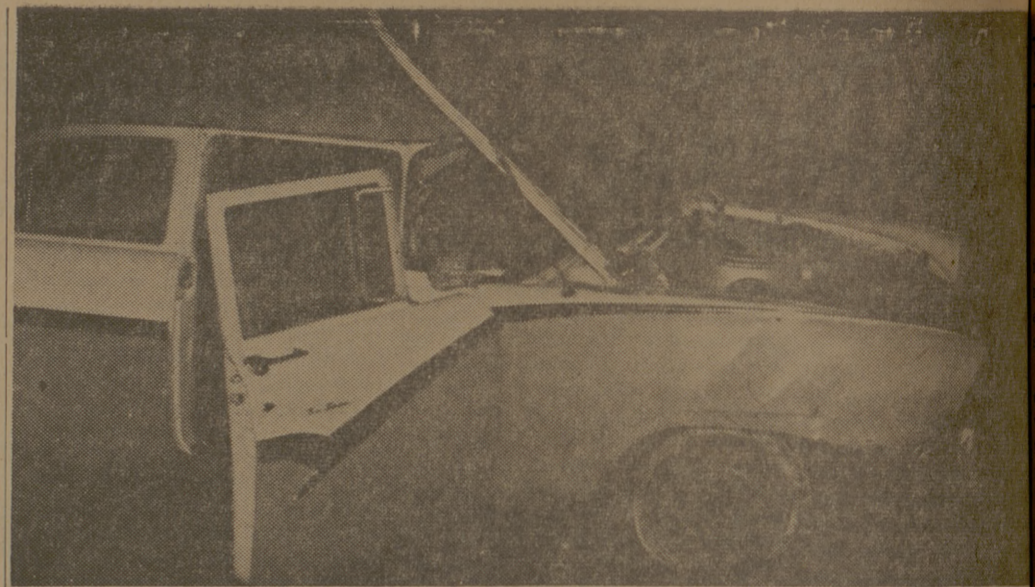

The grant come from the Highway Board of the National Academy of Sciences-National Research Council.

THE PROJECT IS one of 34 being awarded by the Board in a stepped-up drive to find solutions to many traffic and highway problems. The National Co-operative Highway Research Program, sponsored by the American Association of State Highway Officials and administered by the Board, has marked \$1.6 million for such projects during the fiscal year 1962-63.

ATTENTION FRESHMEN

Any freshman can reserve his books at no charge at Lou's and be assured of used books at quite a savings. We will take your order and hold your books till September. This is at no charge to you. You cannot be over-sold or over-charged because we allow a full **TWO WEEKS RETURN PRIVILEGE** to take care of any errors or changes in schedules. Your **FULL MONEY WILL BE REFUNDED** during this period of adjustment.

You Can't Go Wrong At LOU'S—He Treats You Right.

Monday Wreck Car

Two Brenham youths were hospitalized and a third escaped serious injury Monday near the railroad crossing at North Gate. Their car hurtled over the high railroad fill and

landed several feet farther down. The side-swiping another vehicle slightly, serious damage was caused to the front and wheels when the car landed.

Jim didn't catch any fish today. Now, on the way home, he can't help casting an envious eye at Tim's haul. It isn't that he begrudges Tim his fish. It's just that, in his heart, he can't help wish that he had been the lucky one.

This is natural, and Jim is young. He's just beginning to learn that you can't always be a winner, but he still finds losing pretty hard to take in stride.

Fortunately, Jim is being given the advantage of Christian training in church during this all-important period in a boy's life when a sense of values is being formed. He is learning lessons which only the Church can give him.

True, Jim is envying a very small item — a string of fish. But envy and greed come to all of us on a larger scale many times throughout life. To meet this challenge squarely, it takes years of self-discipline. That is why religious training can never begin too early.

THE CHURCH FOR ALL • ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Early and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Scientists Will Collect Data On Central American Rainfall

Two A&M meteorologists leave Saturday to gather more Central American rainfall data which they hope will, among other things, give clues to the mechanics of tropical rainfall.

Data already gathered lead to such interesting questions as why there are extreme variations in rainfall within narrow — 10 to 30 mile — ranges in several areas of Central America. More than topography, the lay of the land, appears to be behind these "interesting patterns."

Gathering the data are Assistant Professor Walter K. Henry and Instructor L. Glen Cobb. They plan to return before the fall semester begins, and they hope this trip, their second, will complete the data gathering in Central America. Next year they will visit the northern countries of South America.

THE STUDY offers both immediate and long range benefits and "several" firms interested in possible operations in the tropics already have contacted Henry and Cobb.

"I suspect," Henry said, "we

probably have more Central American rainfall data gathered here than there is at any other place in the Northern Hemisphere—I know we have more than the Central American countries, except for Nicaragua which we'll visit this trip, because we have all that their governmental agencies have plus what we have gathered."

Dr. Dale F. Leipper who heads the Department of Oceanography and Meteorology is the research project supervisor. The study is being done for the Army Signal Corps under terms of a contract administered through the A&M Research Foundation.

DATA ALREADY GATHERED lead to speculation upon such facts as this: The maximum rainfall near the Panama-Costa Rica border is about 10 miles inland from the Pacific, while the maximum rainfall at a point in Honduras is at the Caribbean shoreline.

The meteorologists are doing mesoscale, detailed studies, of several such "interesting patterns."

Cobb cited an area in northern Panama in which there is an approximately 100-inch difference in

annual rainfall between only 30 miles apart.

"Barren deserts" exist in places, contrary to popular belief, Henry and Cobb traveled year by varied means, visited banana plantations, fincas and other points in to governmental offices, the more exotic portions of the trip was aboard a narrow-gauge railroad handcar.

WEATHER DATA are "open information," and Cobb found almost all most cooperative.

"We visited one farm in that had detailed records of an extensive period of time when great-grandpa began keeping this data," Henry said.

Many Central American records and ranchers, just like West Texas, keep accurate records.

The researchers make attempts to have the data photographed or copied by other. Sometimes clerks are transcribe the records but graphic copying is done where possible.
